- Tabook expedition took place in 9 A.H.
- In 9 A.H there was famine in Hijaz.
- In 9 A.H there was scarcity of water in Madina.
- In Quran Tabook expedition is called expedition of straitness.
- Conquest of Makkah is called Aam-ul-Fatah.
- Ghazwa-e-Tabook was fought in 9 A.H.
- Hazrat Abbas was made prisoner of war in Badr.
- Abu Jehl was killed by Ma-ooz and Ma-aaz.
- The leader of teer-andaz at Jabale-e-Yahnene in the battle of Ohad was Abdullah bin Jabeer.
- Commander of infidels in Ohad was Abu Sufyan.
- Battle of Tabook came to an end without any result.
- 2 weeks were spent to dig the ditch.
- In a battle of Trench Hazrat Safia killed a Jew.
- Qamoos temple was conquered by Ali during Khyber war.
- For battle of Tabook, Abu Bakr donated all his belongings.
- In the battle of Ditch, the wrestler named Umair bin Abad-e-Wad was killed by Ali.
- In Hunain Muslims were in majority than to their enemy:
- Hazrat Jaafar was martyred in Moata war.
- In Tabook ghazwa Muslims returned without a fight.
- Gazwa Widdan was fought in the month of Zil-Hajj 1 A.H.
- In Hunain battle Prophet was left alone.
- The participants of Battle of Badar were bestowed with highest reward by Allah.
- **In Badr martyrs were Muhajirs=6 & Ansars=8.**
- In the battle of Taaif, catapult was used first time by Muslims.

- Against the Syrian tribe the battle of Al-Ghaba was waged.
- First Sariya Ubaidah bin Haris was fought at Rabakh in 1 A.H.
- Last Sariya Hazrat Saad bin Abi Waqqas was fought at Syria in 11 A.H.

COMPANIONS OF HOLY PROPHET (PBUH)

- Hazrat Asad died first among the Sahabah.
- Hamza & Hussain are known as leader of Martyrs.
- Hazrat Usman Bin Talha was the Key holder of Kaaba.
- Hazrat Saad bin Ubi waqas conquered Persia firstly.
- Qabeela bin Qais is known as cupbearer of Zam Zam.
- Abbas was instrumental in bringing abu Sufiyan in Islam.
- Periods of Caliphs
- **Abu Bakar** 632-634
- **Hazrat Umar** 634-644
- **Hazrat Usman** 644-656
- **Hazrat Ali** 656-661
- **Abu Bakar** 2y 3m
- **Hazrat Umar** 10y 5m 21d.
- **Hazrat Usman** 12y.
- **Hazrat Ali** 4y 9m.
- Hazrat Abu Bakar was the merchant of cloth.
- Real name of Hazrat Abu Bakar was Abdullah.
- Apostasy movement took place in the khilafat of Abu Bakar.
- Hazrat Abu Bakar died in 22nd of Jamadi-us-Sani 13 AH.
- Hazrat Umar embraced Islam at the age of 33 or 27.
- Abu Lulu Feroz, the slave martyred Hazrat Umar Farooq.
- Hazrat Umar Farooq was martyred on 1st Muharram 24 A.H.
- Hazrat Umar introduced Hijra Calender.
- Hazrat Usman is known as Zul Noorain because he wedded with two daughters of Prophet: Rukya+Umme Qulsoom.
- Usman accepted Islam at the instigation of Abu Bakar.
- Asadullah & Haider-e-Karar were the epithets of Hazrat Ali.
- Ali married Fatima in 2nd Hijra.
- Hazrat Ali was born at Khane-e-Kaaba.
- Hazrat Ali was martyred on 21st Ramzan 40 A.H.
- In Ghawa Uhad Hazrat Ali was awarded with Zulifqar.
- Hazrat Umar accepted Islam in 616 A.D.
- Hazrat Umar established the office of Qazi.
- Hazrat Umar added As Salato Khairum Min Noum.
- Hazrat Umar embraced the Islam at the age of 34.
- Usman migrated to Habsha
- Hazrat Usman participated in all battles except Badr.
- In the reign of Usama, Muwawiah established naval fleet.
- Only sahabi without seeing Prophet Awais Karni.
- Umar levied zakat on horses.
- Ali lifted zakat on horses.
- Abu Bakr had knowledge of dreams.
- Usman added 2nd Azan for Friday prayers.
- Atique is the title of Hazrat Abu Bakr.
- Hazrat Umar established Department of Police.
- Hazrat Umar formed a parliament, namely Majlis-e-Aam.
- Ghani was the title of Hazrat Usman (RA).
- Hazrat Ali has the title the gateway to knowledge.

- Hazrat Ali remained Caliph for 4 years and 9 months.
- Hazrat Ali is buried at Najaf.
- Ameer Mavia established the postal system.
- Amer bin Aas embraced Islam in 7th Hijra.
- Khalid bin Waleed embraced Islam in 7th Hijra.
- First Moazin of Islam, Hazrat Bilal.
- The home of Hazrat Abu Ayub Ansaari was the first place where the Prophet stayed in Madina Shareef.
- The first person sent to spread Islam under the instructions of the Prophet was Mus'ab bin Umair who was sent to Madinah.
- The first person to make Ijtihaad was Abu Bakr Siddique
- Hazrat Abu Zirr Ghaffari is known as the first Dervish.
- Abdullah ibn Maz'oom: first person buried in Jannatul Baqi.
- Hazrat Umar was the first person to perform Janazah Salaah in Jamaat with four Takbeers.
- First census of Islamic world in Umer's period.
- The first person to become murtad (out of the folds of Islam) was either Muqees bin Khubaaba or Ubaidullah bin Jahash.
- Salah-udin Ayubi conquered Bait ul Muqadas.
- Shaikh Abdul Qadir Jilani is buried at Baghdad.
- Shah Jahan Mosque is at Thatta.
- Indonesia is the biggest Islamic Country Population wise.
- Maldives is the smallest Islamic country area wise.
- Hazrat Data Ganj Bux is buried in Lahore.
- Abyssinia is an old name of Ethiopia.
- Mesopotamia is the old name of Iraq.
- Constantinople is an old name of Istanbul.
- Persia is an old name of Iran.
- Albania is Europe's only Islamic country.
- Sinai Peninsula is only land bridge between Asia and Africa.
- Egypt connects Africa with Europe continent.
- Al Azhar University is in Cairo.
- Shah Faisal Mosque is in Islamabad.
- Jibraeel will be first person questioned on Day of Qiyamah.
- From amongst the animals, the first animal to be brought back to life will be the Buraaq of Prophet Muhammad.
- The first meal in Jannah will be fish liver.
- The first Ibaadat on earth was Tauba (repentance).
- The first Mujaddid of Islam is Hazrat Umar bin Abdul Aziz.
- First book of Hadith compiled was Muata by Imam Malik.
- Mosque of Prophet was damaged due to fire in the reign of Motasim Billah.
- Jamia mosque of Damascus was built by Walid bin Malik.
- Badshahi mosque Lahore was built by Shah Jahan.
- Faisal mosque was opened for public in 1987.
- Umm-us-Saheehain is Imam Malik: Mauta.
- Mohd: bin Ismael Bukhari comprised of 4,000 hadiths
- Bukhari Sharif & Muslim Sharif are called Sahihain.
- Imam Tirmazy was a student of Abu Dawood.
- Imam Nisai=Ahmed bin Shoab.
- Kitab-ul-Kharaj was written by Imam Abu Yousuf.
- Mahmood Ghaznavi called kidnapper of scholars.
- Dara Shakoh was a mystic.
- Mulla Nizam-ud-Din founded the school of Dars-e-Nizamia.
- Rabia Basry was born in 95 A.H.
- Baqee Billah revolted against Akbar's deen-e-Ilahi firstly.
- Shaikh Ahmed Sirhandi was given the title of Mujadid alf Sani by Mulla Abdul Hakeem.
- Baba Fareed Ganj Shakr married to the daughter of Balban.
- Toosi built Margha astronomical observatory.
- Mamoon of west is al-Zahrawi.
- Shah Waliullah wrote Mawahb-ur-Rehman.

FACTS ABOUT HUMAN BODY

- Normal temperature of body is 98.4 deg: F = 37 deg: C
- Curarine is used as paralyzing agent
- A nerve cell is called neuron. Each neuron has several inputs called dendrites and a single output called axon
- Weakest bone is clavicle bone
- Hardest bone is collar bone
- The part of small intestine that joins large intestine is colon
- Hardest part of body is tooth
- Most abundant element in human body is carbon (chk Oxygen or calcium)
- Systole is heart contraction
- Diastole is heart relaxation
- Dendrites are connected with neurons
- Epidermis = outer skin is called the True skin, it is free from blood vessels and its cells are nourished by lymph
- Tendons hold muscles to the bones.
- The largest part of the human brain is the Cerebrum
- Blood fails to clot in the absence of Calcium
- the two most abundant elements by mass found in Earth's crust are Oxygen and Silicon
- Eardrum helps in keeping balance of the body
- In general, the probability of flooding decreases when there is an increase in the amount of infiltration
- Where is the 'Atlas' bone in the human body located? Neck
- What does intelligent people have more in their hair? zinc and copper
- Which base differentiates DNA and RNA? Uracil
- Eye is filled with liquids: **two**
- What is the name of bones of human finger? Phalanges
- Pons varolii is found in brain
- Human brain contains 4/5th of water
- % of water in body is 70%
- Carbon in human body is 18%
- Heart is conical in shape
- Weight of heart is 9 ounces with 4 cavities
- Weight of kidney is 4 1/2 ounces
- Weight of brain is 1.4 kg and it consists of 14 billion nerve cells
- Right kidney is shorter and little lower than left
- Kidneys are supplied blood through renal arteries
- Liver receives blood from the alimentary canal through Hepatic Portal vein
- Coronary artery supplies blood to heart
- Each kidney contains about one million nephrons
- Eye ball is moved by six muscles
- Most active muscle of human body is eye muscle
- Digestion of food takes 3 to 4 hours in stomach
- Capacity of stomach is one and a half kilo of food
- Clavicle is the collar bone
- Scapula is the shoulder bone
- Sternum is the chest bone
- There are 24 ribs
- Spinal cord has 33 disks
- Bones in hand are 27
- Ulna is the bone of forearm
- Radius is the second bone of forearm
- Carpal are 8 small bones of wrist
- Tarsal is the ankle bone
- Femur and patella (knee cap), tibia and fibula are bones of lower limbs
- Femur is the longest bone
- Head or skull has 29 bones
- Total bones are 206
- Total muscles are 600 (chk 650)
- 60 thousand miles of capillaries of blood
- Chemically finger nails are made of protein
- Nails are made of a tough material called keratin
- Average body has 2 square yards of skin
- Weight of skin is 6 pounds
- Smallest bone is stirrup in the ear about 1/10th of an inch
- A newborn baby has 300 bones
- In 22 weeks baby is formed completely
- Ovum is a female germ cell
- The sensation of skin is perceived by epidermis
- Number of systems in body are of 7 types
- Man breathes 20,000 times in a day
- Root of hair is called follicle
- More than 2/3rd of body weight is made of fluids/water
- Messages sent in brain at 240 miles/hour
- Weight of eyes is 1 1/2 ounces each
- There are 100,000 hairs
- Muscle of jaw exerts 219 kg weight
- Circadian rhythm is a medical term of heart beat
- Atmosphere exerts a pressure of 15 pounds per square inch on human body
- Iris of eye regulates the quantity of light admitted into the eye ball
- Outer layer of eyeball is called sclerotic
- The front portion of sclerotic is called cornea
- In eye a convex lens is placed
- Cornea is the only part of body without blood supply
- In front of eye is Cornea, which bends light as it passes into the eyeball. It is covered by a thin membrane called Conjunctiva.
- Image made on retina is upside down, but our brain turns it right.
- Behind the Cornea is a sheet of muscles called the Iris with the small hole in the middle called the pupil.
- Iris manages the amount of light entry into eye. In dark it relaxes to let pupil enter light as much as possible and in bright light it contracts.
- The muscles attached to the lens are ciliary muscles. These muscles can contract the lens thin to see distant objects and for close objects these muscles relax.
- Retina contains cone shaped cells that can detect colors.
- Retina contains rod shaped cells that can see dim light.
- In the centre of retina is a small yellow area called the fovea where each cell has its own connection to the brain.
- Skeleton word comes from a Greek word meaning dried up.
- The defect of vision because of which a person cannot see distant objects clearly: Myopia or Short sightedness
- Where on your body are the most sweat glands-Feet
- Your eyeballs are 3.5% what-Salt
- The human bodies got 45 miles of them – what-Nerves

- Where is your zygomatic bone-Cheek
- Pancreas lies partly on the left side and partly on the right side of the body.
- Development of calf muscles in ladies who wear high heels is a common example of: Use and disuse of organ
- Cerumen is the technical name for what body part-Earwax
- Skin does not excrete oil.
- Male child is born if xy chromosomes are united.
- Liver receives blood from the alimentary canal through hepatic portal vein.
- For short-sightedness (man cannot see distant objects) a concave lens is used
- For long-sightedness (man cannot see near objects) a convex lens is used
- Concave mirrors are used as shaving mirrors, doctors use concave mirrors for the examination of ear, nose or eyes of a patient
- Concave mirrors are used to focus light in case of searchlights and headlights of automobiles.
- Cerebellum co-ordinates movements, conscious control and balance, allowing you to move smoothly.
- The largest and most complicated part of brain is cerebrum. It controls conscious actions, speech and all your senses. It also does all your thinking and is the centre of memory and learning. It has two halves linked by bundles of nerve fibres. Its right side does artistic, creative tasks while the left is responsible for understanding, reading and thinking
- A reflex action is controlled by the nerves of the spinal cord without involving brain.
- Skeleton word comes from a Greek word meaning dried up
- Most abundant mineral in human body is calcium
- Strongest muscle is Thigh muscle (chk Heart muscle and cheek muscle)
- Iris in the eye contracts on the entry of light.
- Retina acts as a lens in the entry of light.
- Weight of heart is 300 gram.
- Water in human body is 85%
- A human being drinks 27 tons of water in a year
- Peritoneum is a membrane
- Unused fat in body is converted into animal fat and stored in different parts of body
- Substances which bring down body temperature are Antipyretics
- Antibodies are proteins
- Most easily breakable bone of body is Collar bone
- There is 21/2 pounds of calcium in human body
- A human body has 236 joints
- Dental enamel is the hardest thing present in human body
- A man breathes 18 times in a minute
- A 9 inch nail can be made from the iron available in a body
- Average weight of man's brain is 4.8 ounces and femal's 4.4 ounces
- About 900 pencils can be made from the carbon preserved in human body
- Skin does not excrete oil.
- New varieties of organisms can be brought about by hybridization.
- Male child is born if xy chromosomes are united.

- Total teeth = 32, eight flat incisors at the front, fount pointed canine and 20 flat-topped pre-molars and molars at the back of the mouth.
- Tooth is covered by tough white enamel.
- Enamel is the hardest substance in the body and resists almost everything except the acid produced by certain bacteria
- Liver is the body's chemical factory.
- Liver is the largest organ in the body.
- Liver carries out more than 500 different tasks.
- Liver recycles old red blood cells.
- Liver takes up and stores glucose from blood.
- Liver also absorbs and stores fat and some vitamins.
- Liver uses vitamin B12 for making new red blood cells.
- Nearly two third of our body is water.
- We loose about a liter and a half of water each day in sweating, breathing and urination.
- Each kidney is made up of millions of tiny filtering units called Nephrons.
- The nephrons can filter about 4 liters of blood every 5 minutes.
- Each day about 200 liters of water leaves the blood and passes into the filters most of it is then reclaimed and return to the blood.
- Only about a liter of water per day stays in the nephrons to leave the kidney and flow into the bladder as urine.
- Urea is poisonous so the kidneys remove all of it from the blood.
- The liquid, which leaves the kidney, as urine is about 96% water and just 4% salts and urea.
- The urinary bladder can hold about half a liter of urine before we must empty it.
- Amniotic sac is a protective bag of fluid in which the baby floats.
- A baby is attached to the side of the womb by placenta.
- Homo erectus means upright man
- Homo sapiens mean wise man
- Cells in intestine are easily worn away and live for only a few days.
- Bone cells can last for 30 years.
- The left ventricle pumps blood all round the body.
- Capillaries are so small that they can fit between cells.
- A living bone has layers of hard calcium phosphate on the outside and a heycomb of hard bone of living cells inside
- Bone marrow supply blood cells over 2 millin every second
- In the inner chamber of ear called cochlea, the vibrations send waves of movement through a fluid.
- The cochlea is liked with thousands of sensitive hairs.
- Thumping of heart or break out of sweat are caused by adrenaline.
- From the age of about 5 years a child's body grows steadily
- Protein is a natural polymer
- Muscles along the digestive system contract in a sequence called peristalsis to squeeze food along
- Nutrients of food are absorbed in blood in a long section of intestine called ileum. If uncoiled, ileum is 5-6 meters long
- Eye contains only three types of color-sensitive cells. These cells (called cones) are on retina. The cones respond to red, green and blue light. Brain makes out other colors by combining the signals from these cells.

Ophthalmology deals with Eyes

- ORBIS is mobile eye hospital
- Synovial fluid is the "joint oil" between bones
- The smallest bone in human body is stapes or stirrup bone. It is one of the three auditory ossicles in the middle ear. Its length is 0.10 to 0.13 inch.
- Your tongue is the only muscle in your body that is attached at only one end
- You use 14 muscles to smile and 43 to frown.
- A living bone has layers of hard calcium, phosphate on the outside and a honeycomb of hard bone are living cells within.
- Every second, hundreds of tiny pulses of electricity shoot through your body along living wires called nerves.
- There is a place in the retina where the light sensitive cells are interrupted by the presence of the optic nerve head. It is known as The Retinal Neural Transmission Layer.
- The cavity of Ascaris is known as Coelom.
- The membranous labyrinth of the ear is filled with Endolymph.
- Crura-cerebri is found in Mid-brain.
- The strongest muscle of the body is the masseter muscle, which is located in the jaw. (Check)
- Muscles account for 40 percent of one's body weight.
- There are 230 joints in the body.
- Kids have 20 first teeth. Adults have 32 teeth.
- The small intestines are about 25 feet long.
- The large intestines are five feet long and are three times wider than the small intestines.
- Most people shed 40 pounds of skin in a lifetime.
- Your body is 70 percent water.
- Normal body temperature is 98.6° Fahrenheit.
- When you sneeze, air rushes through your nose at a rate of 100 mph.
- An eyelash lives about 150 days before it falls out.
- Your brain sends messages at the rate of 240 mph.
- About 400 gallons of blood flow through your kidneys in one day.
- You blink your eyes about 20,000 times a day.
- Your heart beats about 100,000 times a day.
- Humans breathe 20 times per minute, more than 10 million times per year and about 700 million times in a lifetime.
- You have about 100,000 hairs on your head.
- There are 10 million nerve cells in your brain.
- Each of your eyes has 120 million rods, which help you see in black and white.
- Each eye has six million cones, which help you see in color.
- One in 12 man is colorblind.
- Brain of a normal human adult weighs about 3lb
- For an adult blood pressure of 120/80 is regarded as ideal and pressure of up to 140/90 is normal.
- Iris in the eye contracts on the entry of light.
- Retina acts as a lens in the entry of light.
- In your body where is the macula- Eye centre of the Retina
- Weight of heart is 300 gram.
- Heart pumps five liters of blood in 1 minute.
- Colon is mainly responsible for water absorption from the undigested residue.
- Right kidney in man is slightly lower in position than the left kidney
- The movement of food through esophagus is by the muscular action known as: peristaltic
- In the human body what is replaced every three months
Eyelashes
- Our eyes are always the same size from birth, but our nose and ears never stop growing
- The thickness of your skin varies from 1/2 to 6 millimeters, depending on the area of your body
- The temperature of the dead human body on Celsius scale is 25 c normal room temperature
- Where in your body is the labyrinth- Ear
- What does a hypodermic literally mean-Under skin
- In the body where would you find your villus
Small Intestine
- Where is the dirtiest skin on your body- The face
- The number of the spinal nerves in the man is 31 pairs.
- Part of the human body can expand 20 times its normal size: Stomach 0.5 litres to 5 litres
- In the human body where is your occiput: Back of head
- Central nervous system controls the reflex action in the body.
- The terminal part of vertebral column in man is called Coccyx
- The "Urinary system" of the body consists of 3 organs.
- Haversian canals are present in Bone.
- The heart beat is initiated and regulated by nodal tissue made of specialized cardiac muscles called Purkinje tissue.
- The gestation period of human being is Nine months.
- The first heart sound is produced when Diastole begins.
- Where would you find Lunate Triquetral and Hamate-Bones in Wrist
- Which part of the human body contains the most gold: Toenails
- In the body luteinizing hormone is produced by what gland
Pituitary
- Due to buffer system, human blood has a pH of 7.4.
- The normal temperature of human body is 98.6 F.
- Chemical elements most % human body O 65% C 18% and Hydrogen 10%
- Cell membrane is made up of protein and lipid molecules forming a semi permeable membrane.
- Carbohydrates in the cell are in form of glycogen.
- An epithelium is a collection of cells.
- Exoskeleton lies external to the muscles.
- Exoskeleton is commonly found in arthropods and mollusk.
- Exoskeleton is composed of dead substances secreted by the cells.
- Endoskeleton lies internal to muscles of the body. It is found in all vertebrates. It is formed of bones and cartilages.
- Endoskeleton is composed of living cells.
- Ear has 6 bones- Malleus bone (2), Incus bone (2) & stapes (2).
- Human skull has 22 bones.
- There are 26 vertebrae in the human body.
- Total number of ribs are 24- True Ribs (14), False Ribs (6) and floating ribs (4)
- Sternum is that bone where the ribs meet medially.
- Collarbone are 2, Shoulder bone are 2.
- Carpal bones are those bones, which form the wrist numbering 8.

- Small forearm bone is radius and main forearm bone is Ulna. Humerus is upper arm bone.
- Metacarpal bones are found in hand numbering 5.
- Phalanges are small bones present in fingers also called digits. These are 14 in number.
- Each leg is composed of 29 bones.
- Tarsal bone is also known as the anklebone. These are seven in number.
- Phalanges are toe bones numbering 14.
- Vertebrae are 33 in number. Vertebral column covers spinal cord and protects it from injury.
- Clavicle bones are also known as collarbones. These are two bones.
- Scapula is called shoulder bones.
- Sternum is called chest bone.
- Patella acts like a kneecap and protects the knee joint.
- Tibia is the main large bone of the lower leg also known as calf-bone.
- Fibula is the smaller part of lower leg.
- Femur bears the weight of the body. It is in upper leg.
- Muscles are composed of threadlike protein structure called myofibril.
- The cardiac muscle continues to contract rhythmically even when it is disconnected from the nervous system.
- Trapezius muscle is responsible for movement of shoulder.
- Sternocleidomastoid muscle is the longest muscle of the body. It bends head and neck.
- Brachialis anticus muscle is responsible for bending forearm to the upper arm.
- Heart is enclosed in a tough membrane called Pericardium.
- There are four chambers of heart.
- Heart is surrounded by a fluid called as pericardial fluid.
- The weight of the heart in females is 25% lesser than in males.
- Excitability and contractility of the heart is due to the presence of myofibrils of actin and myosin.
- Purkinjee fibres are tissues of heart.
- S.A Node and A.V Node are special conducting tissues of the heart.
- S.A. Node was discovered by Keith and Flack in 1907.
- A.V Node functions as Pacemaker.
- Right atrium receives deoxygenated blood from body collected by Superior Vena Cava from head and upper parts while from the lower parts by inferior vena cava.
- Right atrium opens into right ventricle through right atrioventricular aperture guarded by bicuspid valve allowing one-way flow of blood.
- When right ventricle contracts, the blood is pushed by the way of pulmonary arteries to the lungs for oxygenation.
- The left atrium is that chamber which receives the oxygenated blood from lungs by pulmonary veins.
- Left atrium opens into left ventricle from there blood is pumped into aorta, which distributes blood to body.
- Cardiac cycle consists of three events- Auricular Systole, Ventricular Systole and Diastole.
- Each cardiac cycle takes 0.8 seconds.
- Aorta is the largest vessel of the body.
- The biggest artery is aorta with a diameter of one inch.
- Arteries carry blood away from the heart except pulmonary arteries.
- Arteries carry oxygenated blood except pulmonary arteries.
- The smallest artery is called arteriole.
- The walls of veins are much thinner than the arteries.
- Coronary arteries supply blood to heart.
- Carotid arteries supply blood to head.
- Subclavian arteries supply blood to shoulder and forelimbs.
- Coeliac artery supplies blood to digestive system.
- Renal artery supplies blood to kidneys.
- Iliac artery supplies blood to legs.
- The most important function of perspiration is to regulate the body temperature.
- The number of chromosomes in the human body is 46.
- First tissue culture was grown in space on Dec: 17, 1997.
- The tiny air sacs in the lung tissues are called alveoli.
- Farmer's lung is a type of hypersensitivity pneumonitis
- Otalgia is what condition-Earache
- Scurvy is a disease resulting from a deficiency of vitamin C, which is required for the synthesis of collagen in humans.
- Scorbutic gums, a symptom of scurvy
- Scurvy leads to the formation of spots on the skin, spongy gums, and bleeding from the mucous membranes. The spots are most abundant on the thighs and legs, and a person with the ailment looks pale, feels depressed, and is partially immobilized. In advanced scurvy there are open, suppurating wounds and loss of teeth. It was described by Hippocrates
- Shortsightedness can be corrected with the use of Concave.
- Pancreas lies partly on the left side and partly on the right side of the body.
- In total 25 elements are present in human body.

HUMAN BLOOD

- Universal donor group is O group
- Total volume of blood in human body is 5.5 liters (chk 6 liters)
- Life span of red blood cells is 120 days
- Life of RBC is 115 days.
- The total quantity of blood in a human body is 7-8 liter.
- 80 % water is found in pure blood
- The pH of normal human body is Arteries 7.4
- 60% of blood plasma consists of protein.
- Which one of the following substances is obtained by the fractionation of human blood? Gamma globulin
- In the human circulatory system blood returns to the heart from the lungs through Pulmonary Veins.
- First blood transfusion carried out in London
- PH value of water is 7, blood is 7.4 and urine is 5.5-6.5
- When iron is less in body the quantity of RBC decreases
- Leucocytosis is the increase in number of white blood cells.
- it takes 30 seconds to blood for a complete circulation in human body
- Blood travels 1000 times through the whole body
- Hemoglobin is chromo-protein

- In lymph main cells are lymphocytes
- Blood has 83% of water
- Blood has 60% plasma, 40% corpuscles
- During sleep a man's blood pressure fluctuates.
- Fat is a Lipid
- Human blood is 6 times thicker than water
- Heart pumps five liters of blood in 1 minute.
- Antigen is a substance that destroys harmful bacteria
- Blood typing is the way of determining the blood group.
- Platelets help to seal cuts in the skin.
- Almost half of the blood in a body is made up of red blood cells.
- White cells are about one for every 500 red cells.
- A blood donor gives about 500 ml of blood.
- RBC and WBC is bloods are counted by Hemocytometer.
- Of the blood groups A, B, AB and O, which one is transfused into a person whose blood group is A? Group A and O
- Your body contains eight pints of blood.
- Kari Landsteiner discovered the blood groups of man.
- Prothrombin, which helps in clotting of blood, is released by Blood platelets.
- The main function of white blood cells in the body is to protect the body against diseases.
- In which liquid component do the blood cells move about?
Plasma
- Blood can be classified into how many main types of groups?
Four
- The fluid portion of blood is known as the plasma.
- Blood contains 91 to 92% water.
- Blood contains proteins like Serum Albumin, Serum Globulin, Prothrombin and Fibrinogen.
- RBCs in venous blood have bigger size than in arterial blood.
- RBCs due to their Hb content act as O₂ carrier.
- RBCs are also known as Erythrocytes.
- WBCs are known as Leucocytes and act as police force of the body.
- WBCs are larger in size as compared to RBCs.
- Life span of WBCs is a few days to a few weeks.
- Platelets have no nucleus.
- Platelets are formed in red bone marrow.
- Life span of platelets varies from 4 to 10 days.
- Platelets are very rich in catecholamine.
- Blood grouping is based on the presence of blood group antigen (agglutinates) on RBCs, which are inherited.
- O group comprises of 47% of population while A with 41% is second.
- Hemoglobin is a conjugated protein composed of heme and globulin.
- Quantity of hemoglobin is 16-gms/100 ml of blood in Males and 14-gms/100 ml of blood in females.
- Hemoglobin is basically from acetic acid and glycine.
- Platelets are essential for blood clotting.
- Blood clotting factor is produced by Liver
- Chemical factory of human body is liver
- Urea is produced in liver
- Maximum quantity of water is in eyes
- Largest secretory gland is Liver
- Insulin is produced by pancreas, Insulin is a protein which acts as a hormone
- Amino acids are a product of the digestion of proteins.
- Ptyalin is starch-digesting enzyme.
- Bile secretion does not contain enzymes.
- Pepsin, a digestive enzyme is produced in stomach.
- The hormone secreted by adrenal cortex: aldosterone
- The organ in (the human body which is responsible for the digestion of protein only -Stomach
- Ptyalin is present in the saliva.
- Glycogen is mainly stored in Liver and muscles.
- Pepsin converts protein into peptides in acid media.
- Trypsin is an enzyme produced by pancreas
- Starch is digested by Ptylin
- Gall bladder stores bile from liver and releases it into small intestine after food is consumed
- Pancreas is both endo- and exocrine gland
- Hormones secreted by kidneys are Renin and Erythropoietin
- Lachrymal glands give out tears
- Sweat glands give out sweat
- Salivary glands give out saliva, Saliva contains Amylases
- Ptyalin is the enzyme of Saliva
- Liver converts excessive protein into urea.
- Amino acids are a product of the digestion of proteins.
- Ptyalin is starch-digesting enzyme.
- Bile secretion does not contain enzymes.
- Enzymes found in saliva are ptyalin.
- Lachrymal gland is a ductless gland.
- Insulin: Pancreas
- Thyroxin: Thyroid
- Adrenaline; Adrenal medulla
- Estrogen: Ovaries
- Testosterone: Testes
- Cortisol; Adrenal cortex
- In the body luteinizing hormone is produced by what gland
Pituitary
- Mammary gland give out milk
- Liver gives out bile
- Sebaceous gland give out sebum
- Exocrine glands transmit secretions through ducts
- Enzymes are protein in nature
- Hydrolysis of starch gives glucose and fructose
- Fat digested by Lipase
- Starch is a polymer of glucose
- Endocrine glands: Pituitary is in brain and it controls general body growth.
- Thyroid gland produces Thyroxin and it increases rate of cellular metabolism,
- Pancreas produce insulin which metabolizes sugar and fats
- Adrenal gland produce cortisol, Testosterone is produced by Testes and ovaries produce Progesterone.

GLANDS AND SECRETIONS IN HUMAN BODY

- Pituitary: Controls activity of thyroid, adrenal and reproductive glands. Other hormones stimulate the womb to contract during birth, and stimulate milk production after a baby is born.
- Thyroid: Thyroxin controls the rate at which we grow, and how fast food is converted to energy in our cells.
- Adrenal Glands: Adrenaline speeds up the heart and breathing, causes sweating and diverts blood to the muscles, in response to an emergency.
- Cortisone helps fight stress and shock.
- Aldosterone helps regulate water and salt in the body.
- Pancreas: Insulin controls the body's use of glucose.
- Ovaries: Estrogens and progesterone control female appearance and the release of eggs, and prepare the body for pregnancy.
- Testes: Testosterone controls the development of male appearance and the production of sperm cells.
- Protein which acts as hormone is Oxatocin
- Hormones are made in glands known as endocrine glands, which pour them, straight into the blood. Hormones are not released all the time they are produced in short bursts.
- Pituitary gland attached to the underside of brain releases hormones that control the activity of other endocrine glands. It produces hormone that controls the amount of water filtered in the kidneys. Pituitary is attached to the brain by the hypothalamus which links together the nervous system and the hormonal system
- Excessive secretion from the pituitary gland in children results in increased height

GENE AND CELL

- The genetic material of chromatin is DNA
- Hereditary material is DNA
- Gender of a person is determined by 23rd chromosome
- Autosome are sex chromosome = 23
- Nucleus of human body cell contains about 20,000 genes, half of which being contributed by each parent
- Term gene was coined by Johannsen in 1909
- DNA = Deoxy ribose nucleic acid
- RNA = Ribose nucleic acid
- Histones are on chromosomes
- Chromosomes word was coined by Waldeyer in 1888
- Number of chromosomes in human being is 46
- Chromosomes in spermatozoa are 23
- Smallest part of a gene is Mutton
- Mitochondria are power house of cells
- Golgi bodies are involved in cell secretions
- Ribosome are rich in DNA and prepare protein
- Plastids are found in Plant cells only and contain chlorophyll
- Centrosomes help in cell division
- Proteins are synthesized by Golgi bodies.
- Cellulose respiration is done by Mitochondrion
- Light energy is stored in the form of chemical energy due to the

- activity of Chloroplast.
- Protoplasm is a colloidal solution.
- Most cells are microscopic but the egg cell of an ostrich is 15-20 cm long and some giraffe nerve cells reach more than 4 m long
- Mitochondria do work of cell respiration.
- The nucleus, mitochondria and chloroplast have double membranes
- Bacteria have no nucleus and no mitochondria they have just a single loop of DNA cell nucleoid as well as food granules and ribosome which produce proteins
- Each cell has the same set of about 30,000 genes.
- Genes are arranged along a long and thin thread-like structure called chromosomes.
- Snakes have 36 chromosomes, horse has 63 while some ferns have 500 or more
- Humans have a total of 46 chromosomes- 23 pairs in every cell. The only exception is sperm and egg cells, which have 23 unpaired chromosomes.
- Genes are made of a chemical called deoxyribonucleic acid or DNA
- DNA tells a cell how to make the proteins
- Every cell in a body contains at least 10,000 different kinds of proteins.
- The machinery for making these proteins is on structures called ribosome, which are outside the nucleus.
- RNA carries the instructions for making a particular protein to the ribosome.
- A permanent change to a piece of DNA is called a mutation.
- Nearly a third of a human being's genes are the same as the genes of a lettuce.
- DNA is shaped like a twisted ladder called double helix. The rungs of the ladder are made up of four chemical building blocks Adenine, Guanine, Thymine, and Cytosine.
- Amoeba is a unicellular organism
- A structure present in all cells is called cell membrane
- The normal temperature of human body on the Kelvin scale is 310.
- ELISA is Enzyme Linked Immunosorbent Assay- for HIV/AIDS.
- Rh- blood is very rare compared to Rh+.
- The pancreatic duct releases its contents into duodenum.
- Right hepatic artery supplies nutrient rich blood from stomach and small intestine to the liver.
- Human cranium contains 6 bones.
- In the human body, spleen stores extra blood for release when shortage occurs.
- Mitochondria contain enzymes for cellular respirations.
- In the human body, rotator cuff muscle is to be found in the shoulder.
- Reproductive cells in normal human beings are produced in greater numbers for a longer period of time in the male
- Which vessels bring blood back to heart? Inferior venacava and Superior venacava bring blood back to heart from lower parts and upper parts of body respectively.
- Where in your body is your patella: Knee (it's the kneecap
- 80% of household dust is actually what material-Dead skin
- Babies are born without what-Knee Caps - form at 2-6 years
- In Nuclear DNA is concentrated in chromatin.
- Proteins are synthesized by golgi bodies.

- Cellulose respiration is done by Mitochondrion.
- Protoplasm is a colloidal solution.
- Man is Homoeothermic.
- Hydrosis is the medical term for what -Sweating
- An IVP is used to detect what medical condition- Kidney Stones- Intravenuspylorigram
- What part of the body ages the fastest-The Hands
- In medicine what is nicknamed a blue pipe-A Vein
- What is the name of the cranial bone just above your ear Temporal
- What is the name of the scale measuring depth of coma (GCS)- Glasgow Coma Scale

DISEASES and their CURE

- TB tuberculosis is a bacterial disease
- Bacillus causes TB
- Salmonella Typhus are bacteria causing Typhoid
- Vibrio cholera cause Cholera
- Clostridium Tetni cause Tetanus
- Athlete's foot is caused by Fungi
- Presbyopia is an old age eye disease
- Mycobacterium are bacteria causing T.B
- Myxovirus cause Influenza
- Anopheles (mosquito) causes malaria, parasite is plasmodium
- Astigmatism is fault of eye
- Thalasemia is an hereditary disease causing deficiency of hemoglobin
- Long-sightedness is called Hyper metropia
- Shortsightedness is called Myopia
- Largest acquired disease is of tooth
- Low sugar in blood is called Hypoglycemia
- High sugar in blood is called Hyperglycemia
- Plague is caused by Yersina Pests
- Hemophilia is a bleeding disease
- Parasomnia is sleepwalking.
- In Leukemia there is an abnormal increase in number of White blood cells
- Parkinson is a disease of Brain
- An Aids patient can live for 2 years
- Aids virus has single stranded RNA
- Meningitis disease affects Central Nervous System
- Diabetes is a disease in which the urine lacks insulin
- Improper function of Thyroid gland causes Myxedema
- Scurvy is the disease of swelling and bleeding of gums
- Hook worm enters human body through soles of feet
- Tuberculosis usually spreads through milk
- Malaria affects spleen and liver
- Trachoma is a disease of eyes
- Mumps is caused by virus
- Lock jaw is a condition of Tetanus virus attack
- A person suffering from Beri- Beri should use citrus fruit , mangoes, grapes

- Pneumonia is caused by Cocci.
- Common Cold is caused by Virus.
- Chief food of mosquito larva is microorganism found in water.
- Chief food of butterfly larva is leaves of plants.
- Pneumonia affects respiratory system.
- Rabies affects Nervous system.
- Beri beri affects bones.
- Biopsy is done on tissues taken from a living body
- Oldest known disease in the world is Leprosy
- Lack of oxygen at high altitudes produce bleeding
- Pathogenic is the Disease producing microorganism.
- Antibiotic for inhibit the growth of bacteria.
- Sulfa drugs are used for bacteria.
- A disinfectant is used for destroying microorganism and rendering the material sterile.
- Encephalitis is a viral disease.
- Trypanosome a parasite causing sleeping sickness.
- Immunization is the method in which the cure of disease is done by Vaccine.
- Sleep sickness is transmitted by tse-tse-fly.
- Typical bacterial cell is about 1000 times smaller than an animal cell
- SARS = Severe Acute Respiratory Syndrome is a pneumonia like disease
- Mad cow disease = BSE (Bovine Spongiform Encephalopathy)
- Louis Pasteur, a French chemist, was the first to realize that diseases are caused by germs
- In 1881, Louis Pasteur founded a vaccine for anthrax, a fatal disease of animals.
- The Pasteur Institute in Paris was founded in 1888 to investigate rabies.
- Morphine used in drugs is extracted from opium poppy, it is a powerful painkiller.
- Antibiotics are substances produced naturally by certain moulds and bacteria.
- A vaccine is made of dead or weakened microorganisms to fight the invading virus. The body produces antibodies to fight the invading virus. Later, if the body is exposed to real virus the antibodies are already there to attack it before it multiplies.
- English doctor Edward Jener made vaccine of smallpox.
- Analgesic drugs prevent or reduce pain
- Jaundice is a yellowness of skin, which is caused by disease of the liver or gall bladder.
- Head louse transmits the typhoid.
- Cancer cells divide rapidly and form growth called Tumors.
- Radiotherapy is used for killing cancer cells
- Ultra-violet rays from sun can cause cancer
- Strong drugs (Chemotherapy) are used to remove cancer in early stages
- Magic bullets are special antibodies used as a drug to kill cancer cells.
- Oil from the skin contains substances that kill bacteria.
- Inside the nose sticky mucus traps and destroys invaders we inhale.
- We have several different types of infection fighting white cells in the blood. Two of the most important are lymphocytes and macrophages.

- Lymphocytes produce special chemical called antibodies to fight bacteria and viruses.
- By what name is the disease, Varicella, more commonly known? Chicken Pox
- A typical bacterial cell is about 1000 times smaller than an animal cell.
- Viruses are not made up of cells.
- Viruses cause, common cold, measles, aidz.
- Bacteria move with Flagella.
- Bacteria cause Cholera, Tetanus, and Typhoid.
- Bacteria can produce (Two) in every 30 minutes and 8 million bacteria a day.
- Viruses called Bacteriophages invade the cell of bacteria. They 'hijack' the cell's chemical process, so that, instead of working normally, the cell makes copies of the virus.
- Immunization is the method in which the cure of disease is done by Vaccine.
- Small pox is totally eliminated from the world.
- Cancer is a disease which cannot be spread by those who have it.
- The drug quinine is used in the treatment of malaria.
- Pollen grains can cause hay fever, which is a typical allergic reaction.
- After drinking contaminated water you would be most apt to develop symptoms of 'typhoid fever'.
- Food poisoning can result from the eating of too much Vitamins. (Check)
- The most infectious disease is Penumonic form of Plague. it has a mortality rate of about 99.99 %
- Robert Koch worked on TB
- Rust is caused by Fungi.
- Pathogenic is the Disease producing microorganism.
- Antibiotic for inhibits the growth of bacteria.
- Sulfa drugs are used for bacteria.
- A disinfectant is used for destroying micro-organism and rendering the material sterile.
- Pneumonia is caused by Cocci.
- Common Cold is caused by Virus.
- Bacillus causes Cholera.
- Pneumonia affects respiratory system.
- Rabies affects Nervous system.
- Beri beri affects bones.
- Head louse transmits the typhoid.
- Sleep sickness is transmitted by tse-tse-fly.
- Trachoma is a disease of eye.
- Typhoid is caused by bacteria.
- Cancer Cells divide rapidly and form growth called Tumors.
- If cells break away from the tumors they can travel to other part of the body and start new tumors.
- Radiotherapy is used for killing cancer cells.
- Ultra-Violet rays from the sun can damage skin cells and cause cancer.
- Strong drugs (Chemotherapy) are used to remove cancer in early stages.
- Magic bullets are special antibodies used as a drug to kill cancer; they directly attach themselves to cancer cells.
- Anesthetic prevents patient feeling pain; local anesthetic acts locally; generally anesthetic creates unconsciousness.
- Analgesic prevents or reduces pain.
- Antibiotic kills the bacteria that cause disease.
- Antihistamine relieves symptoms of asthma, hay fever and other allergies.
- Hormone = used to overcome a hormone deficiency in the body.
- Narcotic = helps prevent pain by deadening the whole system.
- Sedative = helps induce sleep.
- Tranquillizer = helps calm a person.
- Vaccine = helps the body fight a virus disease by triggering its natural defenses in advance.
- Encephalitis is a viral disease.
- Muscle stiffness is caused by a disease called Parkinsons (Check)
- Wool sorters disease is actually what-Anthrax
- Which disease was once known as white plague-Tuberculosis
- Being a certain malaria is caused by plasmodium vivax.
- Sir Ronald Ross first described the life history of human malarial parasite in Anopheles.
- The mouthparts of anopheles are adapted to piercing and sucking type feeding.
- Amoebic dysentery in man is caused by Entamoeba histolytica.
- Jaundice is the disease of Liver
- AIDS is caused by HIV virus (human immune deficiency virus).
- Addison's disease is caused by the excessive secretion of: Adrenocorticotrophic Hormone
- Consumption was the former name of which disease: Tuberculosis
- If you suffered from pruritus - what would be wrong-Itching
- The word amnesia (forgetfulness) derives from- Greek
- Encephalitis is a viral disease.
- What disease is spread in minute water droplets-Legionnaires Disease
- Which of the following diseases is generally spread by fleas? Yellow fever
- The much dreaded H1N1 virus flu, also known as swine flu, is a respiratory illness in pigs caused by a virus
- Water contaminated by sewage spreads disease such as cholera, typhoid, dysentery and river blindness
- Meningococcal Meningitis is transmitted from person to person by mosquito bites.
- Vomiting and neck pain are two of the symptoms of Meningococcal Meningitis.
- Deficiency of vitamin A causes Xerophthalmia, a disease characterized by dryness of conjunctiva layer of eye.
- Cholera is caused by bacteria vibrio cholerae.
- Colour blindness, Down's syndrome & Hemophilia are genetic disorders.
- Xerophthalmia is disease of tear glands.
- Leukemia is a type of cancer in which there is an abnormal increase in the number of White Blood Cells.
- Biopsy is a medical diagnostic technique using cells and tissues.
- In which country were antibiotics first used: Egypt - used mouldy bread
- If you suffer from epistaxis what is wrong: Nosebleed

- Deficiency of Vitamin C causes a disease of... Teeth
- Louis Pasteur is called "Father of the Modern Medicine".
- If you has caries who would you consult Dentist - its tooth decay
- Which of the following is not an attribute of bacterium? Ability to arise from non-living matter
- The comma bacillus causes what disease: Cholera
- If you have Chlorosis what colour does the skin go: Green
- What is the oldest most widely used drug on earth: Alcohol
- What medication discovered in 1928 but introduced 1940: Penicillin
- Flies and humans can both get which condition-Athletes Foot
- Agraphia means inability to write.
- St. Vitus's dance is a disease.
- Kleptomania is an irrational urge to steal.
- After drinking contaminated water you would be most apt to develop symptoms of 'typhoid fever'.
- Otalgia is what condition-Earache
- If a doctor gave you an Ishihara test what is he testing-for Colour blindness.

ANIMALS, PLANTS & INSECTS

- Earth worm is bi-sexual
- Euspongia is known as natural bath sponge.
- Live Fluke, biologically called Fasciola, is found in liver of sheep.
- Eyes of insects are compound.
- Plants growing in extremely dry condition are called Xerophytes.
- Roots absorb water from soil, which is Hygroscopic.
- Legumes increase the fertility of the soil by adding nitrogen to the soil.
- New varieties of organisms can be brought about by hybridization.
- Seeds are developed from Ovule.
- Parthenocarpic fruits are seedless fruits.
- Grains swell in water due to imbibitions.
- Chlorophyll contains magnesium.
- Starfish is not a starfish but a spiny-skin (Echinodermata) marine animal.
- Plants store their food in the form of starch.
- Unlike most other fish, sharks have no:
- It is now believed that dinosaurs became extinct because of:
- The platypus and the echidna are the only mammals that Lay eggs
- Lady bird is an insect
- Rust of wheat is a disease caused by Fungi
- Silk is obtained from cocoon of silk worm
- Python Plankton are poisonous plants
- Insects have lived on earth about 4,000,000 years
- Slowest creature on earth is Conch-Shell (shellfish snail)
- Star fish is not a star fish but a spiny-skin (Echinodermata) marine animal.
- Koala bear is the only animal who doesn't drink water
- A rat can last longer without water than a camel
- Loudest animal is Blue whales

- Peacock is found in 3 colors
- Cockroach is considered ancient insect of world
- Daffodils flower resembles a human eye
- Giant squid is the largest invertebrate
- Angora wool is got from a special variety of rabbit
- Sailfish is the largest fish
- Distance covered by tortoise is 4.6 meter in a minute
- Aristotle was the first to classify animals into groups
- Eucalyptus is now considered as environmental hazard
- Light energy is stored in the form of chemical energy due to the activity of Chloroplast.
- Wood is used in manufacturing paper
- In cryptograms, the sex organs are primitive and hidden.
- Thallophyta include algae, fungi, and lichens.
- Carl Linneus is famous for binomial system of nomenclature.
- Angiosperm includes the plants, which have covered flowers and covered flowers and covered seed.
- Plant cells resembles animal cell because having a cell membrane made up of protoplasm.
- The king cobra is the only snake who build nest.
- The black Mamba is the fastest snake.
- Snake have been evolved from lizard.
- Fertilization is fusion of two gametes of different strains.
- Fruit developed from single ovary is called simple fruit.
- Seeds are developed from Ovule.
- Parthenocarpic fruits are seedless fruits.
- Commercial cork is obtained from Quercus.
- Grains swell in water due to imbibitions.
- Chlorophyll contains magnesium.
- The rate of transpiration depends upon frequency of Stomata.
- Light is necessary for photosynthesis because it produce ATP and reducing substance.
- Oxygen liberated from photosynthesis comes from water.
- Red light is most suitable for photosynthesis.
- Respiration means food oxidation and evolution of energy.
- Chemical presentation of dead organism in liquid is called Cryo-Biology.
- The organisms which are the only living membrane of their group and link two major groups are called Living Fossil
- Red color of tomatos is imparted by Darotionoid
- Amphibians were the first vertebrata
- There are three stages of frog = egg, tadpole, and adult frog
- There are three groups of amhibians = salamanders (slow moving animals), frogs and toads, caecilians (who look more worm than amphibians)
- Lonrad Lorenz (1903-1989) was the first to study animal behaviour
- Animals survive very cold weather or very dry weather by going into a deep sleep it is called hibernation and sleeping trough hot day condition is called aestivation
- Blue signed octopus very lethal and can kill 10 people it feeds on crabs
- Cheetah is the fastest land animal. It can accelerate from 0-90 km/h in 3 seconds and can run at 100 km/h but has to rest after 20 seconds
- Sponge, beetle, snail, Jelly fish, insects and starfish are cold-blooded animals

- Shark is a cold blooded animal
- Newts (wall lizard) and frog are cold blooded animals
- Lizards, crocodiles, snakes, turtles and tortoises are cold blooded animals
- Invertebrates have 33 groups, fish have 2 groups, amphibians have 3 groups, reptiles have 3 groups, birds have 28-30 groups and mammals have 21 groups
- Over 90% of animals are invertebrates
- Hard shell of animals is called exoskeleton
- 105 million different species of animals have been identified
- Plants growing in extremely dry condition are called Xerophytes.
- Roots absorb water from soil, which is Hygroscopic.
- Legumes increase the fertility of the soil by adding nitrogen to the soil.
- Hominoids are Humans + chimpanzees + orangutans + Gorillas
- Felidae means from cat family
- Panthera means big cats
- There are 5 kingdoms in animal kingdom
- Birds are warm blooded
- Birds' bones are hollow
- Oven birds build strong nests
- Weaver birds are those who build their nests.
- Male birds are more colorful than female birds
- Birds that cannot fly are penguins, emus, kiwis and ostriches
- In cryptograms, the sex organs are primitive and hidden.
- Thallophyta include algae, fungi, and lichens.
- Carl Linneus is famous for binomial system of nomenclature.
- Angiosperm includes the plants, which have covered flowers and covered flowers and covered seed.
- Plant cells resembles animal cell because having a cell membrane made up of protoplasm.
- Smell is the weakest sense in Birds.
- Owl can rotate his head to 180 degrees on either side.
- Ostrich eat pebbles for helping digestion by grinding up the ingested food.
- The cuckoo sneaks its eggs into other birds' nest to hatch.
- Earthworm is a bi-sexual.
- Eyes of insects are compound.
- Dolphins have 700 times more rods in their eyes than humans, which help them to see in dim light under water.
- A fly's compound eye has 400 individual tubes.
- Plants in which seed are outside the fruit are called Gymnosperms.
- Pollen is produced in a part of the flower called the Calyx.
- Squids are the fastest swimming invertebrates or animals without backbone.
- 99% of all animals are invertebrates.
- The sailfish can swim at 110 km/hour. It the fastest fish.
- Fishes have a bag of gas called a swim bladder inside their bodies that helps them float and sink.
- Fishes like sharks and rays have skeletons made of tough cartilage and they don't have a swim bladder.
- Fungi are neither plants nor animals they are classified in their own separate kingdom.
- The cell wall of fungi is made of chitin, the material from which insects make their hard outer skeletons.
- Unlike other green plants fungi cannot use the sun's energy to make food; instead they absorb their food from other living or dead remains of living things.
- Fungi break down dead and decaying materials so that they can be recycled.
- Fungal infections destroy crops and cause diseases like athlete's foot and ringworm.
- Plants make carbohydrates from carbon dioxide and water and we get carbohydrates from plants
- Silk is one of two main fibres we get from animals. The wool from sheep is the other.
- Cotton is the most important plant fibre. It produces fibres in the seedpod or boll.
- Linen is another plant fiber make from flax plant.
- Dinosaurs lived in Mesozoic era.
- Eagle's eyes have five times more light sensitive cells than ours.
- Eucalyptus trees grow faster than any other trees.
- Three groups of Amphibians
 - Salamanders – slow moving animals. Frog and toads.
 - Caecilians - look more worms than amphibians.
- Blue signed octopus is very lethal, can kill 10 people, it feeds on crabs.
- Cheetah is the fastest land animal, can accelerate from 0-90 km/h in just three seconds and can run at 100 km/h. But he has to rest after about 20 seconds.
- Sponge, beetle, snails, jellyfish, insects and starfish are cold-blooded animals.
- Shark is a cold-blooded animal.
- Newts, and frog are cold-blooded animals.
- Lizard, crocodiles, snakes, turtles and tortoises are cold-blooded animals.
- Invertebrates have 33 groups.
- Fish 3
- Amphibians 3
- Reptile 3
- Birds 28-30
- Mammals 21
- Over 90% of animals are invertebrates.
- Hard Shell of animals is called -> Exoskeleton.
- 105 million different species of animals have been identified.
- Hominoids – Human + Champanzees + Orangutans + Gorillas.
- Felidae ----: from cat family.
- Panthera ----- big cat
- Kestrel is a kind of Eagle.
- Vole is a kind of mouse
- Orca (Killer Whale)
- Word dinosaur means "terrible" Lizard.
- Euspongia is known as natural bath sponge.
- Live Fluke, biologically called Fasciola, is found in liver of sheep.
- Earthworm is a bi-sexual.
- Eyes of insects are compound.
- Silk is obtained from cocoon of silkworm.
- The brown colour of rust is because of : oxidation
- Granite is a form of – rock:

- Cellulose -- is the main chemical substance in the plant cell wall:
- The desert mammal which does not drink water: Knagaroo Rat
- The loudest sound produced by any animal is 188 decibels. The animal is the African Elephant
- The primary plant body consists of 3 tissue systems.
- The total weight of a cell in a leaf or a petal, water constitutes about 90%.
- A tissue is a group of cells having similar structure and function.
- The three elements needed for healthy growth of plants are: N, P, K
- What colour is Octopus blood: Blue
- What is the only bird that can smell: Emus
- The eyes of which animal have rectangular pupils-Goat
- What animal's eye is larger than its brain-Ostrich
- What fish can blink its eyes -Shark
- Where are a crickets ears located- Front legs
- Which animal sleeps with one eye open-Dolphin
- Vole is a kind of mouse
- Kestrel is a kind of eagle
- Killer whale is Orca
- Corn adds more oxygen to the atmosphere than it removes.
- Euspongia is known as natural bath sponge.
- Live Fluke, biologically called Fasciola, is found in liver of sheep.
- Banana plant is shrub
- Rubber is obtained from latex
- Tobacco contains Nicotine
- Kharif crops are sown in Summer season
- Pesticides kill insects that attack crops
- Herbicides kill weeds
- Seedless Fruits are formed by parthenogenesis.
- Cotton fiber is routed from seed.
- Horticulture is the cultivation of fruit crops.
- Late blight is a disease of potato and tomato plants.
- The fertility of soil can be increased by growing legumes.
- Olive trees and Cork oak grow in the regions having the Mediterranean type of climate.
- Coniferous forests are found in a region having low mean temperature and a long cold winter.
- In the Northern Hemisphere, the geographical belt of coniferous forest south of Tundra is called Steppe.
- Silverfish is a wingless insect.
- Guinea pig is a stocky tailless rodent used in experimental work.
- What kind of animal is a lurcher: Dog
- With which organ does a snake hear: Tongue
- What fish can hold objects in its tail: Sea Horse
- The leech has 32 what - humans only got one-Brains
- The primary producers of organic matter in nature are Green plants.
- The edible portion of mango is Mesocarp.
- The rice grain is a seed.
- Bamboo is Grass.
- Cork cells are impervious to water because of the presence of Suberin.
- The biotic relationship between insects and plants with reference to pollination is called Mutualism.
- Historically, Joseph Priestley recognized in 1727 A.D. that sunlight and air are important for the growth of plants.
- Carbon dioxide is required during photosynthesis process in addition to sunlight and water.
- Man is Homoeothermic.
- The compound eye of insect produces Mosaic vision.
- The postembryonic stages in the life history of cockroach are known as Nymphs.
- Amphibians were the first vertebrates.
- There are three stages of frog. Egg-tadpole-adult frog.
- Smell is the weakest sense in Birds.
- Owl can rotate his head to 180 degrees on either sides.
- Ostrich eat pebbles for helping digestion by grinding up the ingested food.
- The cuckoo sneaks its eggs into other birds' nest to hatch.
- Birds are warm-blooded animals.
- Birds' bones are hollow.
- Ovenbirds build strong nests.
- Weaverbirds are called the birds that build their nests.
- Male birds are more colorful than females.
- Birds do not fly are penguins, emus, kiwis, ostriches.
- Thallophyta include algae, fungi, and lichens.
- Angiosperm includes the plants, which have covered flowers and covered seed.
- Plant cells resembles animal cell because having a cell membrane made up of protoplasm.
- Snake have been evolved from lizard.
- Plants in which seed are outside the fruit are called Gymnosperms.
- Linseed oil is used while oil painting.
- In cryptograms, the sex organs are primitive and hidden.
- The rate of transpiration depends upon frequency of Stomata.
- Light is necessary for photosynthesis because it produce ATP and reducing substance.
- Oxygen liberated from photosynthesis comes from water.
- Red light is most suitable for photosynthesis.
- Respiration means food oxidation and evolution of energy.
- The organisms, which are the only living membrane of their group and link two major groups, are called Living Fossil.
- Mammals cannot be cold blooded.
- Trypanosome a parasite causing sleeping sickness.
- Chief food of mosquito larva is microorganism found in water.
- Chief food of butterfly larva is leaves of plants.
- Corn adds more oxygen to the atmosphere than it removes.
- Fruit developed from single ovary is called simple fruit.
- Pollen is produced in a part of the flower called the Calyx.
- Edible part of tomato is whole fruit.
- The primary producers of organic matter in nature are Green plants.
- Historically, Joseph Priestley recognized in 1727 A.D. that sunlight and air are important for the growth of plants.
- Carbon dioxide is required during photosynthesis process in addition to sunlight and water.
- The compound eye of insect produces Mosaic vision.

- The postembryonic stages in the life history of cockroach are known as Nymphs.
- In the animal kingdom what creatures are in the order—
Chiroptera- Bats
- 90% of bird species are what Monogamous
- Kangaroos and Emus can't do what-Walk backwards
- **Aleuronic layer:** is that part of the grain in cereals where much of the protein lies.

VARIOUS PROCESSES

- Chemical union of two or more molecules of the compound to form larger molecules is called Polymerization.
- The process by which plants take food is photosynthesis
- Reduction is the removal of oxygen atoms
- Oxidation is the combination of oxygen or removal of hydrogen
- Horticulture is the cultivation of flowers, fruits and vegetable
- Pasteurization is the protection of food by heating
- Method of preparation of varnish was discovered by Jabir bin Hayaan
- If temperature rises gradually up to 40 deg: C, the rate of photosynthesis may stop altogether.

VITAMINS

- Deficiency of vitamin A causes dryness of skin and night blindness
- Skin food is Vitamin C
- Vitamin C is also called Ascorbic Acid it prevents scurvy
- Vitamin C is also necessary for utilization of iron
- The food which contains largest amount of Vitamin C is tomato
- Cod liver oil contains Vitamin D
- Collagen is the substance that gives elasticity to skin
- Vitamin E promotes oxygenation and acts as anti aging
- Carbon dioxide we release comes from food we eat
- Vitamin B2 has what other name Riboflavin
- Fats are made of carbon, hydrogen and oxygen
- Vitamin E is called anti-aging agent
- Vitamin E helps in fertility process
- Vitamin B helps maintain normal appetite and good digestion
- Protein found in milk is Casein, in beans is Legumes, in meat is myosin and in eggs is albumin
- Water soluble vitamin are B and C and all other are fat soluble
- Vitamin A is stored as Ester in liver
- Vitamin A is found in carotene bearing plants
- Vitamin K helps to form prothrombin (fibrinogen) one of the enzymes helpful in blood clotting
- Vitamin E is necessary for iron utilization; normal reproductive function. Vitamin E is for reproduction.

- Vitamin A is found in Dairy products
- Deficiency of Vitamin A causes Night blindness.
- Too much presence of the Potassium salt in human blood increase the risk of heart attack.
- The lack of calcium in the diet causes what condition-Rickets
- Celluloses are carbohydrates.
- Milk contains lactose.
- Vitamin C is a preventor of infectious disease
- Vitamin C is also called Skin food
- Vitamin C can easily be lost in cooking and food storage
- Vitamin D is essential for calcium metabolism.
- Vitamin C hastens healing of wounds
- Vitamin capable of formation of blood is B12
- Riches source of Vitamin D is cod liver oil
- Riches source of Vitamin A is eggs
- Deficiency of Calcium leads to rickets
- Vitamin B1 is available in yeast.
- Scurvy, arising due to deficiency of vitamin C, it is related to Gastro-intestinal disorder.
- Sodium is necessary of nervous system.
- Vitamin D is essential for calcium metabolism.
- Cheese contains vitamin D.
- Vitamin C cannot be stored in human body.
- Scurvy, arising due to deficiency of vitamin C, it is related to Gastro-intestinal disorder.
- Sodium is necessary of nervous system.
- Ground nut has maximum protein
- Digestion of fat in intestine is aided by Emulsification
- Hair, finger nails, hoofs, etc are all made of protein
- Deficiency of sodium and potassium causes muscular cramps, headache and diarrhoea
- Milk contains 80% water
- Milk is a complete food.
- Cheese contains vitamin D.
- Vitamin E is for reproduction.
- Deficiency of Thiamine causes Beri Beri.
- Glucose is the source of energy for human brain.
- Major component of honey is Glucose
- Three main food nutrients are carbohydrates, protein and fats. Other are vitamins and minerals
- Meat is rich in iron we need to make blood cells
- Eating of coconut increases man's mental faculties
- Food poisoning can result from the eating of too much foodstuffs.
- Vitamin C is also known as Ascorbic Acid.
- Celluloses are carbohydrates.
- Milk contains lactose
- Ascorbic acid is essential for the formation of bones and teeth.
- Citric acid is a good substitution for ascorbic acid in our nutrition.
- A guava contains more vitamin C than an orange
- Vitamin C is not stored in human body

SCIENTISTS

- Ibn al-Baitar was a Botanist
- Kitab al-Manazar on optical works was written by Ibn al-Haitham

- Mamoon observatory was established during the reign of Caliph Mamoon
- Circulation of blood was described by a Muslim scientist name Nafis Abdul al-Hasan.
- Al-Khwarizimi was first person who used zero.
- Muslim scientist Ali al Tabari is famous for his work on ____ (medical sciences)
- Al Beruni discovered that light travels faster than sound.

NOBLE PRIZE

- Astronomers cannot be nominated for noble prize
- Marie curie twice won Noble Prize.
- First Nobel Prizes were awarded on 10 Dec: 1901.
- What country awards the Nobel peace prize- Norway
- Who won the Nobel Peace Prize in 1972-Nobody
- Who refused the Nobel Literature prize in 1958-Boris Pasternak
- Who was the first American to receive the Nobel Literature prize Sinclair Lewis
- Which Nobel Prize is not awarded annually in Stockholm Peace
- Mother Teresa was awarded Nobel Prize in the field of peace.
- *The New York Times* received five Pulitzer prizes of 2009 for investigative, breaking news and international reporting, feature photography and criticism.
- A noted Indian wildlife biologist, Dr M.D. Madhusudan, Director of Nature Conservation Foundation
- Four persons have been awarded Nobel Prize twice.
- Van't Hoff was the first Nobel Laureate in Chemistry.
- Wole Soyinka is a Nobel Prize winner for literature. He is from Nigeria.
- Which field did Alfred Nobel not include originally... Economics
- Person getting the Nobel peace prize in 2008 was of the country. Finland
- Alfred Nobel was born in Stockholm, Sweden, more than 150 years ago. In what year was he born? Alfred Nobel was born in 1833
- What did Alfred's father, Immanuel, do for a living? Alfred's father was an engineer and inventor.
- Alfred Nobel never married.
- A future Nobel Laureate worked for a short period of time as Alfred Nobel's secretary. Who? Bertha von Suttner
- Alfred Nobel died on 10 December 1896, but not in Sweden, his home country. Where did he die? Alfred Nobel died in San Remo, Italy.
- Why did Alfred Nobel establish a prize in his will? Alfred Nobel wanted to award the greatest benefits to mankind.
- Which Nobel category does not yet have a single female laureate? *Economics*
- Who won the first Nobel Prize in Physics? *Roentgen*.
- Which single winner won the most number of Nobel Prizes? *International Committee of the Red Cross*.
- Who was the first non-European to win the Nobel Prize in Literature? *Rabindranath Tagore*
- *Mathematics* is not a valid Nobel Prize category.
- In what year did the most people decline their Nobel Prize? 1939

- Who was the only person to win the Nobel Prize twice -- in Peace and Chemistry? *Linus Pauling*
 - Who was the only person to win the Nobel Prize twice -- in both Physics and Chemistry? *Marie Curie*
 - Name the six categories for which the prizes are awarded. Physics, Chemistry, Physiology or Medicine, Literature, Peace and Economics.
 - For which category was a Nobel Prize given starting 1969? Economics.
 - Who awards the Peace Prize? The Norwegian Nobel Committee.
 - Max Planck received the noble prize in Physics in 1918 for his discovery of: energy quanta
 - Climate change campaigner Al Gore and the UN's Intergovernmental Panel on Climate Change have been jointly awarded the Nobel Peace Prize.
 - Rabindra Nath Tagore was the first Indian/South Asian to win Nobel Prize. (Literature in 1931).
 - Former US Vice-President Al Gore has won Noble Peace Prize 2007 for his campaign against Global Warming.
 - The first negro to be awarded the Nobel Peace Prize was Ralph Johnson Bunche
- Rabindarnath Tagore won first Nobel Prize from South Asia.

CHEMICALS, METALS, ACIDS AND GASES

- Substance which changes readily into vapor upon heating is called volatile
- Selenium is a non metal
- Most elastic among carbon, rubber, glass and paper is glass
- Quartz is chemically silicon dioxide
- Highest electrical conductivity is of Silver
- Vinegar contains Acetic Acid.
- Lightest element found in nature is hydrogen
- Heaviest atom is uranium with atomic weight 92 amu
- Molasses is a by-product of sugar industry.
- Formic Acid is used in dyeing, tanning and electroplating.
- Which gas discovered in 1898 has a name meaning new Neon.
- The metal known as quick silver: Mercury
- Ethylene is a gas concerned with Ripening of fruits.
- Opium is obtained from seed capsule of opium poppy.
- Dry Ice is solid Carbon dioxide
- The most common element in the universe is Nitrogen.
- Geologists have classified nearly 3000 minerals.
- Igneous rocks are solidified form of molten magma.
- Sedimentary rocks are formed by the deposition of sediments in water.
- Metamorphic rocks are the rocks transformed by the action of intense heat or great pressure or chemical activity.
- Shale is a metamorphic rock.
- Sedimentary rocks cover about 75% of world's land area.
- Moon rocks collected by astronauts are igneous in type.

ORES

- Ore of Aluminum is Bauxite
- Pyrolusite is an ore of manganese

- Myrolusite is an ore of Manganese.
- Ore of Gold is Native Gold
- Argentite is an ore of silver
- Magnetite and hematite are iron ores.
- The important ore of Chromium is Chromite
- Bauxite is an ore of aluminum. It contains mineral alumina, or aluminum oxide.
- Diaspore, Felspar, Alurite, Zibcrite, and Bauxite are the ores of Aluminum.
- Malachite is an ore of Copper
- Radium is extracted from an ore called Pitch Blonde
- Which element is extracted from the ore Sphalerite-Zinc
- Saccharine is obtained from coal tar
- What is extracted from the ore cinnabar-Mercury
- What is extracted from the ore caserite-Tin
- Aqua Regia is the mixture of Nitric Acid and HCL in 1:3.

ALLOYS

- Bronze is the mixture of Copper and tin.
- Brass is an alloy of Copper and Zinc
- Bronze is an alloy of copper and Tin
- Stainless steel is an alloy of carbon +Iron with Chromium and Nickel
- German silver is an alloy of copper with nickel and zinc
- Solder is an alloy of lead and tin
- Dental amalgam = mercury +silver, Tin, Zinc, Copper
- Duralumin = aluminium + copper + magnesium
- Pewter is an ancient alloy made of tin and lead
- Aluminum is used mostly in aircrafts
- Camphor exhibits the property of sublimation.
- The alloy which consists of copper and tin.Bronze
- Excessive use of fertilizers causes death of pants due to exomosis.
- Stainless steel => Carbon + Iron + Chromium + Nickel.
- Bronze does not rust.
- Dental Amalgam => mercury + Silver, Tin, Zinc, Copper.
- Duralumin => aluminum+Copper+magnesium.
- Brass => Copper + Zinc.
- Pewter => an ancient alloy made up to tin and lead.
- Aluminum is used mostly in aircrafts.
- Australia has the largest bauxite deposits.
- Aluminum metal is obtained from alumina by electrolysis – passing electricity through it. Charles Hall in the USA and Paul Heroult in France discovered this process independently in 1886.
- Asbestos does not burn and it is a mineral fiber
- Amalgam is a mixture of metal and mercury
- Nickel is used as a catalyst while manufacturing ghee
- After persistent decay, radium would be finally changed into Lead.
- Mercury is a liquid with greatest density
- Noble metal are non-reactive metals example Gold, Silver and Platinum
- Mica is an excellent insulator
- Purest form of iron is wrought iron
- Cast iron has highest carbon content

- Sodium, potassium and magnesium are reactive metals
- Sodium burns in water not in kerosene
- Conductivity level: 1) silver, 2) copper, 3) aluminum, 4) iron
- PVC = Ployvenyl Chloride
- First synthetic materials was Celluloid in 1868
- Second synthetic material by Bakelite invented by Leo Hendricks Backland
- Largely limestone is used in the production of cement
- Granite can be found in igneous rocks.
- Coal and petroleum are found in Sedimentary rocks
- Gold and copper are mostly found in old Igneous rocks
- Magnesium is abundant in sea
- Sources of uranium in Pakistan is Dera Ghazi Khan
- What type of acid is used in car batteries Sulphuric
- Copper can be converted into gold by: Artificial radioactivity
- Tungsten has the highest melting point = 3410 deg: C
- The coil used in a heater is made of Nichron

CHEMICAL FORMULAE

- Common Salt is NaCl = sodium chloride
- Chun is Ca (OH) 2 = calcium hydroxide
- Washing soda = Na₂CO₃= sodium carbonate
- Baking soda = NaHCO₃ = sodium bicarbonate
- Chalk = CaCO₃ = calcium carbonate
- Plaster of Paris = CaSO₄.1/2 H₂O
- Gypsum salt is CaSo₄ + 2H₂O.
- Cholestrol = C₂₇ H₄₆O
- Carbohydrates = C+O+H
- Protein = C+Nitrogen + O+H
- C₂ H₅ OH is the formula of Alcohol.
- H₁₄ N₂ is a poisonous alkaloid consumed daily by millions what-Nicotine
- What element was named after the Greek word for green-Chlorine
- What elements name comes from the Greek for light bearing-Phosphorous
- Alphabetically what is the first element in the periodic table-Actinium
- What elements name comes from the Greek word for violet-Iodine
- Mercury is also known as Quick Silver
- Coal is also known as Black Diamond
- The lightest known metal is Lithium
- The oil used to preserve timber is Creosote oil
- Limestone is predominantly used raw material in the production of cement.
- An element found in all organic compounds is carbon
- Most commonly used bleaching agent is chlorine
- Lime is sometimes applied to soil in order to increase the alkalinity of the soil
- Podsols are Acidic soils
- Source of plaster of Paris is gypsum
- Chemical name of plaster of Paris is Hemihydrates
- Naturally occurring elements are 92
- Total elements are 109
- Alkaline soil is treated with gypsum

- Marble is metamorphic rock
- Limestone is sedimentary rock
- Limestone transforms into marble
- Thorium is both magnetic and radioactive
- Finest quality of pottery is porcelain. It is made from the purest white clay such as kaolin also called China clay and heated at 1400 deg: C
- Bone china is an imitation porcelain made using clay mixed with bone ash
- Mud bricks are called adobe
- Materials that resist high temperatures are known as refractories
- Refractories contain tungsten, the metal with highest melting point (3410 deg: C).
- Some refractories contain tungsten carbide which is used to make cutting tools that remain sharp even when they get red hot
- Tungsten and titanium carbides are mixed with ceramics to form cermet which are used in high temperature parts of jet and rocket engines
- Cement is a ceramic product made of finely heating (1500 deg: C) earthly material like limestone and clay
- Concrete is strong under compression but weak if stretched (tension). For this engineers cast steel rods into the concrete. This is called reinforced concrete.
- Ceramic is made by heating and mixing together the ceramic material boron carbide and aluminium. It is lighter than aluminum and stronger than steel
- Sodium carbonate is used in making glass and in caustic soda for making soap
- Sulphuric acid is also known as "lifeblood of industry"
- Oxidation is addition of oxygen to the substance
- Hydrogenation is adding hydrogen
- Hydrogen is the commonest element in the universe.
- Hydrogen is a powerful fuel. The main engines of the space shuttle are powered by hydrogen.
- Hydrogen is used in fertilizers, margarine and plastics.
- Selenium is non-metal substance.
- 'Ion exchange' is the method to remove the temporary or permanent hardness of water.
- Molasses (Gur) are a by-product of sugar industry.
- Polymerization is the reaction by which plastics are made. It involves linking together of small molecules (monomers) to form large ones (polymers)
- Halogens mean salt like. It is a group of highly reactive nonmetals that are poisonous in their pure forms. Other halogens are fluorine, bromine, iodine, and astatine.
- Salt is one of the halogens
- Halogen light bulbs used in cars' headlamps (usually iodine or bromine) surrounding the light filament. Halogen bulbs are brighter and last longer than ordinary light bulbs.
- Fluoride compounds in toothpaste and drinking water help to prevent tooth decay.
- Chlorine reacts with other elements and form PVC, a plastic for pipes and waterproof fabrics.
- Iodine sublimates at room temperature (i.e turns directly into a gas)
- Chlorine is used in swimming pools to kill germs.
- Palladium metal is used in air craft
- Liquid sodium is used a coolant in nuclear reactor
- Plutonium-239 is a good nuclear fuel
- Aviation fuel for jet aeroplanes consists of purified kerosene
- CO₂ is used in fire extinguishers
- Cooking gas is oxygen+methane
- Hydrogen has the highest fuel value
- Ripening of fruits is hastened by Ethylene gas
- Iron rusts due to formation of a mixture of ferrous and ferric hydroxide
- Chemically soap is a salt
- Dalton's atomic theory gave the concept of Valency
- When radioactive rays are passed through air or any gas, they cause it to ionize
- Formic acid is present in sour milk
- Butane gas is used in cigarette lighters
- LPG contains Butane and propane
- In soft drinks CO₂ is used
- Rust stains on cloth is removed by Oxalic Acid solution
- Acid in lemon and grape fruit is Citric Acid
- Permanent magnets are made from Ferromagnetic substances
- Melting point of Tungsten is 3000 deg: C
- Mercury is used as a solvent in refining silver
- Selenium is non-metal substance.
- Aqua Regia is the mixture of Nitric Acid and HCl in 1:3.
- Sodium Benzoate is used to preserve food articles.
- Gas used for purification of water is chlorine
- Formic Acid is used in dyeing, tanning and electroplating.
- In galvanization iron sheet is coated with Zinc
- Mahalanobis model laid great emphasis on development of heavy industries.
- Oxidation is the process in which electron is lost.
- Camphor exhibits the property of sublimation.
- Gypsum salt is CaSO₄ + 2H₂O.
- Excessive use of fertilizers causes death of plants due to exomosis.
- Sodium Benzoate is used to preserve food articles.
- Bee stings contain formic acid
- BHC Benzene Hexachloride is used for killing for insects.
- Opposite of acid is alkali
- Pure water has pH of 7
- pH scale ranges from 0-14
- Cola drinks contain phosphoric acid to give them flavor
- People used to treat bee stings by rubbing them with bicarbonate of soda
- Acid contains hydrogen and react with metals such as iron and zinc, they give off hydrogen
- Acid turns litmus paper red
- Alkali turns litmus paper blue
- Alkalis are part of a group of chemicals called bases.
- Alkalis are bases that dissolve in water, have bitter taste and feel soapy
- When an acid meets an alkali both are changed- they are neutralized.
- When acid meets alkali salt and water is produced
- Stomach produces hydrochloric acid

- Strong acids like sulphuric acid is used in factories to make fertilizers, explosives, plastics, synthetic fabrics, paints, dyes, medicines, detergents and other chemicals
- Example of strong alkali is Sodium Hydroxide (caustic soda)
- Sodium hydroxide solution dissolves fats and used to clean oven and drain blocked cleaners
- In industry alkalis are used in the manufacture of soap, glass, paper and textile and in the refining of crude oil
- Aluminum metal is obtained from alumina by electrolysis. This process was discovered by Charles Hall of US in 1886 and Paul Heroult in France
- Use of Boron and Zink can improve cotton yield
- 'Ion exchange' is the method to remove the temporary or permanent hardness of water.
- An example of inorganic compound is carbon monoxide
- Shoot is an example of amorphous carbon
- Different forms of same elements are called allotropes
- Diamond is allotropic form of carbon
- Graphite is used to hold molten metals
- Charcoad is used in gas masks for absorbing unpleasant smells
- Fullerenes are the most recently discovered allotropes
- The main ingredient in glass making is sand, the mineral is silical.
- The ordinary glass used for bottles and windows is known as soda lime glass as it is made by using soda ash and limestone.
- Adding lead oxide in glass making recipe makes crystal glass which has extra brilliance and sparkles like a diamond.
- Glass with a very high lead content is made for the nuclear industry because it blocks harmful radiations.
- Boron is added to glass making recipe to protect glass from expanding and cracking when heated.
- Borosilicate glass is used to make heat resistant cookware and laboratory equipments.
- Glues comes from animals by boiling bones and skin of cattle and fish bones
- Gums come from the sticky resins make by certain plants.
- Most adhesives used today are synthetic and are usually made from petroleum chemicals.
- Among the strongest adhesives are the epoxy resins
- Gold is the most malleable metal of all.
- Silver is used today in photography because many silver salts darken when they are exposed to light.
- Platinum is used in industry as a catalyst.
- Rubies and sapphires are made mostly of a material called alumina, but rubies are red becuase they contain tiny amount of chromium and sapphires are usully blue as these cotain tiny amounts of iron
- Driest deserts on earth are the cold, dry valley of Antarctica
- Detergents are synthetic products made from petroleum chemicals
- Heating fat or oil with alkali like caustic soda makes soap. A product we get from making of soap is glycerine, which is used in making plastics and explosives.
- Pure iron is quite a weak metal but if carbon is added to it, it becomes both strong and hard
- Iron bricks are called steel ingot
- Iron is not found in metal form but extracted from iron ore by smelting ie heating at high temp:
- 90 elements exist naturally and 25 artificially
- At room temperature most elements are solids but a number are gases like oxygen, hydrogen, nitrogen, helium and neon and only two are liquids like mercury and bromine.
- Gold rarely combine with other metals and fluorine is highly reactive
- Diamond and graphite are allotropes of carbon
- Hjeating coal without air produce coke which is used to make steel
- Bitumen (damber) is used for surfacing roads comes from coal
- Isotopes are same chemicals but with different physical properties
- Aircrafts are made of aluminum alloys.
- Chemical used in bettery cells is electrolyte
- Sulphuric acid is used in batteries as electrolyte
- In alkaIn battery Anode = Zinc powder mixed with electrolyte and Cathode = manganese compound mixed with electrolyte
- Anode = negative terminal and Cathode = positive terminal
- Votalic Pile was the first battery made in 1799
- Fuel cells make electricity using hydrogen as a fuel
- Almost all explosives contain nitrogen. Nitrogen compound Ammonia is the starting point of several explosives.
- Calcium is a metal found in chalk, limestone and marble in the form of Calcium Carbonate
- Beryllium is used to make cutting tools where it is important to avoid spark
- Minerals containing beryllium don't show up on x-rays, and are used for the windows of x-ray machines
- Magnesium is present in chlorophyll
- Sulphur dioxide is not an odorless gas
- Glass is soluble in Aqua Reggie
- Fuel in an automobile is a mixture of saturated and unsaturated hydrocarbons
- Power of alcohol is methyl and petrol
- Lead is used in batteries
- The odour of garlic is due to a Sulphuric compound
- Cabbage contains sulphur
- The strongest known acid is an 80% solution of antimony pentafluoride in hydrofluoriv acid.
- Saffron is used to color fabrics. Cochineal red is a dye extracted from insects.
- Crude oil and natural gas are made mostly from hydrocarbons. When they burn CO₂ is released into atmosphere
- Synthetic fibers are mostly plastics make from petroleum chemicals.
- Lime is sometimes applied to soil in order to increase the alkalinity of the soil
- BHCC Benzene Hex chloride is used for killing for insects.
- Opposite of acit is alkali.
- Pure water has 7 P.H.
- Cola drinks contain phosphoric acid to give them flavor.
- Bee stings contain formic acid.
- People used to treat bee stings by rubbing them with bicarbonate of soda.
- Acid contains Hydrogen and reacts with metals such as iron and zinc, they give off Hydrogen.
- Acid turns litmus paper red.

- Alkalis are part of a group of chemicals called bases. Alkalis are bases that dissolve in water, have bitter taste and feel soapy.
- Alkali turns litmus paper blue.
- Stomach produces hydrochloric acid
- Baking powder => Bicarbonate of Soda -> an alkali
- Strong acids like sulphuric acid used in factories to make fertilizers, explosive, plastics, synthetic fabrics, paint, dyes, medicines, detergents, and many other chemicals.
- Strong alkalis => Sodium Hydroxide (Caustic Soda).
- Sodium Hydroxide solution dissolves fats used as oven and drain blocked cleaners.
- In industry, alkalis are used in the manufacture of soap, glass, paper and textile, and in the refining of crude oil.
- Chemical in cell of battery is called electrolyte.
- Lead metals are used in batteries.
- A personal stereo used alkaline battery. In this the electrodes are powders, mixed with an electrolyte to make a paste.
- Sulphuric acid is used in batteries as electrolyte.
- In alkaline battery:-
 - Anode = Zinc powder mixed with electrolyte.
 - Cathode = Manganese compound mixed with electrolyte.
- Anode = Negative Terminal
- + Cathode = Positive Terminal
- Voltaic pile was the first battery in 1799.
- Fuel cells make electricity using hydrogen as a fuel.
- Carbon is the element of life.
- Graphite is an example of amorphous carbon.
- Different form of the same element is called allotropes.
- Diamond is an allotropic form of carbon.
- Graphite is used to hold molten metals.
- Charcoal is used in gas masks for absorbing unpleasant smells.
- Fullerenes are the most recently discovered allotropes.
- Carbon dioxide we release comes from food we eat.
- Carbohydrates = $C + O + H$
- Protein = Nitrogen + O + H
- Chromatography shows what's in the colored coating of some sweets.
- Mass spectrography is one of the most powerful ways of analyzing different kinds of chemicals.
- Electrophoresis = > Separation of tagged core fragments of DNA with radioactivity.
- Sodium Carbonate is used in making glass and in caustic soda for making soap.
- Heavy Chemicals => Sodium Carbonate, Caustic Soda, Sulphuric Acid, Nitric Acid, Ammonia, Benzene.
- Sulphuric acid is also known as 'lifeblood of industry'
- Sulphuric acid is made from sulphur by contact process.
- Benzene is known as organic chemical.
- Oxidation -> addition of oxygen to the substance is made.
- Hydrogenation -> adding hydrogen.
- Polymerization is the reaction by which plastics are produced. It involves the linking together of small molecules (monomers) to form large ones (polymers).
- Cracking -> large molecules are broken down into small ones (used in refining petroleum).
- Halogens means salt like.
 - Chlorine combines with sodium to make salt (Sodium chloride). It is one of the halogens, a group of highly reactive nonmetals that are all poisonous in their pure forms.
 - Other halogens are Fluorine, Bromine, Iodine, and Astatine.
 - The halogen light bulbs used in cars headlamps have a halogen gas, usually iodine or bromine, surrounding the light filament. Halogen bulbs are brighter and last much longer than ordinary light bulbs.
 - Fluoride compounds in toothpaste and drinking water help to prevent tooth decay.
 - Chlorine reacts with lots of other elements to make some very useful compounds such as PVC, a plastic for pipes and waterproof fabrics.
 - CFC – Chlorofluoro carbons.
 - Iodine (turns straight into a gas) (Sublimes) at room temperature.
 - Chlorine is used in swimming pools to kill germs that are why swimmers use goggles.
 - Carbon has two isotopes.
 - Muons are particles of atom.
 - Isotopes have same chemical but different physical properties.
 - Ions => In an atom, the positive electrical charges of the protons are balanced by the negative electrical charges of the electron. The atom is therefore electrically neutral. However, if you add or take away one or more electrons from an atom, it becomes either negatively or positively charged, such charged particles are called ions.
 - The purest naturally occurring crystalline form of carbon: diamond
 - The mixture which can dissolve platinum: Aqua regia
 - Steel is more elastic than rubber
 - Marble is metamorphic rock.
 - Oil rises in a wick of oil lamp because of a property of matter, called capillary action
 - Mercury metal is 13.5 times heavier than water
 - Diamond is the purest naturally occurring crystalline form of Carbon
 - Caustic soda is extensively used for making Surf.
 - Charcoal Sulphur Saltpetre makes Gunpowder.
 - Argon comes from the Greek meaning lazy
 - Silver coins made from Copper and Nickel
 - Kallium is the old name for which element-Potassium
 - Coal is formed from the remains of forests that grew in the carboniferous period about 300 million years ago.
 - Half time is a time of radioactive substance taken by that substance to decompose radioactivity to half of its weight.
 - Calcium chloride is present in the common toothpastes as an abrasive.
 - Copper and tin make gunmetal.
 - Liquefied Petroleum Gas consists mainly of methane, butane and propane.
 - Magnesium is a metal extracted from the seawater.
 - Magnetite can be used for extraction of iron.
 - The main constituents of Pearl are calcium carbonate and magnesium carbonate.
 - Pollution in rivers is measured by the percentage of dissolved amount of Nitrogen.
 - Uranium is called White Coal.

- Lead and tin are used in solder.
- Caffeine, a constituent of tea and coffee is a diuretic.
- Citric Acid is used in soft drinks.
- A substance, which radiates light when heated to a high temperature, is said to be incandescent.
- Light waves are electromagnetic.
- If a solution of pH 6 is diluted by 100 times, the resulting solution would be Acidic.
- Acid rain is caused due to emission of oxides of nitrogen and sulphur.
- Hydrogen iodide is used for writing on glass.
- Infrared radiation has the longest wavelength.
- Stainless steel cooking pans are fabricated with copper bottom because conductivity of copper is greater than that of stainless steel.
- Sucrose is the sweetest natural sugar among glucose, fructose and lactose.
- Lead is used in storage batteries.
- Nobel gases are so called due to their chemical inertness.
- Alum is not present in cement.
- Due to continuous use of calcium superphosphate as fertilizer in soil, the pH of soil becomes more than 7.
- Among the fertilizers used, urea contains maximum % of N.
- Potassium magnesium sulphate is called the muriate of potash.
- Sodium acetate salt when dissolved in water makes the solution basic.
- Yellow colour of usual nitric acid is due to the presence of N_2O_5 .
- Astatine is the rarest naturally occurring element on earth.
- Nitrogen and carbon are most essential for building cells in the human body.
- Among the sedimentary rocks, limestone is of organic origin.
- Red Hematite is an ore of iron.
- Radiocarbon dating is used to find the age of fossils.
- Which of the following is used as raw material for the manufacture of rayon? Cellulose
- Saponification is the process that makes what common product: Soap
- If an alloy is an amalgam what metal must it contain-Mercury
- An example of inorganic compound is carbon monoxide.
- ATP is a molecule containing high-energy bonds.
- Sand, Soda and what are the main ingredients of glass-Limestone
- Which acid dissolves glass- Hydrofluoric Acid.
- What colour is iridium-Steel Grey
- What gives onions their distinctive smell- Sulphur - taken in when growing

UNITS OF MEASUREMENT

- 1 horse power is 745.7 watts
- 1 horse power = work equal to lifting 550 lbs of weight to one foot for one second
- 1 calorie is equal to 4.2 Joules
- 1 barrel is equal to 159 liters
- 6 feet = 1 fathom
- 1 kwh = 3.6×10^6 power 6 joules

- A 100 watt bulb lights for 1 hour uses 100 watt hour of electricity
- -273 degree centigrade is called absolute zero temperature.
- Standard pressure is 760 mm or 14.7 lb/in²
- Gross is equal to 12 dozens
- Mach 2 = 500 miles per hour
- 1 nautical mile = 1825 meters
- Unit of pressure is Pascal
- Force is measured in Newton (SI), Dyne (CGS)
- At -40 deg F Fahrenheit scale is equal to centigrade scale
- Hertz and Angstrom are units of frequency
- Units of work and energy are Joule and Erg (CGS)
- Diopter is unit of power of lens
- Unit of density is kg/m³
- Unit of power is watt, BTU (British Thermal Unit)
- Unit of electric charge is Coulomb
- Unit of voltage is volt
- Unit of electric resistance is ohm
- Unit of capacitance is Farad
- Unit of magnetic flux is Weber, Tesla
- Unit of radio activity is Becquerel
- Unit of luminous intensity is candle, lux
- Unit of crude oil is Barrel
- Unit of volume of water is cusec, cubic/sec
- Unit of admittance is Mho
- Unit of intensity or loudness of sound is bel
- Unit of viscosity is Poise
- Unit of flight speed is Mach 1
- Unit of atmospheric pressure is milli bar
- Unit of wave length of light is Angstrom
- Unit of energy is Electron volt
- Unit of brightness is Lambert
- Unit of luminous flux is Lumen
- Intensity of illumination or unit of luminosity is Lux, Candela and Candle power
- Unit of magnetic pole strength is Weber
- Unit of RAD (Radiation Absorbed Dose) is Gray
- Unit of Electric Current is Ampere
- Unit of inductance is Henry
- Unit of conductance is siemens.
- Unit of heat is Joule, Calorie, BTU (British Thermal Unit)
- Radio activity is measured in currie
- Rutherford: strength of radioactivity
- Torr: pressure
- Fermi: length [A unit of length equal to one femtometer (10⁻¹⁵ meter)]
- Sved berg unit: sedimentation rate
- Dioptre: power of lense
- Mho: conductivity
- Henry: inductance
- Maxwell: magnetic flux
- Becquerel: radioactivity
- Kilo watt hour: power
- Coulomb: unit of electrical charge
- Weber: unit of magnetic flux
- Tesla: unit of magnetic flux density
- Siemen: unit of conductance
- Rutherford: unit of rate of decay of radioactive material

- Faraday: unit of electric charge
- Angstrom: unit of length, used especially to specify radiation wavelengths
- Parsec: unit of astronomical length
- Degree: unit of measurement of an angle
- Steradian: Unit of solid angle measurement
- Dyne is a unit of Force.
- SI unit of pressure is Pascal.
- Curie is a unit of: radioactivity
- Pascal Sound Pressure
- Torr Pressure
- Curie Intensity of radioactivity
- Angstrom Unit of length
- Light year The distance light travels in a year
- Dioptre Lens refractive power
- Horse power Unit of Power
- Radian Unit of angular measure
- Candela Unit of luminous intensity
- Mole unit of amount of substance
- What is measured in units called phon- Sound 192
- What is measured in grains - four grains to a carat- Pearls
- Unit of electromotive force in Volt.
- What is the SI unit of illumination -Lux
- Gross is equal to 12 dozen.
- Ozone is measured in percent age.
- An object traveling at Mach 2 is traveling approximately at 500 mph. (Check it)
- What is measured on the Gay-Lussac scale: Alcohol strength
- Chronometer is used to measure time
- Anemometer is used to measure Wind Speed
- The clusec is the unit measuring the power of what Vacuum pumps
- One million cycles per second is called Megahertz.
- 0.200 grams are equal to one carat.
- Voltammeter is an electrolytic cell for conducting electrolytic dissociation of electrolyte.
- 8 furlongs make one mile.
- A billion contain 1000 million. It has 9 zeroes. Similarly a trillion has 12 zeroes, a quadrillion 15 zeroes, a quintillion 18 zeroes and a decillion 33 zeroes.
- One inch is equal to 2.5400 cms and one mile is equal to 1.6093 kms.
- One micron is equal to One-thousandth of a millimeter.
- 2.47105 acres is equal to what SI unit-Hectare.
- What word describes one tenth of a nautical mile-Cable
- What is measured on the Torro scale-Tornados
- Unit of sound named after- Alexander Graham Bell - Decibel
- The density Smoke is measured on the Rngelmann scale-
- Unit of electromotive force in Volt.
- Power is measured in Watts (w).
- Resistance was discovered by Girge Ohm in 1826, and is measured in ohms.
- Electricity does not flow through a circuit by itself. It needs a 'push', or energy, to keep it moving. We call this energy the voltage of the circuit. Voltage is measured in volts (v).
- The German scientist George Ohm (1787-1854) is best remembered for working out ohm's law. He discovered that they voltage across a conductor such as a trip of metal or a wire – and the current following through it always vary in the same proportion. So if you double the voltage, you double the current. This is incredibly useful; because it lets you predict the current you will get for a particular voltage.
- The thickness of silk is measured in what- Denier
- Ohm's law does not apply to semiconductors and conductors when there is change in temperature.
- In our houses we get 220 V a.c. The value of 220 V represents the effective voltage.
- One unit of electric power is consumed when 10 A of current flows for 1 hour at 100 V. 1 Unit = 1 kw hr = 1000 w hr = 100 x 10 x 1 hr
- If the same note is played on a flute and a sitar, one can still distirguish b/w them because they differ in quality.
- A negatively charged glass rod has always less protons than electrons.
- The wavelength of the X-rays is of the order of 0.1 nanometer.
- Red, green and blue are known as primary colours. These are colours, which cannot be produced by mixing with other colours.
- Scattering of light ____ the duration of the day (make)
- Oil rises in a wick of oil lamp on account of a property of matter called Capillary Action
- a primary cell can ____ be charged again (not)
- When a person can see nearer objects but not the distant ones he is said to be suffering from: nearsightedness (myopia)
- ATP is a molecule containing high-energy bonds.
- An example of inorganic compound is carbon monoxide.
- The time period of a pendulum on moon increases.
- Clinical thermometer usually measures in Fahrenheit.
- Tube light emits radiation even after it is disconnected. It is due to Fluorescence.
- Shortsightedness can be corrected with the use of Concave.
- Rectifier converts AC into DC
- Atomic weight of chemical compounds is determined by Mass spectroscopy.
- Atomic pile is a place where nuclear fission is made.
- Drinker's apparatus is for measuring the amount of Alcohol in the blood.
- Dewar's flask is called as thermos.
- The conversion of gases into liquid under high pressure and low temperature is called regulation.
- If a green leaf is seen in a red light its color will be black.
- merge of VIBGYOR from one side of the prism is due to refraction and dispersion of light.
- Oxidation is the process in which electron is lost.
- Half time is a time of radioactive substance taken by that substance to decompose radioactivity to half of its weight.
- Light energy is stored in the form of chemical energy due to the activity of Chloroplast.
- Sunlight is composed of seven colours
- Oil rises in a wick of oil lamp on account of a property of matter called Capillary Action
- What is a Fata Morgana- Type of Mirage
- Freon-trademark for any of a number of chemical compounds containing fluorine, and often chlorine or bromine. Use: as

solvents, as aerosol propellants, in refrigeration. It is commonly used in refrigerator.

RAYS AND WAVES

- Gamma rays are considered the death rays.
- Gamma rays travel with the velocity of light
- Gamma rays have maximum penetrating power
- Shortest wavelength among alpha, beta and gamma is of gamma rays
- Laser rays are used in micro surgery
- Alpha radiations produce burns on human body
- Newton proved that sunlight consists of different colors
- Beta rays are fast moving electrons.
- Color with shortest wavelength is Blue
- Violet have shortest wave length and Red has longest wavelength (vibgyor)
- Red light's wave length is 11800 waves/cm (infra red)
- Least deviated color in prism is red
- Greatest deviated color in prism is indigo (Check violet)
- Violet light's wave length is 23600 waves/cm (ultra violet)
- Ultraviolet rays are less than 3000 deg: A
- Greatest value of wavelength is of infra red
- Visible waves are between 400-700 nanometers.
- MOTE = Million Tons of oil equivalent
- REM = Roentgen equivalent in man
- Transverse waves can only be produced in solids
- Longitudinal waves can be produced in solids, liquids and gases
- On passing thought food stuff, x-ray can kill bacteria
- Violet color of light t ravel thought glass with minimum speed
- There is no wavelength of light for color brown.
- White light is a mixture of all the colors in the rainbow.
- Blue has the shortest wavelength and red the longest.
- Radio waves also come from sun and outer space.
Astronomers use radio telescope to hear them.
- Radar uses microwaves.
- Anything that is warm produces infrared waves including us.
The hotter the thing the more IR.
- Infrared waves are used in TV remote control.
- X-rays have shorter wavelength and more energy than ultraviolet rays.
- Gamma rays come from radioactive materials. They are used to kill cancers.
- Without exposure to ultraviolet light our bodies would not be able to make vitamin D.
- UHF, ultra high frequency are radio waves used for TV broadcast
- Microwaves are used in radar, mobile phones, microwave oven, communication network
- Each light color is of different wavelength.
- Red light has the longest wavelength while violet light has the shortest.
- Waves with a longer wavelength than red light are invisible they are called infrared waves.
- Invisible Ultraviolet wave have wavelength shorter than violet light.

- Red, Blue, Green are prime colors.
- Red + Blue + Green = white
- The wavelength of visible light is between 1350-2500
- An object that reflects all the light looks white.
- Loudspeaker converts electrical energy into sound energy.
- Light coloured clothes are generally worn in summer
- The electrical device which transform voltage: transformer
- A nuclear reaction in which two or more than two lighter nuclear are fused together to form a relatively heavier one: nuclear fusion
- The three colours combination which produces the sensation of white light: Red green and blue
- The clear sky looks blue because of dispersion of light
- When light waves travel from air to glass the wavelength and velocity variables are affected.
- Electrical lines of forces are imaginary.
- Frequency distinguishes ultrasound from normal audible sound. Its $f > 20,000$ Hz.

PHYSICAL PROPERTIES

- Theory of mutation was propounded by Hygo de Vries.
- A theory of acquired character was given by Lamark.
- Charles Darwin is famous for his theory of struggle for existence and survival of the fittest.
- Sigmund Freud is called as the father of modern psychiatry and psychology.
- Energy stored in stretched spring is Elastic Potential energy
- Energy stored in fossil fuels is chemical energy
- Radio waves are Electromagnetic waves
- A.C voltage is analogue quantity
- Optical fibers work on polarization of electromagnetic waves
- Condenser is used to collect the charge
- In diesel engine ignition takes place by compression
- A radar uses radio waves to detect enemy aircraft
- Law of floating bodies was given by Archimedes
- Particle with +ve charge but mass equal to electron is positron
- Nucleus of an atom has +ve charge.
- Bosons are Photons and Mesons
- There is no neutron in the atom of hydrogen
- Quark is an atomic particle. Scientists think that proton and neutrons are themselves made of still smaller particles called quarks
- Muttons are particles of atom
- John Dalton, an English scientist, gave Atomic Theory in 1803 describing atom as the smallest unit of an element
- Gas in children's balloon is Helium
- Weight of electron = 9.1×10^{-31} kg
- Charge on electron = 1.6×10^{-19} coulomb
- Weight of proton = 1.66×10^{-27} kg
- Charge on proton = 1.6×10^{-19} coulomb
- A proton is 1836 times heavier than an electron
- Ordinarily and atom is a neutral particle
- Ernest Rutherford, a New Zealander, in 1908 discovered Atomic Nucleus
- Speed of sound is faster in hot air than in cold air

- Ultrasonic are sound waves of high frequency = 12000 cycles/sec and higher
- Sound travels faster in moist air than in dry air
- Sound travels more rapidly in solids
- Maximum limit of sound beyond which a man can become deaf is 129 decibel
- Audible sound is 20-20,000 cycles/second
- Inaudible sound >20,000 cycles/second
- Velocity of sound at 0 deg: C is 331.7 m/s
- Echo can only be produced when the distance of the obstacle is at least 17 meters
- When we hear a sound, its impressions remain in our ear for $1/10^{\text{th}}$ of a second
- Image persists for about $1/10^{\text{th}}$ of second in our eye
- For creating a persistence of vision, pictures are projected at the rate of 10 or more/sec
- Nuclear Energy is not a source of alternative energy.
- Videotape used in camcorders to record audio and video signal employee fine grains of iron oxide.
- Temperature inside a refrigerator is 40 deg: F
- The laws of reflection were first discovered by a al- Hazen
- 0.200 grams are equal to one carat.
- One million cycles per second is called Megahertz.
- Carbon fiber is made by heating textile fibers. These are used in tennis rackets and racing yacht
- Catalytic converter reduce the harmful fumes the engine emits
- If you double the voltage you double the current (Ohm's law)
- What product uses the most silver-Camera Film
- The speed of sound depends on the medium through which the waves are passing. The speed of sound in gases depends on what? Density
- Two or more molecules of carbohydrates are linked together through glycosidic bond
- peptide bond b/w amino acids, joined to form proteins, is the linkage b/w N and C
- An android is any robot that: has the ability to make decisions and formulate plans
- Semaphores were used between sailors for many years to communicate between ships
- One of the first long distance communication system invented in 1790 was the semaphores towers
- Telegraph was invented in 1821
- Telephone was invented in 1876
- Us inventor Samuel More developed the system of dots and dashes of telegraph that was known as Morse Code
- Scientist now think that protons and Neutrons are themselves made of still smaller particles called quarks.
- Portable gadgets = Mobile phones and portable TVs.
- Derailleur gears are used in Bicycles.
- Motor – cross race is for motorcycles.
- Cantilever brake used in Bicycle.
- Speed of light 300,000 kilometers per second.
- Engineers use electronic theodolite and range finder to measure the distance and angle to calibrated staff.
- Centigrade and Celsius temperatures are same below freezing point.
- Which instrument is used to measure pressure? Manometer
- The velocity of light was first measured by Olaf Roemer
- Centigrade and fahrenheit scales gives same readings at 32 degrees
- The first European scientist who refuted the belief that the earth was the centre of the universe was Copernicus.
- Mobile phones transmit message using radio-type waves called microwaves
- Super conductors are also strong diamagnetic this means they strongly repel magnets.
- Super conductors are used in very fast computers and also in trains like Maglevs.
- Electronic theodolite and range finder measures distance and angle.
- A fluorescent light is a glass tube containing gas, which produces UV light when current passed through it. Tube is coated with phosphor, which glows when UV hits it.
- Liver to make bile, which is stored in gall bladder, uses some of the chemicals from the recycle of old cells.
- Which is lighter, gold or plastic? Plastic
- Lasers are a special source of light called coherent light this means all the light waves are in step with each other and travel in same direction
- Laser produce light of one particular wavelength and it is single, pure color.
- The first hologram was made in 1962
- Laser = Light Amplification by Stimulated Emission of Radiation
- Quartz-halogen bulbs are used in overhead projectors and spotlights
- Helium is used to fill airships and balloons
- Helium is used to pressurize hydrogen fuel in rockets and the air in diver's air tanks
- Apart from radon, which is radioactive, the noble gases are used in lighting.
- The noble gases have very low boiling points.
- Liquid helium is the coldest substance.
- A gas only becomes liquid at -268.9 deg: C
- Combustion is a kind of oxidation reaction.
- At room temperature the particles in air travel at around 1800 km/h the same speed as a bullet fired from a rifle.
- Generators convert mechanical energy into electrical energy.
- The principle behind the generator is electromagnetic induction. It was discovered by Michael Faraday.
- Lovell telescope is at Jodrell Bank the site for space observatory
- Nicolaus Copernicus (1473-1543) was born in Poland and was the first to explain the solar system.
- Derailleur gear are used in bicycles
- Cantilever brake is also used in bicycles
- Static electricity makes a balloon stick to the wall after you have rubbed it on your hair.
- John Bardeen, Walter Brattain and William Shockley in 1947 used a semiconductor called germanium to make the world's first transistor.
- A diode conducts electricity easily in one direction but resists the flow of electricity in the other.
- A capacitor stores electric charge. Capacitors are important components for making timers.

- Capacitors are used in filtering circuits like treble and bass in hi-fi
- Transistors can be used as logic gates
- Energy value of food items is expressed in kilojoules (kj) or thousands of joules.
- British scientist James Prescott Joule discovered the principle of conservation of energy.
- Which one of the following statements regarding sound is true?
Its source is always a vibrating material.
- Weight of an object put in a satellite orbiting in space around the earth is reduced to zero
- Movie camera take pictures at rate of 24 pictures per second
- Density of water is 1
- Water expands as it freezes to ice. This makes ice less dense than water, which causes ice to float.
- Heat flows in three ways conduction, convection and radiation
- A concave lens is used for the correction of the Hyperphobia
- Silver metal has the highest electrical conductivity.
- Mohr's scale hardest substance is diamond - what's the softest:
Talc

VARIOUS SCIENCES

- Taxidermy means stuffing dead animals
- Stenography means short hand writing
- Psoriasis is a learning disability
- Paleontology is study of fossils.
- Hematology is the study of blood.
- Study of earth is geology
- Acoustics is the science of sound
- Cytology is the study of cell
- Entomology is the study of insects.
- Apiculture is science of bee keeping
- Ornithology is the science of birds
- Philology is the science of languages
- Oncology is the study of cancer
- Exobiology is the study of life in outer space
- Numismatics is the study of coins
- Eugenics is the study of altering humans by changing their genes or it refers to Improvement of human race
- Ethology is the study of animal behavior
- Anthropology is the study of origin and physical and cultural development of mankind
- Carpology is the study of fruits and seeds.
- Pathology deals with diseases
- Histology deals with organic tissues
- Pedology is the study of soil
- Cryogenics deals with the production, control and application of low temperatures
- Seismology is study of movements inside earth's crust
- Ailurophobe is fear of animals
- Pyrophobia is fear of fire.
- Ambidextrous is one who can write with both hands.
- Astrophysics is a branch of astronomy, which deals with the physical and chemical nature of heavenly bodies.
- . A etiology is the study of causes of disease.
- Concho logy is the study of shells.

- Cryptology is the study of codes.
- Dendrology is the study of trees.
- Ergonomics is the study of relationships between people and their working environment.
- Graphology is the study of handwriting.
- Ichthyology in the study of fish.
- Psychological study of life in artificial environment is called biopsy.
- Forms and features are studies under the branch of Morphology.
- Paleontology is the study of fossils.
- Phycology is the study of Algae.
- Mycology is the study of fungi.
- The art of compiling dictionary is called Lexicography.
- Anthropology is the study of man.
- Cartography is the art of making maps and charts.
- Philately is hobby of stamp collecting.
- The branch of zoology, which deals with the study of insects is called entomology
- The production of generally identical reproduction is called as Cloning
- A petrologist studies what- Rocks history formation etc
- An onomastician studies what - Names
- Thanatology is the study of what Death
- The study of human population is called Demography.
- What does an otologist study-The ear and its diseases
- Noologists study what-The Mind
- Semiology is the study of what-Signals
- What is silviculture-Forestry
- What is Xylography-Wood Engraving
- Paleontology is the science of history of life.
- Meteorology is the study of study of weather.
- Cryptography is the study, which deals with the secret writing.
- Hydroponics means cultivation of the plants without use of soil.
- Hyetology is the study of rainfall.
- Mycology is the study of fungus and fungi diseases.
- Numismatics is the study of coins.
- Petrology is the study of rocks in the earth's crust.
- Amniocentesis is a method for determination of foetal sex.
- What is Steganography: Invisible ink writing
- Ichthyologists study what Fish
- What does a psephologist study: Voting – Elections
- What is studied in Aerology-Planet Mars
- What does a philologist study- Languages
- Orthoepey is the study of what-Word pronunciation
- A philomath has a love of what- Learning
- What is a nidologist interested in-Birds nests
- What is philography- Autograph collecting
- Agronomy is the science of soil management.
- Penology is the study, theory and practice of prison management & criminal rehabilitation.
- Chemical preservation of dead organisms in liquid is called Cryo-Bilogy.
- Orthoepey is the study of what-Word pronunciation
- What does a philologist study- Languages
- Chlama domonas is unicellular plant

DISCOVERIES AND INVENTIONS

- Galileo was first to discover rotation of earth
- Photography was invented by Mathew Barry
- Albert Sabin invented Polio vaccine (oral)
- Dmitry Ivanovich Mendeleyev (Russian) published his first version of periodic table in 1869.
- X-ray machine was invented by James Clark
- Arthur Compton discovered x-rays and Cosmic rays.
- Chadwick discovered Neutron
- Telescope was invented by Galileo
- Penicillin was discovered by Alexander Fleming
- Noble gases discovered by Cavendish
- Gun powder was first invented in China
- Velocity of light was measured by Michelson
- Archimedes gave laws about Floatation of Bodies
- Balloon fly up in air according to Archimedes's principle
- Dr. Christian Bernard was first to perform heart transplant in 1967 in cape town (SA)
- First man to receive artificial heart was Dr. Barney B. Clark
- Barometer was invented by Pascal
- Robert Hook discovered Cell in 1665
- Aspirin discovered by Dresser
- Atomic theory given by Dalton
- Atomic number given by Mosley
- Bacteria by Leeunhock
- Blood circulation by William Harvey
- Calculus by Newton
- Co₂ by Fishcer
- Chlorine by K. Scheele
- Oxygen by Priestley
- Hydrogen by Cavandish
- Super conductor by Bendnorz and Muller in 1987 and were awarded Nobel Prize
- Eli Whitney invented cotton gin.
- Chloroform by Guthrie
- Deuterium by Harlod
- Dynamite by Alfred B. Nobel
- DNA by Watson Crick
- Gene by Johanson
- Chromosomes by Waldyar
- Electric resistance by Ohm
- Electrolysis by Faraday
- Electron by J.J. Thomson in 1897
- Neutron by Chadwick
- Proton by Rutherford
- Positron by Anderson
- Ozone by Echonbein
- Planetary motion by Kepler
- Radioactivity by Bacquerel
- Radium by Currie
- Insulin by Banting & Best.
- Human heart transplant by Bernard
- Vaccine (measles) by Peebles
- Vaccine (polio) by Salk
- Vaccine (rabies) by Louis Pasteur
- Vaccine (small pox) by Edward Jenner
- Cause of Malaria was discovered by Ronald Ross
- Adding machine invented by Pascal
- Atom Bomb by Otto Hahn
- Air Brake by George Washington
- Air Conditioning by H. Carier
- Airplane (with motor) by Wright Bothers
- Airplane (jet engine) by Ohain
- Automobile (electric) by William Morrison
- Automobile (differential gear) by Benz
- Bakelite by Leo Hendricks Backland
- Balloon by Mont Golfer
- Barometer by Torricelli
- Bicycle (modern) by Starley
- Bifocal lens by Benjamin Franklin
- Burner (gas) by Bunsen
- Calculating machine (digital) by Charles Babbage
- Camera (photographic) by Josef N. Niepce
- Carburetor by Daimler
- Cement by Joseph Aspidin
- Circuit breaker by Hilliard
- Computer (electronic) by J.P.Eckert and J.W.Mauckly
- Diesel engine by Rudolf Diesel
- Eastman Kodak invented digital camera.
- Gas engine by Daimler
- Electric fan by wheeler
- Electric flat iron by Henry Sealy
- Electric generator by Hippolyte Pixie
- Electric motor by Michael Faraday
- Motor A.C by Tesla
- Motor D.C by Devin Port
- Electric shaver by W.S. Hadaway
- Electric vaccum cleaner by James Spangler
- Electromagnet by William Sturgeon
- Electron Microscope by Vladimir Zwryin
- Microscope (compound) by Janessen and Leeuhock
- Flying shuttle by Johan Kay
- Gun powder by Roger Bacon
- Gas engine (four cycle) by Otto and Daimler
- Helicopter by Sikorsky
- Interneral combustion engine by Daimler
- Jet engine by Frank Whittle
- Knitting Machine by William Lee
- Lamp (incadecent) by Thomas Edision
- Montgoflier invented balloon.
- Talbot invented photographic paper.
- Dickenson invented paper machine.
- Blanchard invented parachute.
- Colt's invention is pistol.
- Howe was the inventor of sewing machine.
- Lamp (mercury) by Hewit
- Laser (practical) by Gordon Gould
- Laser (operable) by T.H.Mainman
- Machine gun by Gatling
- Match (safety) by Pasch

- Microphone by Graham Bell
- Motion pictures (camera) by Edison
- Motor cycle by Daimler
- Motor scooter by Bradsha
- Parachute by Garnerin
- Pen (fountain) by Waterman
- Pen (ball-point) John Loud Biro
- Photoelectric cell by Julius Elster
- Piano by Christopher
- Printing press (screw type) by Guten Berg
- Radar by Watson Watt
- Railway (electric) by Werner Siemens
- Razor safety by Gillette
- Razor (electric) by Jacob Schick
- Refrigerator by Ferdinand Carre
- Revolver by Samuel Solt
- Rifle by August Kotter
- Rifle (automatic) by John Moses Browning
- Rocket Engine by Goddard
- Safety pin by Walter Hunt
- Sewing Machine by Elias Howe and Thomas Saint
- Stainless steel by Herry Brearley
- Stream boat by Abbans
- Submarine by Holland
- Tank military by Swinton
- Telephone by Graham Bell
- Radio by Marconi
- Telescope (reflecting) by Galileo
- Telescope (refracting) by Newton
- Television (mechanical) by J.L. Baird
- Television (electric) by Fransworth
- Thermometer by Galilo
- Termomter (mercury) by Farhenheit
- Tractor by Robert Keeley
- Transformer by William Stanley
- Transistor by William Shockley
- Type writer by Henry Mill
- Washing machine (electric) by Alva Fisher
- Washing machine (manual) by Hamilton E. Smith
- Welding (electric) by E. Thomson
- Zipper (meshed tooth) by Gideon Sundback
- Celcius devised Centrigrade scale
- Bacteria were discovered by Louis Pasture.
- Ramsay discovered inert gas.
- Proton was discovered by Goldstein
- Who is credited with the development of polio vaccine? Jonas Salk
- Christopher Cockerel invented what: Hovercraft
- The electric chair was invented by a dentist
- Bardeen and Brattin discovered Semiconductor
- What was invented by James Dewer in 1872: Vacuum or thermos flask
- Atom Bomb (Uranium Fission) was invented by Otto Hahn in 1941.
- Electron was discovered in 1897.
- Oxygen was discovered in 1774.
- Tomas A Edison was American.

- X-rays and Cosmic rays were discovered by Arthur Compton.
- Printing press was invented by Johann Gutenberg.
- Gramophone was invented by Emile Berliner.
- Blood pressure was discovered by William Harvey.
- Magnifying glass was invented by Roger Bacon.
- Insulin was discovered by Banting.
- Michael Faraday invented Electric Motor in belonged to England.
- ECG invented by Einthogen.
- Columbus Day is observed on 2nd Monday in October.
- In 1774 Oxygen was discovered by Priestly.
- In 1589 William Lee invented knitting machine.
- More than 2000 years ago a Roman Ruler Julius Caesar invented the calendar that we use today.
- Lipstick was first introduced in 1915 in America.
- Zippers were introduced in 1890.
- China was discovered by Marco Polo.
- Sea route from Europe to India was discovered by Vasco-de-Gama.
- Darfur conflict is in Sudan.
- Canada was discovered by Jacques Cartier.
- Australia was discovered by William Jon zoon.
- Parachute was invented by L.S Lenormand in 1783.
- Box Camera was invented by G.Eastman in 1888.
- Electric Generator was invented by Hippolyte Pixil in the year 1832. He belonged to France.
- In 1907 Electric Washing Machine was invented by an American named A.J 1916.
- Motorcycle was invented by Gottlieb Daimler in 1885, he belonged to Germany.
- First person to reach North Pole was Robert E.Peray.
- Dynamo was invented by Faraday in the year of 1831.
- On 14th Dec 1911 South Pole was discovered by Armunden.
- America was discovered by Christopher Columbus in 1492, he belonged to Italy.
- Sea route to India was discovered by Vasco da Gama in 1498, he belonged to Protugese.
- Sandwich Island (now called Hawaiian Island) was discovered by Captain cook in 1770, he belonged to English.
- Suez Canal was designed by French Engineer Ferdiand de Lesseps in 1869.
- Solar System was discovered by Copernicus in 1540, he belonged to Poland.
- Planery motion was discovered by Kepler in 1600, he belonged to Germany.
- Artificial radioactivity was discovered by Madam Joliet and Irene Curie in 1934.
- Atomic number were discovered by Mosley in 1913.
- Atomic theory was given by Dalton in 1803.
- Who invented wax paper- Thomas Edison
- Atomic Structure was studied by Bohr and Rutherford in 1913.
- Circumference of the earth was calculated by Jean Picard.
- Current Electricity was invented by Volta in 1800, he belonged to Italy.
- Cause of yellow fever was discovered by Reed in 1900.
- Discovery of Oxygen was made by J.Priestly in 1774.

- Deuterium (Heavy Hydrogen) was discovered by H.C Urey in 1932.
- Discovery of Electron was made by J.J Thomson in 1897.
- Dynamite was made by Alfred Noble, he belonged to Sweden.
- Fundamental laws of electrical attraction was made by Coulomb.
- Hydrogen was discovered by Cavendish in 1766.
- Induction of electric current was discovered by Michael Faraday in 1841.
- Incandescent bulb was made by Edison in 1860.
- Intelligence tests were made by Binet in 1905.
- Laughing gas (Nitrous oxide) was discovered by Priestley.
- Chromosomes were discovered by Hofmeister.
- Otto Hahn invented A.Bomb.
- Wright Brothers invented Aeroplane.
- W. Shockley discovered transistor.
- Christian Barnard was pioneer in heart transplantation.
- William Harvey discovered Circulation of blood.
- Ramsay discovered inert gas.
- Aristotle was the first to classify animals into groups.
- Theophrastus is regarded as the father of botany.
- Hydrogen was discovered by Henry Cavendish.
- Proton was discovered by Goldstein.
- Thomson discovered electron.
- Commercial cork is obtained from Quercus.
- Bacteria were discovered by Louis Pasteur.
- In 1803, the English Scientist John Dalton described the atom as the smallest unit of an element.
- In 1897 J.J Thomson discovered electron, negative charges.
- In 1911 Ernest Rutherford, a New Zealander living in Britain, carried out experiment with atomic particles.
- Scientist use enormous machine called particle accelerator to discover and find out about subatomic particles.
- Ernest Rutherford in 1908, with the equipment discovered the atomic nucleus.
- Hans Geiger (1882-1945) invented the Geiger Counter used to measure radioactivity.
- The scientist who designed the first internal combustion engine used to burn low-grade fuel.

Francois Isaac de Rivaz

- The scientist who discovered water: Antoine Lavoisier (Chk)
- Nitric acid___ acid was discovered by Jabbar bin Hayyan.(HCL was also discovered by him)
- What calculating aid was invented by William Oughtred in 1662: Slide Rule
- What was invented by James Dewar in 1872: Vacuum or thermos flask
- Fredrick Sanger discovered which medical life saver: Insulin
- Who invented Scissors-Leonardo Da Vinci
- In 1902 What did Mary Anderson invent-Windscreen Wipers
- The technique to produce the first test tube baby was evolved by Patrick Stepote and Robert Edwards
- Sumiton invented Tank.
- The very first electric light was invented in Scotland in 1835 by James Lindsay.
- The molecular theory of matter was experimentally testified by Robert Brown.

- The theory of inheritance of acquired characters was propounded by J.B. Lamarck
- What was invented by Dr Edward Land in 1947: Polaroid
- Dr. James Watson discovered the structure of DNA in 1953.
- Watson and Crick gave structure of DNA.
- Air conditioner invented by "willis H. carrier"U.S. in 1902.
- Camera (photographic) has been invented by "Joseph N. Niepce"France in 1822.
- The scientist who designed the first internal combustion engine used to burn low-grade fuel. Etienne Lenoir

Pioneers in Science

Anderson—Discovered positive electrons.

Archimedes—Discovery of the Principles of lever and of specific gravity; invention of the famous Archimedean screw.

Avogadro—An Italian scientist known for Avogadro's Hypothesis.

Bacquerel—Radioactivity of uranium.

Baird—Television.

Baron Napier—Logarithms.

Benjamin Franklin—Invented lightning conductor.

Bessemer—Steel-smelting process.

Bhabha, Dr H.J.—Research in Cosmic rays and Quantum theory.

Binet—Intelligence Test.

Birbal Sahni—Researches in Botany.

Bose, J.C.—Invented Crescograph and published many works on plant physiology. He discovered that plants have sense and perception.

Bose, S.N.—Discovery of a group of nuclear particles named after him "Boson".

Boyle—Boyle's law; Pressure x volume = constant at a constant given temperature. Boyle was the greatest scientist of England in his time.

Bohr—Electron Theory—Atomic structure.

Braun, Dr Wernher von—space flying.

Bunsen—Invention of the spectroscope.

Carothers—Nylon plastics.

Cavendish—Discovery of chemical composition of water; discovery of hydrogen (Inflammable Air); 'rare gases'.

Chadwick—Discovery of the neutron.

Chandrasekhar—Mathematical Astrophysics.

Charles Darwin—Theory of Evolution; Origin of Species.

Clarke, Arthur C.—Concept of Geostationary Orbit.

Curie, Madame—Discovery of radium.

Dalton—Atomic theory; laws of chemical combination; law of partial pressures; the law of multiple proportions.

Democritus—Greek philosopher—(Atomic theory).

Dewar—Invented cordite, liquid oxygen and introduced thermos flask.

Einstein—Theory of relativity.

Euclid—Science of geometry.

Fahrenheit—Fahrenheit mercury thermometric scale in which freezing point is -32° and boiling point is 212° .

Faraday—Electromagnetic induction and laws of electrolysis.

Fermi—Discovered artificial splitting of atoms.

Freud—Doctrine of Psychoanalysis.

Gay Lussac—Law of gases.

Gauss—System of absolute electric measurements.

Good Year—Discovered the art of vulcanising rubber.

Herschel, William—Discovered the Planet—Uranus.
Hertz—Electrical waves.
Hippalus—Founder of scientific astronomy.
Hoffmann—Discovered the first aniline dye.
Kelvin, Lord—Dynamical theory of heat.
Khorana, Dr Hargobind—Deciphering the genetic code.
Kodak—Film and photographic goods.
Lablanc—Manufacture of washing soda.
Lawrence—Invention of cyclotron.
Lockyer—Helium gas.
Louis Braille—Perfected his system of reading and writing for the blind.
Marconi—Wireless telegraphy; radio.
Maria-Montessori—‘Montessori’ method of teaching children.
Maxwell—Electro-magnetic Theory of Light.
Meghnad Saha—Effect of pressure on Radiation through bodies.
Mendel—Laws of heredity.
Mandeleev—Periodic Table.
Morse—Morse system of electric telegraphy.
Newton—Laws of gravitation; Law of Motion.
Nobel—Dynamite.
Oliver Lodge—Physicist. Researches in wireless communications.
Oppenheimer—Researches in atomic theory.
Otto Hahn—Discovery of uranium fission.
Parkes—Celluloid.
Parsons—Steam turbine.
Pavlov—Theory of Conditioned Reflex.
Perkin—‘Mauve dye’.
Pitman—Founded the Pitman system of phonographic shorthand.
Planck—Quantum theory.
Plimsoll—Introduced a line of demarcation on the ships beyond which the ships cannot be loaded.
Priestley—Discovery of Oxygen.
Raman, C.V.—“Raman Effect” on polarisation of light and theories on crystals and diamond formation.
Ramanathan—Molecular scattering of light in fluids.
Ramanujam—A great Indian mathematician.
Ramsay—Discovery of Inert gases such as Argon, Neon, and Helium etc.
Ray, P.C.—Researches in chemistry.
Regnault—Experiments in regard to the physical properties of bodies and their relation to heat.
Roger Bacon—Gun powder.
Rontgen—Discovery of X-rays.
Rohmkorff—Induction coil.
Rutherford—Atomic Research; succeeded in splitting the atom for the first time in 1918.
Shalimar—Paints.
Stephenson—British engineer and pioneer in Railways. He was the first to put a locomotive on the line that was able to draw a train of 31 carriages.
Thomson, J.J.—Discovered electron.
Travers—Discovery of Neon gas (Working with Ramsay).
Urey—Discovery of Heavy Hydrogen.
Volta—Current electricity and electric battery.

Pioneers in Mechanical Inventions and Discoveries

Austin—Motor Car.
Bell, Graham—Telephone.
Berliner—Microphone.
Brequet—Helicopter.
Bushwell—Submarine.
Caxton—Printing Press.
Colt—Revolver.
Daimler—Gas engine.
Davy—Miner’s Safety Lamp.
Diesel—Internal Combustion engine (Diesel engine).
Dunlop—Pneumatic tyre.
Edison—First electric bulb and gramophone.
Faraday—Dynamo.
Fick—Law of Diffusion—Fick’s Law.
Frank Whittle—Jet propulsion.
Fulton—Stream boat.
Galileo—Telescope.
Gillette—Safety razor.
Gutenberg—Art of Printing.
Hoe—Rotary Printing Press.
Howe—Sewing Machine.
Huygens—Pendulum clock.
James Watt—Steam engine (patented in 1769).
Landstrom, J.E.—Safety Matches.
Macmillan—Bicycle (1842).
Mauser—Magazine of rifle.
Mercator—Celestial and a terrestrial globe.
Montgolfier—Balloon (1883)
Pascal—Calculating Machine.
Puckle, James—Machine gun
Shockley—Transistor.
Sholes—Typewriter.
Stephenson—Railway engine.
Swinton—Military tank.
Torricelli—Barometer.
Watt, Robert Watson—Radar.
W. & O. Wright (Wright Brothers)—Aeroplane (1903).
Waterman—Fountain pen.
Zeiss—Lenses; Camera.

Pioneers in Medical Inventions and Discoveries

Banting—Insulin (as a palliative for diabetes).
Barnard, Christian—Replacing the human heart.
Brahmchari, U.M.—Cure of Kala-azar fever.
Davy—Isolation of metals by electricity; studied properties of chlorine.
Domagk—Sulpha drugs as bactericides.
Eijkman—Cause of Beri-Beri.
Finsen—Discovered curative effect of ultra violet rays; photography.
Fleming, Alexander—Penicillin (in 1929).
Harvey—Circulation of blood.
Hahnemann—Homoeopathy (founder).
Hopkins, Frederick Gowland—Vitamin D.
Jenner—Smallpox Vaccination.
Koch—Tubercle Bacillus.
Lainec—Stethoscope.
Lister, Lord—Antiseptic treatment.
Pasteur, Louis—Treatment of rabies; cure of hydrophobia.

Ronald Ross—Malaria Parasite.

Salk, Jonas E.—Anti-polio Vaccine.

Simpson and Harrison—Chloroform.

Waksman—Streptomycin.

SCIENTIFIC INSTRUMENTS

- Hydrometer measures humidity
- Barometer measures atmospheric pressure
- Purity of milk is measured by lactometer
- Fathometer measures the depth of oceans.
- Sextant is used for measuring altitude of Sun and other heavenly bodies
- Chronometer records accurate time on ships
- Algesimeter indicates the degree of sensitiveness of skin
- Altimeter measures altitudes
- Ammeter measures current
- Anemometer records velocity of wind
- Cyamometer measures blueness of sky or ocean
- Dasymeter measures density of gas
- Galvanometer measures small electric current
- Hydrometer measures relative density of liquids
- Hygrometer measures humidity in atmosphere
- Hypsometer measures atmospheric pressure to ascertain elevations by determining boiling point of liquid. Or Hypsometer is an instrument for measuring the height above sea level.
- Manometer measures pressure of gases
- Micrometer measures minute distances
- Periscope is used for viewing objects above eye level
- Cyclotron is used for electromagnetic acceleration of charged atoms
- Geiger counter is used for detecting and recording radioactivity. It was invented by Hans Geiger (1882-1945)
- Pyrometer measures high temperatures
- Refractometer measures refractive index of a substance
- Seismograph measures intensity of earthquake
- Telstar transmits wireless or T.V broadcast
- Viscometer measures viscosity of liquids
- Spiro graph records the movement of lungs
- Photometer measures rate of transpiration
- Scotograph is used for enabling blind to write
- Eratosthenes measures distance round the earth
- Kaldio-scopes have proved helpful in finding the amount of dampness in soil
- Mohr's scale measures degree of hardness of minerals
- RBC and WBC is bloods are counted by Hemocytometer.
- Manometer is the instrument of measuring gas pressure.
- Spectrometer instrument for measuring the spectrum of light.
- The variation in the blood flow can be heard with an instrument called _ stethoscope _
- What is measured by an interferometer-Wavelength of light
- Hydrophone is used for measuring sound under water.
- Magnometer is an instrument designed to compare the magnetic movement and field.
- Potometer is used to measure the rate of respiration in animal and plants.
- For measuring solar radiation we use pyrheliometer.
- Actinometer measures direct heating power of the Sun.
- Ammeter is use for measuring current strength.
- Manometer is the instrument of measuring gas pressure.
- Spectrometer instrument for measuring the spectrum of light.
- An instrument known as rain gauge makes the measurement of rainfall.
- What is measured with an ombrometer-Rainfall
- The instrument used to measure very high temperature: Infrared pyrometers
- Mechanical energy into electrical energy: Generator
- Heat energy into mechanical energy: Heat engine or steam engine.
- Electrical energy into mechanical energy: Electrical Motor
- Electrical energy into sound energy: Loudspeaker
- Sound energy into electrical energy: Microphone
- The device used to measure radioactivity: Geiger-Muller tube
- The device which converts the chemical energy into electrical energy: Battery
- The device used to measure radioactivity. Geiger counter
- Hygrometer is instrument used for measuring humidity of air.
- Helioscope is used for viewing the sun.
- What does a potometer measure- Water intake
- Clinical thermometer usually measures in Fahrenheit.
- Actinometer measures direct heating power of the Sun.
- Ammeter is use for measuring current strength
- Voltammeter is an electrolytic cell for conducting electrolytic dissociation of electrolyte.
- What does a drosometer measure: Dew
- Relative density of an atmosphere is measured by hygrometer.
- Spirograph is an apparatus used for recording the movement of the lungs.
- The maximum limit of sound beyond which a person can become deaf is 129 lbs.
- Charles K Rhodes developed an X-Ray emitting laser in 1990.
- Son meter is an instrument used to study the behavior of vibrating string.
- The instrument used for measuring the velocity of wind is known as anemometer.

Instruments

Altimeter: an apparatus used in aircraft for measuring altitudes.

Ammeter: is used for to measure intensity of sound.

Anemometer: is an instrument for measuring the force and velocity of wind.

Audiometer: an instrument to measure intensity of sound.

Audiophone: is an instrument required for improving imperfect sense of hearing.

Barograph: for continuous recording of atmospheric pressure.

Barometer: is an apparatus used for measuring the atmospheric pressure.

Binoculars: is an instrument used for seeing distant objects, the rays of light are twice reflected by means of right-angled prisms.

Callipers: a compass with legs for measuring the inside or outside diameter of bodies.

Calorimeter: an instrument used for measuring quantities of

heat.

Carburettor: is an apparatus for charging air with petrol vapours in an internal combustion engine.

Cardiogram: a medical instrument used for tracing the movements of the heart.

Cardiograph: is a medical instrument for tracing heart movements.

Chronometer: is an instrument kept on board the ships for measuring accurate time.

Cinematograph: It consists of a series of lenses arranged to throw on a screen an enlarged image of photographs. The lens system, which forms the image on the screen, is termed the focusing lens.

Commutator: split ring, which forms the main part of a D.C. Dynamo.

Compass needle: for knowing approximately the North-South direction at a place.

Crescograph: is an instrument for use in recording growth of plants; invented by J.C. Bose.

Dip Circle: It is an instrument used to determine the angle between the direction of the resultant intensity of earth's field and the horizontal component at a place. This particular angle is known as the dip of that place.

Drinker's apparatus: to help breathing in infantile paralysis.

Dynamo: The origin of electricity in a Dynamo is the transformation of mechanical energy into electrical energy. It depends on the principle of electro-magnetic induction whereby a current is produced on traversing a magnetic field.

Electroencephalograph (EEG): It is the technique of recording and interpreting the electrical activity of the brain. Records of the electrical activity of the brain, commonly known as "brain waves", are called electroencephalograms or electroencephalographs. EEG is the common abbreviation for both the technique and the records.

Epidiascope: for projecting films as well as images of opaque articles on a screen.

Eudiometer: It is a glass tube for measuring volume changes in chemical reactions between gases.

Fathometer: is an instrument used for measuring depth of the ocean.

Galvanometer: an instrument for measuring currents of small magnitude.

G.M. Counter (Geiger Muller Counter): This special device is used for detecting the presence of radiation and counting certain atomic particles.

Gramophone: an instrument with which we can reproduce the sound recorded by a suitable recording apparatus. It is fitted with a special type of apparatus known as sound box invented by Berliner.

Gravimeter: is an instrument for recording measurement under water and to determine the presence of oil deposits under water.

Gyroscope: is an instrument used to illustrate dynamics of rotating bodies. It is a type of spinning wheel fixed to the axle.

Hydrometer: is an instrument used for measuring the specific gravity of liquids.

Hydrophone: is an instrument used for recording sound under water.

Hygrometer: is an instrument used for measuring humidity in air.

Kymograph: is an instrument used to record graphically various physiological movements i.e., blood pressure, heart beating, study of lungs etc in living beings.

Lactometer: is an apparatus used for measuring the purity of milk.

Manometer: for determining the pressure of a gas.

Mariner's Compass: is an apparatus, which is used to guide the sailors. The needle always points north south.

Micrometer: is an instrument used for converting sound i.e., fraction of the lowest division of a given scale.

Microphone: is an instrument used for converting sound waves into electrical vibrations.

Microscope: is an instrument, which is used for magnifying minute objects by a lens system.

Microtome: is used for cutting an object into thin parts for microscopic inspection.

Odometer: is an instrument by virtue of which the distance covered by wheeled vehicles is recorded.

Periscope: It is usually used by the crew of a submarine to survey the ships etc, on the surface of the sea while the submarine is under water. It also enables the sailors to observe objects on the other side of an obstacle without exposing themselves.

Phonograph: is an instrument used for reproducing sound.

Photometer: is an apparatus used to compare the illuminating power of two sources of light.

Pipette: It is a glass tube with the aid of which a definite volume of liquid may be transferred.

Potentiometer: is used for comparing the e.m.f.s, of cells, measurements of the thermal e.m.f.s, large potential differences and currents. It is also used for measuring low resistances.

Psychrometer: is an instrument for measurement of the humidity of the atmosphere.

Pyrometer: is an instrument for recording high temperatures from a great distance (i.e., for recording temperature of the sun etc.) by making use of the laws of radiation.

Radar: Radio, Angle, Detection And Range are used to detect the direction and range of an approaching aeroplane by means of radio microwaves.

Rain Gauge: is an apparatus for recording of rainfall at a particular place.

Radiometer: is an instrument for measuring the emission of radiant energy.

Refractometer: is an instrument to measure refractive indices.

Saccharimeter: is an instrument for determining the amount of sugar in a solution. It is used in breweries.

Seismometer or Seismograph: is an instrument used for recording earthquake shocks.

Sextant: is an instrument invented by John Hadley used for measuring the altitude of the sun and of other inaccessible heavenly bodies.

Spectrometer: (1) It is a type of spectroscope suitable for the precise measurements of refractive indices. (2) An instrument for measuring the energy distribution of a particular type of radiation.

Speedometer: is an instrument, which indicates speed at which a vehicle is moving.

Spherometer: is an instrument for measuring curvature of surfaces.

Sphygmomanometer: an instrument used for measuring

arterial blood pressure.

Sphygmophone: an instrument, with the help of which a pulse beat makes a sound.

Sphygmoscope: an instrument, by virtue of which, arterial pulsations become visible.

Stereoscope: It is a special type of binocular, through which a double photograph snapped from two different angles by a two-lensed camera is viewed in solid relief.

Stethoscope: is an instrument to hear and analyse movements of heart and lungs.

Stop watch: for recording small intervals of time in the laboratory, in races and other events.

Stroboscope: is an instrument for viewing objects moving rapidly with a periodic motion and to see them as if they were at rest.

Tachometer: is an instrument for determining speeds of aeroplanes and motorboats.

Telephone: a device by virtue of which two persons at two different places can communicate. It consists of two main parts (i) a microphone and (ii) a receiver.

Teleprinter: an instrument, which prints automatically messages sent from one place to another, on, telegraphs lines.

Telescope: is an apparatus used for observing distant objects.

Theodolite: is an instrument for measuring horizontal and vertical angles.

Thermocouple: an instrument based on thermo-electricity used for measuring temperatures.

Thermometer: is an apparatus used for measuring temperature.

Thermostat: It is an instrument used to regulate the temperature to a particular degree.

Viscometer: is an instrument to measure viscosity.

COMPUTER

- Half byte = 1 nibble = 4 bits
- Bit means Binary Digit
- 1 byte = 8 bits
- 1 mega byte = 1048576 bytes
- 1 kilo byte = 1024 bytes
- A combination of 16 bits is called word.
- A terabyte = 1 trillion bytes
- Our PC belongs to 4th generation.
- Fred Cohen coined the word computer virus.
- First computer virus was created in 1970 at Bell laboratories
- WORM means Write Once Read Many
- Power of a super computer is measured in FLOPS (Floating Point Operations per Second)
- WWW/http: (hypertext transfer protocol) was created by Tim Burner Lee in 1992
- Intel means Integrated Electronics
- 1 worksheet contains 256 columns
- G.W.Basic G.W stands for Gate Way
- Super Computer was created by J.H.Van Tassel
- CORBA is Common Object Request Broker Architecture
- URL is Uniform or Universal Resource Locator
- Intel invented RAM chip

- Information stored on disk as series of bumps on its shiny side.
- DVDs hold more information than CDs. They use smaller bumps and have two reflective layers
- Recordable CDs do not have bumps. There are patches of color on disk to change the reflected laser light
- In 1951 Univac – 1, John Mauchly and J. Presper Eckert designed the world's first commercial computer. They built ENIAC, the first electronic computer in 1946
- In 1968 mainframe was built.
- In 1976 first supercomputer the Cray-1 was developed
- In 1981 IBM produce the IBM PC.
- In 1998 IBM made quantum computer
- Super computers uses parallel processing
- In 1974, computer games were introduced.
- PROM is the abbreviation of programmable read only memory
- What was the world's first high level programming language 1957: IBM FORTRAN
- A JPEG is a picture file format - what does JPEG stand for: Joint Photographic Experts Group
- During World War II, IBM built the computers the Nazis used to manage their death/concentration camps
- Registers are temporary storage areas within the CPU.
- First apple computer was built in garage.
- The language of small talk is object oriented.
- Shell is an operating environment.
- Virtual memory is also known as virtual page.
- NOS refer to operating systems for a network.
- In EBCDIC each character is denoted by 8 bits.
- Diodes are used in analog computer circuits as limiter.
- Wetware stands for any organic intelligence.
- GIGO stands for garbage in garbage out.
- Application of flip-flap are counters, shift register and transfer register.
- Bootstrap is associated with computer.
- FORTRAN stands for formula translator.
- A group of character that is termed as a single entity is called word.
- Clip art is a computer prepared art.
- Mark sensing is another term for OMR.
- Authorization to make multiple software copies is called site licensing.
- Antivirus is also known as vaccines.
- Free software is also known as public domain software.
- In computer DFD stands for Data Flow Diagram.
- Cyber Space is called to Virtual world of the computer.
- What does the sun in SUN Microsystems stand for Stanford University Network
- What does Intel stand for- Integrated Electronics
- All PCs have a BIOS what does bios stand for-Basic Input Output System
- What is the common name for an integrated circuit- Chip
- In WWW terms what does i.e. mean on a domain name-Ireland
- What company introduced the first commercial minicomputer 65 DEC
- Name the first web browser publicly available- NCSA Mosaic
- The world's most powerful super computer is called ASCI white.
- Tim Bareness Lee invented World Wide Web in 1993.

- The B-programming language was developed by Ken Thompson.
- The 1st commercially produced and sold computer (1951) was UNIVAC.
- The transformation from heavy computers to PCs was made possible using microprocessors.
- Intel developed the first microprocessor in 1971.
- A pentium 4 (P-4) employs roughly 40 million transistors.
- Mark-1, Apple-1, and colossus were initial desktop computers.
- Binary digits are briefed as bit.
- A collection of bits is called byte.
- The first home computer (1977), which was sold in millions of units was Apple II.
- 'PARAM' is a supercomputer.
- Father of the Computer.. Charles Babbage
- CMOS stand for Complimentary metal Oxide semi-conductor

GEOGRAPHY OF EARTH

- Longitude is measured from East to West
- Latitude is measured from North to South of Equator.
- New Zealand is close to Int: Date Line.
- Arabia is the larges peninsula.
- Antarctica is in South Pole.
- The largest latitude circle on earth is the Equator.
- Equinox (equal nights) means the equal duration of day & night.
- Lines drawn parallel to equator is latitude
- 1 hour difference in local time between two places is 15 deg: Longitude
- 23 degree longitude is Tropic of Cancer
- 70% of earth's surface is covered with water
- Isobar is the lines joining places of equal air pressure on a map
- Isohyets are lines joining places of equal rainfall over a period
- Isotherm are Lines of equal temperature
- Contours are places with equal altitude
- There are 36 tectonic plates
- Crust of earth is 0.5%
- Upper part of earth on which earth floats is Asthensosphere
- Earth's speed is greatest when it is closest to the sun
- Spring tide occurs when earth, moon and sun are in straight line
- Isthmus is a narrow land strip separating two seas and connecting two land marks
- Day and night are equal on 21st March (at all parallel of latitude) and 23rd September
- Core of earth is metallic
- Temperature at earth's core is 2000 deg: C
- Tide at its maximum height is spring tide
- International dateline lies along 180 deg: meridian
- Speed of earth rotation is highest at the north pole
- Minimum land area recommended for forest is 25%
- Earth's total surface covered by forests is 15%
- Ordovician are the oldest rock
- Earthquake is a post volcanic activity
- Of total water on earth, fresh water reserves are 2.7%
- Highest grade of coal is Anthracite
- Coal mainly suitable for thermal power production is Bituminous
- First stage of coal formation is Peat.

- Equator is called the great circle
- Mean radius of earth is 6400 km
- Total world surface area is 510 million sq: km
- Soil formed by deposition of silt is Alluvial soil
- Winds blow from areas of high pressure to low pressure.
- Movement of tectonic plates may cause eruption of a volcano
- What creates new islands in the ocean? Volcanoes
- Soil best suited for deep rooted crops is Black soil
- Latitude of south pole is 90 deg:, latitude of equator is 0 deg:
- Humidity in air is maximum in Monsoon
- Earth revolves in its orbit 1 deg: per day
- 1 deg: longitude on equator is equal to 112 km
- Doldrums is a belt of low atmospheric pressure on either side of Equator.
- Removal of rock layer by layer due to weathering is called Exfoliation
- Rocks formed by the solidification of lava are Basalts
- Tundra region gets no rainfall throughout the year
- At equator an object weights the least.
- At 7050 km per hour, Sun rotate on its axis.
- The northern polar lights are called Aurorae Borealis, and southern polar lights are called Aurorae Australis.
- The pulsating universe theory explains the evolution of universe.
- 230 million years ago there was only one huge continent on earth. This super continent is known as Panagea, which means all lands
- In 1912 Alfred Wegener said that continents drift around on earth's surface
- Continental drift means plate tectonics
- Rain forests grow near the equator.
- In autumn deciduous forests glow with brilliant red and gold colors as the leaves dry up and fall off the trees.
- The shape of the earth is an oblate spheroid.
- Arctic is the worlds northmost region.
- The largest latitude circle on earth is Equator.
- 230 million years ago, there was only one huge continent on Earth. This super continent is known as panagea, which means all lands.
- In 1912, a German Scientist called Alfred Wegener (1880-1930) suggested that the continent drift around on Earth's surface.
- The latitude of a point on the Earth's surface is the angular distance of that point measured at the centre of the Earth
- Mass of earth is 6×10^{21} tons
- Density of earth is 5.52.
- Chemically earth id made up of Oxygen 46.6%, Silicon 27.7%, Aluminum 8.1%, iron 5%, Calcium 3.6%
- Earth is divided into four zones.
- Torrid zone lies b/w Tropics of Cancer & Capricorn.
- Torrid zone lies between the Tropics and is bisected by the Equator
- The North Temperate Zone lies b/w Tropic of Cancer & the Arctic Circle.
- The South Temperate Zone lies b/w Capricorn & Antarctic Circle.
- The area around north and south poles within the polar circles is called 'the frigid zone'.

- Hot belt lies b/w latitude 0° & 3°
- Tundra region is a region of high altitude and is without trees.
- **Steppes are the vast, treeless waste of Russia and part of Asia.**
- Moorland is rocky surface.
- Coniferous forests extend up to 13,000 km across North America, Europe & Asia.
- Tropical or Savannah region lies b/w desert & forest. More than $\frac{1}{3}$ rd of Africa is Savannah.
- Pakistan lies in Monsoon land area.
- The three abundant elements in the earth's crust are aluminium, oxygen and silicon. The correct order of their abundance is silicon, oxygen and aluminum (8.1%)
- Inner core is made mostly of iron.
- Meridian is an imaginary circle in sky passing through celestial poles.
- Africa is the 2nd largest continent of the world.
- A wind, which reverses seasonally, is known as Monsoon wind.
- Temperature increases with increasing altitude by 10° C for every 250-meter rise.
- Water vapour turns into clouds in the atmosphere when Dew Point is reached.
- When a warm air is lifted off the surface in temperature depression it is called an Occlusion.
- Afternoon rains in the equatorial region are the result of convectional forces.
- Mediterranean regions are not useful for forestry.
- The best projection to suit the map of Pakistan is conventional.
- The extinct Volcano Peak of Koh-i-Sultan is in Pakistan.
- **Cotopaxi:** is the highest volcano in the world. It is situated in Ecuador.
- **Dust Devil:** is a dusty whirlwind normally a few feet in diameter and about 100 feet tall, sometimes also wider and higher.
- **Earth mass:** The mass of the earth is about 81 times that of the moon.
- **Earth's core:** is mainly composed of iron and nickel. Lithosphere is the innermost layer of the earth.
- **El Nino:** is the weather phenomenon brewing in the tropical Pacific Ocean. It is the largest climate event of the 20th century setting off more global disasters than ever before. El Nino is warming of the waters off Equatorial South America, which causes climate abnormalities around the world. The impact can be flooding drought in California, Brazil, Africa and Australia, severe storms in the Central Pacific and a decline in hurricanes hitting the southeastern United States.
- **Exfoliation:** This type of weathering is common both in the cold as well as in the hot climate regions.
- **Great Circle:** A circle on the earth's surface whose plane passes through its centre, and bisects it into two hemispheres. Two opposing meridians together form a Great Circle. The shortest distance between any two points on the earth's surface is the arc of the Great Circle, which passes through them. 0° latitude forms a Great Circle. (The latitude or longitude 75° W should be combined with 75° E to obtain the Great Circle).
- **Horse Latitudes:** Sub-tropical belts of high atmospheric pressure over the oceans situated in both hemispheres. These

are called Belts of Calm between regions of the Trade Winds and Westerlies of higher latitudes.

- **Hydroponics:** means cultivation of the plants without use of soil.
- **Hyetology:** is the study of rainfall.
- **Kandla:** is a seaport situated at the head of the Gulf of Kutch in Gujarat State.
- **Lapse Rate:** is the rate of change in temperature with increase of altitude.
- **Laterite soils:** Laterite soils are formed by the weathering of laterite rocks. These can be distinguished from other soils by their acidity.
- **Loams (loamy soil):** A mixture of sand, clay and silt is known as loamy soil. Loams are formed where the soils have equal proportion of sand, silt and clay.
- **Local winds and their areas:** Khamsin—Egypt; Zonda—Argentina; Santa Ana—California; Simoon—Iran.
- **Mansarover Lake:** is in Tibet. Near it, the rivers having their source are the Brahmaputra, the Sutlej and the Indus.
- **Maoris (Tribes):** are the original inhabitants of New Zealand.
- **Nitrification:** is the process of conversion by action of bacteria, of nitrates in the soil.
- **Pangong Tso:** is one of the world's highest and brackish lakes in Jammu & Kashmir.
- **Proxima Centauri:** is a star nearest to the earth.
- **Roaring Forties:** are westerly winds.
- **Selvas:** The rain forest of Amazon basin is called Selvas. These are rainy tropical forests.
- **Spring Tides:** are caused when the sun and the moon are in a straight line. The tide on its maximum height is known as Spring Tide.
- **Tsunamis:** are huge sea waves caused by earthquakes.
- **Willy Willy:** is a tropical cyclone of the northwest Australia.

FACTS ABOUT EARTH

- Largest element found in earth crust is Silicon, second is Aluminum
- Polar diameter of earth is 7900 miles
- Equatorial diameter is 7927 miles = 12,756 km
- Earth's polar diameter is shorter than the equatorial diameter by 43 km
- Distance of equator from either of poles is 10,002 km
- World is divided into 24 time zones
- Age of earth is 5 billion years
- Speed of earth in orbit around sun is 8.5 miles/sec = 1600 km/min = 29 km/sec
- Weight of earth is 6586×10^{18} tons
- Earth has 46.6% oxygen and 27.7% silicon
- On 21st June, sun is vertically overhead the Tropic of Cancer
- The South Temperate zone lies between Capricorn and Antarctic circle
- At equator the duration of the day is 12 hours
- 510 million square kilometers is the total surface area of the earth
- Sun is 400 times larger than the Moon.
- About 6 billion people living on the Earth.

- When are you most likely to see a penumbra: During an Eclipse
- At equator an object weights the least.
- **A wind, which reverses seasonally, is Monsoon.**
- Water is the most powerful source of erosion
- Tropic of cancer crosses Pakistan.
- Spring tides occur at new moon or at full moon.
- Neap tides occur at first and third quarters of the moon.
- Oceans are on average 4 km deep.
- Frozen water covers about 10% of the earth
- Solar eclipse occurs on new moon.
- Lunar eclipse occurs on full moon.
- The standard time of England is known as Greenwich Mean Time. T is local time of Greenwich Observatory which on 0° longitude.
- Daylight saving time begun during WWI.
- There are three belts of calm viz: Doldrums, Tropic of Cancer & Tropic of Capricorn.
- Horn of Africa is Ethiopia, Djibouti and Somalia.
- Kimberley is associated with Diamonds.
- In Titusfills in Pennsylvania (US) is world's first oil well drilled.
- Thickness of earth crustes 20 miles.
- Max height of cloud 20,000.

ATMOSPHERE OF EARTH

- Nitrogen gas found in atmosphere is 78%, oxygen is 21%
- Speed of electromagnet ways is 300000 km/sec
- The layer of earth in which we live is Troposphere
- The atmospheric layer closet to earth is Troposphere.
- Weather phenomenon take place in Troposphere
- Atmospheric layer ideal for flying is Troposphere
- Ionosphere reflects radio-waves back to earth
- Nimbostratus clouds bring a long steady rain
- Clouds found at highest altitude are Noctilucent
- Thickness of atmosphere around earth is 145 km
- Atmosphere maintains earth's temperature
- % of insulation received by earth's surface is 51%
- Atmospheric layers are divided into 4 parts
- Sun's heat and energy reaches earth by Radiation
- Air is composed of 78% Nitrogen.
- 21% Oxygen.
- 1% other gases.
- Troposphere is 10 km, Stratosphere is from 10 to 40 km, Mesosphere (Neutraspace) is from 40 to 80 km, Thermosphere (Ionosphere) is from 80 to 370 km and Exosphere (Heaviside) is beyond 370 km.
- Megnetosphere that lies beyond the Exosphere is not the part of atmosphere.
- 3/4th of the air that envelops the earth is in troposphere.
- 97% of the air is below the upper boundary of the stratosphere, which is the maximum height that aircraft may reach with the support of air.
- Smog is when water vapour condenses around a particle of smoke
- Atmospheric temperature increases at higher altitudes due to convection
- Formaula of Ozone is O₃

- CFCs are Chloro Fluoro Carbons
- Earth's atmosphere is over 1000 km deep
- Biosphere is the sphere of life which covers all the three spheres i.e litho, hydro, atmosphere
- Ozone layer is found in Stratosphere.
- Climate is the average weather of a particular place over many years. Weather change day to day, whereas climate remains same for years.
- Every seson, trees add a new ring of growth to their trunks
- Clouds are made of water droplets, ice, crystals, particles of dust and air
- Warm air can hold more water vapour than cold air
- The age of Earth is calculated as 4500 million years.
- Ozone is measured in percentage (chk)
- The amount of ozone in the atmosphere is expressed in ppm/ The amount of ozone in the atmosphere is expressed in dobson units (Check it)
- Air is composed of nitrogen (78.08%), oxygen (20.95%), argon (0.94%) and carbon dioxide (0.03%).
- Nitrogen gas dominates the earth's surface.
- Weathering takes place more quickly in warm, wet area than in cold and dry regions.
- An atmosphere is a blanket of gas that surrounds a plane. Earth's atmosphere is over 1000 kilometers deep, but most of it is in the 30 kilometers closest to Earth.
- Weight of the air pushing on us is known as atmospheric pressure.
- Atmospheric pressure is equal to 14.73 lbs per sq. inch.
- Atmospheric pressure decreases with height.
- In nature the nitrogen of the atmosphere is made available for the plant growth through the activity of bacteria called nitrogen fixation of bacteria in roots of plants. Earthworms provide nitrogenous wastes.
- Ozone is found in stratosphere b/w 20 to 50 km.
- The tidal effect of Moon on the surface of Earth is less that that of Sun because Moon's gravitational pull at Earth's surface is less as compared to Sun's gravitational pull. Tidal effect of sun is 146% of moon.
- Injurious ultraviolet radiations are mostly prevented from reaching the earth as these are absorbed mostly by Ionosphere.

MOUNTAINS

- Mount Olympus is in Greece.
- The mountain range in Russia that is regarded as the boundary b/w Europe & Asia is Urals.
- Margalla Hills of Islamabad are extension of Himaliya range.
- Ural mountains separate Asia from Europe.
- Ordovician are oldest rocks.
- Oldest mountain system is Araveli.
- Youngest mountain system is Himaliyas.
- Andes Mountains are in South America.
- Ring of Fire are volcanoes in Circum-Pacific Seismic belt.
- Alps are Europe's largest mountain system.
- Atlas is North Africa's mountain range. Atlas Mountains are in Morocco.

- The Himalaya mountain range (Asia) is the greatest mountain range in the world.
- Ayers Rock is the largest single rock in the world.
- Mauna kea volcano is in Hawaii
- What is the worlds longest mountain range-The Andes
- Black forest is a mountain in Germany.
- Rocky or Rockies Mountains is the largest mountain system of North America.
- Koh-i-Sultan is in Pakistan.
- Highest mountain system in the world is Himalayas.
- Sefid Koh is mountain range in Afghanistan.
- Blue Mountains are in Australia.
- Mauna Kea volcano is in Hawaii.
- What is the name of the second highest mountain in Africa-Mount Kenya
- In what modern country is mount Ararat-Turkey
- Most active volcano Italiana is situated in Hawaii.
- Mount Everest is in Himalaya range with height 29,028 feet first ascent made on May 29, 1953.
- K2 named Goodwin Austin or Chagori is in Karakoram Range with 28,250 ft height. First ascent made on July 31, 1954.
- Nanga Parbat is in Himalaya range is known as Killer Mountain with height 26,660 ft. First ascent was made on July 3, 1953.
- Broad Peak I is in Karakoram range with height 26,470.
- Tirich Mir is in Hindu Kush Mountain.
- Prince Charles is mountain range in Antarctica.
- Zardak is the highest peak of Kirthar range.
- Where are the glasshouse mountains- Queensland Australia

IMPORTANT MOUNTAIN PASSES

- Namni Pass is in Myanmar.
- Khunjerab Pass is highest pas in Pakistan.
- Alpine Pass is in USA.
- Lowari Pass is in Pakistan.
- Khojak tunnel is in Balouchistan.
- Bolan (Sulaiman range) pass is in Baluchistan.
- Kolpur pass is in Baluchistan.
- Shandur Pass is in Pakistan.
- Donner pass is in California (USA)
- Hispar & Biafo glacier is in Pakistan.
- Siachen glacier is in Karakoram Range.
- Baltoro glacier is in Karakoram Range.
- Chogo Lugma is in Karakoram range.
- Hispar glacier is in Hunza.
- Malaspina glacier is in Alaska (US),
- Tasman glacier is in New Zealand.
- Alpine is the highest mountain pass in the world.
- Siachen, batoro and chogo lugma glaciers are in Karakorum.
- April 1984, India conducted an Operation known as 'Operation Meghdoot' to capture Siachen.
- Siachen Glacier is the Worlds Biggest Glacier outside the two Poles. It is also the world's Highest Glacier that is why it is referred to as "The Third Pole." It is also the World's Highest Battle Ground Ever

- Africa is without glaciers.
- Highest point of Asia is Mount Everest (Nepal-Tibet).
- Mount Aconcagua, highest peak in the western hemisphere, located in the Andes Mountains of western Argentina, near the border with Chile.
- Bodpo La pass is highest pass in Tibet (China) with height 19,412.
- Vesuvius is a volcano in Italy.
- Swat valley is in the mountain range of... hindukash
- Saddle peak is highest peak in Anandaman & Nicobar Islands.
- Karoko tao is a volcano in Indonesia.
- Approximately the southwest monsoon begins in Pakistan in late July.

OCEANS

- Largest ocean is pacific, then Atlantic, Indian and then Arctic.
- Largest sea is South China Sea, then Caribbean Sea, then Mediterranean sea, Behring Sea Gulf of Mexico, Sea of Japan, Hudson Bay, East China Sea, Andaman Sea, then Black sea then Red sea and in the last Baltic sea.
- Sea of Japan is famous for fishing area.
- Total seas are 12.
- Bermuda Triange is located in Atlantic Ocean.
- Diego Garcia is in Indian Ocean.
- The deepest place in the Indian Ocean is Sunda Trench.
- Caspian Sea is located in Iraq-Azerbaijan, Turkmensitan, and Kazakhstan & Russia.
- Caspian Sea is the largest salt-water lake in the world.
- Caspian Sea water is shared by Iran, Russia & Azerbaijan.
- Which sea is sometimes called the Euxine Sea- Black Sea
- What sea is directly north of Poland-Baltic sea
- Arctic Ocean is the smallest ocean.
- Cyprus is an island in the Mediterranean Sea.
- The waters of Caspian Sea are shared by Russia, Iran & Azerbaijan.
- What is the worlds largest sea (in area): South China
- Aral Sea is in Central Asia (Kazakhstan). Aral is an inland sea.
- What is the world's warmest sea- The Red Sea
- Aegean Sea is located in Atlantic Ocean.
- Sargasso Sea is without a coastline.
- Which of the following cause ocean currents? Permanent winds
- Nether land's land is below sea level.
- Atlantic Ocean is called the "Herring Pond".

FAMOUS SEA PORTS

- Abadan is in Iran.
- Alexandria is in Egypt.
- Antwerp is in Belgium.
- Aqaba is in Jordan.
- Bandar Bushehr is in Iran.
- Bristol is in UK.
- Cardiff is in UK.
- Plymouth is in UK
- Le Harve is in France.
- Marseilles is in France.

- New Orleans is in USA.
- Penang is in Malaysia.
- Chalna is in Bangladesh.
- Dammam is in Saudi Arabia.
- Glasgow is in UK.
- Hambrug is in Germany.
- Hochi Minh is in Vietnam.
- Honolulu is in USA.
- Latakia is in Syria.
- Philidelphia is in USA.
- Port Said is in Egypt.
- Rio-de-Janeiro is in Brazil.
- Rotterdam is in Netherlands.
- Tartous is in Syria.
- Valparaiso is in Chile.
- Yokohama is in Japan.
- Zadar is in Croatia.
- Pondicherry is in India south of Chennai.
- Port Hercourt is the 2nd largest port of Nigeria.
- Darwin is the seaport of Australia.
- "Haifa" is the seaport of which country? Israel.
- Seattle seaport is in USA.
- Santos is known as the "Coffee Port" of the world.
- In which US state is its highest mountain- Alaska – Mount McKinley
- Dickson is the seaport of Malaysia.
- Tartus is the seaport of Syria.

FAMOUS STRAITS

- Palk Strait separates India from Sri Lanka.
- Babul Mandab strait separates Arabia from Africa.
- Babel-Mandab strait leads into the Red Sea.
- Red sea is b/w Arabia and Africa.
- Davis Strait separates Greenland from Baffin Island.
- The Davis Strait lies between Canada and Greenland
- Messina strait separates Italy from Sicily.
- Johor strait separates Malaysia from Singapore.
- Bass Strait separates Australia from Tasmania.
- Florida Strait separates Cuba from Florida. It joins Atlantic Ocean with Gulf of Mexico.
- Dover strait separates England from France.
- Gibraltar Strait separates Spain and Africa and joins Mediterranean Sea with Atlantic Ocean.
- Torres Strait separates Australia and Papua New Guinea
- Bering Strait separates Asia from Africa and joins the Red Sea and Persian Gulf.
- Bosphorus Strait connects Black Sea with the Sea of Marmora.
- Dardanelles strait (Turkey) joins Marmora Sea with Aegean Sea.
- Malacca (Indonesia) strait separates Sumatra from Malay Peninsula. It is longest strait in the world.
- Mozambique strait is the broadest strait in the world. It is b/w Mozambique and Madagascar.
- Sunda strait separates Sumatra from Java Island.
- 40% of world oil passes through... Strait of Hormuz

- The gateway to the Gulf of Iran is Strait of Hormuz

WORLD RIVERS

- Third world comprises of 70% of world population.
- Hamun Mashkel Lake (Baluchistan) is salt-water lake.
- Most important crop of Nile delta is Cotton.
- Pak: is 4th among world's largest cotton producers.
- A famous natural bridge is located in Virginia.
- Eskimos live in North America.
- Iberian Peninsula is a part of Europe.
- The number of CARS is five.
- Height of Islamabad is 2000 ft: above sea level.
- The Devil Tower present in US is a volcano.
- Hudson Bay is largest bay and is in Northern Canada.
- Largest gulf is Gulf of Mexico.
- Grand Canal is oldest man made canal for shipping purpose in China.
- Shark bay is in Western Australia.
- English Channel separates England from France.
- Gulf of Sidra is in Libya.
- Red river is in USA.
- Gulf of Lion is in France.
- Churchill waterfall is in Canada.
- Danube River is in Romania (Europe). It pours into Black sea.
- The Volga is Europe longest river what is the second longest Danube
- Volga River is in Russia.
- What is the only river that flows both north and south of equator- The Congo
- New Zealand is situated in the region of Oceania.
- Oxus River (also called Amu Darya) is flowing between Afghanistan and Tajikistan. It is the largest river of central Asia.
- Bari Doab is the area lying between River Ravi and River Beas.
- SURMA is the name of a river.
- Windermere Lake is the largest lake of UK.
- What is France's longest river: Loire
- Hundroo (Hundrubagh) Water Falls are in India.
- An iceberg floating in sea will have one-tenth of its mass above the surface of water.
- Jog Falls are the highest waterfalls in India.
- Which river is in Lebanon? River Latani
- Highest salinity is found in the Great Salt Lake in USA.
- Niagara Falls was discovered by Louis Hennepin
- Madagascar is popularly known as the Island of Cloves
- Niagara Falls was discovered by Louis Hennepin
- River Darling is in Australia.
- Gateway of Pacific is Panama Canal.
- Panama Canal links Pacific Ocean with Atlantic Ocean.
- Panama Canal was opened in 1914.
- Panama Canal links North America with South America.
- Amazon River crosses Equator twice.
- The Amazon river rises in which country-Peru
- Amazon River is largest river in terms of volume. It is in Brazil. It pours into Atlantic Ocean.
- The longest and largest river in Asia is Yangtze.
- The largest river in China is The Yangtze River.

- The Soan and the Haro are the two rivers of Potohar Plateau.
- Aswan dam is constructed on river Nile.
- World's largest earth filled dam is Tarbela.
- Victoria falls are on the border b/w Zimbabwe & South Africa.
- Titicaca is the highest navigable lake in world extending from Peru to Bolivia.
- Lake Baikal is the deepest lake in the world. It is located in Siberia.
- Indus River pours into Arabian Sea.
- After Indus, the longest river is Sutlej in Pakistan.
- The longest river in South Asia is the Brahmaputra.
- Nile River pours its water into Mediterranean Sea.
- Don River pours its water into Sea of Azov.
- Tigris River pours its water into Caspian Sea.
- Lake Mead is a man-made largest lake in the world.
- The largest river in France is Loire
- Most populated lake is Lake Erie.
- Suez Canal is 170 Km long constructed in 1869.
- The Suez Canal was constructed in 1869.
- The Suez Canal links the Mediterranean Sea with the Red Sea. A French Engineer, Ferdinand De Lesseps, constructed the Canal.
- Col. Nasser nationalized the Suez Canal on 26th July 1956.
- Mariana trench is the deepest part in the ocean and it lies in Pacific Ocean. It is also called the deepest seafloor depression in the world.
- River Zambezi flows in Southeast Africa.
- Euphrates flows in Syria and Iraq.
- Mesopotamia is the region b/w Tigris & Euphrates.
- Mississippi river flows in USA. Mississippi is longest river of America.
- Missouri river flows in USA
- Hudson River flows in USA.
- Lake Michigan flows in USA.
- Golden River flows in Alaska, Canada.
- In what country are the Painted Lakes-Indonesia
- Name the river that flows through Baghdad- Tigris
- What city has the most canals- Birmingham
- Suez Canal was acquired by Britain in 1875 and nationalized by Egypt in 1956. It remains closed 1967-75 after Arab Israel War.
- Thames River is in England.
- Seine River is in France.
- Hang He river is in China.
- Victoria Lake forms boundary line b/w Tanzania and Uganda.
- Victoria Lake is in Africa.
- Source River Jehlum is Verinag.
- Lake Superior is the largest fresh water lake in the world. It is located in North America (USA-Canada).
- Lake Victoria is located in Kenya-Tanzania and Uganda.
- Great Bear Lake is located in Canada.
- Huron Lake is in USA-Canada.
- In which country would you find Lake Disappointment
Australia
- The Amazon river dolphins are what colour- Pink
- Which of the following rivers rises in lake Lan-Ka Tso in Tibet?
Sutlej
- Volga River pours its water into Caspian Sea it is longest river of Europe.
- Don is a river of Russia.
- Lake Erie (N.America) is most polluted lake in the world.
- Lake Mead on the Arizona-Nevada is largest man-made lake in USA.
- Baikal Lake is in Siberian desert.
- Palk Bay lies b/w Gulf of Mannar and Bay of Bengal.
- Panama Canal connects Atlantic Ocean with Pacific Ocean.
- 3- Gorges Dam is in China
- Indus originates from Tibet near Mansorowar Lake.
- The Victoria Falls in Africa is located on river Zambezi. It is the highest fall of Africa.
- Mt Merapi is located on Java.
- Which is the longest river in Australia? Murray-Darling
- Gulf Stream is an ocean current named after the Gulf of Mexico.
- The panch Pokhri Lake situated in the Himalaya Mountains is the highest lake in the world.
- Aswan dam is in Egypt.
- Word Tsunami is of Japanese language.
- Largest coral reef is in Australia.
- Colorado River forms Grand Canyon.
- River Rhine is in Western Europe.
- The Victoria Falls is located in Zimbabwe.
- Highest fall of world Angel Falls is on river Carrao Venezuela.
- Niagara fall is in North America b/w America & Canada.
- Ribbon fall is in North America.
- Silver Strand fall is in North America.
- Grand Canal is located in People's Republic of china.
- After Australia, Europe is the smallest continent.
- 'Victoria falls' is located in Rhodesia.
- Deccan Plateau is in Asia.
- Asia is the largest continent and covers about 1/3 of the world's total land area.
- Both the highest and lowest points on the earth are found in Asia.
- The lowest point of Asia is Dead Sea, which is about 397 meter below sea level.
- Dead sea lying b/w Israel and Jordan.
- Asia Minor is a geographical expression, a part to Turkey.
- The world's longest river, the Nile is located in Africa.
- Africa is also known as Dark Continent.
- Highest point of South America is Mount Aconcagua (Argentina) and lowest point is Valdes Peninsula (Argentina).
- Highest Point of North America is Mount McKinley and the lowest point is Death Valley (California, USA).
- Highest point of Africa is Kibo, a peak of Kilimanjaro (Tanzania) and lowest point is Lake Assal (Djibouti).
- Highest point of Europe is Mount El'brus and the lowest point is Caspian Sea.
- Highest point in Antarctica is Vinson Massif.
- Highest point in Australia is Mount Kosciuszko (New South Wales) and the lowest point is Lake Eyre (South Australia).
- The lowest point of the North America is the Death Valley located in California.
- Danube River flows in Austria.
- Victoria River is the chief source of River Nile.

- Dardanelles connects black Sea and Mediterranean.
- Black sea is so called because a dense fog prevails there in winter.
- The river Jordan flows out into the Dead sea
- River Mekong flows in Vietnam.
- River Thames flows in Southern England.
- River boat Gondola is used in Italy's city Venice.
- Hydrespes River is now called the Jhelum River.
- The length of Panama Canal is 50072 miles.
- At the equator, the equation of the day is 12 hours.
- Meridan means mid-day.
- Shale is not a metamorphic rock.

FAMOUS ISLANDS

- St. Helena is in Atlantic Ocean.
- Largest island in Indian Ocean is Madagascar.
- Sumatra is an island in Indonesia.
- The largest island in the world Greenland is located in North America. (Check it)
- Greenland is geographically in America but politically in Europe.
- Kalaallit Nunaat (Greenland) Island (Denmark), the largest island is in North Atlantic
- New Guinea is world's second largest island.
- Virgin Island is a group of 100 Island in W. Indies.
- Canary Island is in Spain.
- The largest Island in the Mediterranean Sea is Sicily.
- Malaqasv (Madagascar) is in Indian Ocean.
- Baffin is in North Atlantic Ocean (Canadian).
- Sumatra is in Northeast Indian Ocean (Indonesia).
- Neaw Zealand is in South Pacific Ocean.
- Borneo Island is in Pacific Ocean.
- Honshu Island is in North West Pacific.
- Great Britain Island is in North Atlantic.
- Victoria Island is in Arctic Ocean.
- Baffin Island is in Atlantic Ocean.
- Ellesmere Island is in Arctic Ocean.
- Galapagos Islands are in Pacific Ocean.
- Indonesia consists of 1300 islands.
- World's largest Delta is Sunderlands (India).
- Paracel Islands are of.... china vs Vietnam
- Which country owns the Hen and Chicken islands: North island New Zealand
- Indian city Mumbai consists of seven islands.
- The famous Island located at the mouth of the Hudson river is Manhattan
- Sugar Island is the located at the confluence of Ganga and the Bay of Bengal.
- Cathy Pacific is an island.

FAMOUS DESERTS

- Thar desert is located in Northwest India and East Pakistan
- Dsh-t-i-Lut desert is in Iran.
- The world's largest desert Sahara is located in Africa.
- Rub Alkali desert is in Saudi Arabia.
- Kalhari desert is in South Africa.

- Gobi desert is in Mongolia & China.
- The Atacama Desert is located in North Chile, South America.
- What is the worlds oldest desert - country named after it-Namib
- Namib Desert is in South-West Africa.
- Simpson Desert is in Australia.
- Great Victoria Desert is in Australia.
- Kalhari desert is in South Africa.
- Arabian Desert is in Egypt.
- Death Valley desert is in California.
- Gibson Desert is in Australia.
- Great Sandy Desert is in Australia.
- Karakum desert is in Turkmenistan.
- Kavir Dasht Davir desert is in Iran.
- Nafud desert is in Saudi Arabia.
- Rub-el-Khali desert is in South Arabian Peninsula.
- Sonoran desert is in Arizona to Mexico.
- Taklimankan is desert in China.
- Deserts in Asia are: Gobi, Karakum, Rub-al-Khali, Taklamakan.
- Takla Makan desert is in Xinjing (China).
- Deserts in Africa are: Kalhari, Namib, and Sahara.

CITIES ON RIVER BANKS

- Venice stands on what river-The Arno
- New York is on River Hudson's bank.
- Budapest is located on the bank of Danube river.
- Paris is situated on the river Rhine.
- River passing through Paris... The Siens
- Paris is located ont eh bank of Seine river.
- Agra is on the bank of Jamuna River.
- On river Danube Budapest is located.
- On river Siene Paris is located.
- Montreal is situated on the bank of river Ottawa
- The city of Bonn is situated in Germany
- Calcutta is situated on Hoogli River.
- Belgrade stands on the river Danube.
- Rome is located beside the river Timber.
- Attock lies on River Indus.
- Baghdad lies on Tigris.
- Bahawalpur lies on Sutlej.
- Basra lies on Shatt-al-Arab.
- Bedford lies on Danube.
- Berlin lies on Spree.
- Bonn (Germany) lies on Rhine.
- Brussels (Belgium) lies on Senno.
- Budapest (Hungary) lies on Danube.
- Cairo lies on Nile.
- Kolkata lies on Hoogli.
- Chittagong lies on Karnaphuli.
- Dhaka lies on Boori Ganga.
- Damascus lies on Barada.
- Delhi lies on Jumna.
- Hyderabad (Sindh) lies on Indus.
- Jhelum lies on River Jhelum.
- Kanpur lies on Ganges.
- Khartoom lies on Blue and White Nile.

- Lahore lies on Ravi.
- London lies on Thames.
- Mosul lies on Tigris.
- Paris lies on Seine.
- Rohri lies on Indus.
- Rome lies on Tiber.
- Tokyo lie on Sumida.
- Sukkur lies on Indus.
- Washington lies on Vistula.
- Wazirabad lies on Chenab.
- Dublin is situated at the mouth of river Liffey
- Moscow is situated on the bank of river Moscow.
- Khartoum is situated on the bank of Nile River.
- Bhawalpur is situated at the bank of Sutlej.
- What city is at the mouth of the Menam river-Bangkok

GEOGRAPHICAL DISCOVERIES

- Eric the Red discovered Greenland.
- Marco Polo (Italian) reached China through India.
- Vescoda gama (Portuguese) discovered sear route from Europe to India.
- Pedro Alvarez Cabral (Portuguese) discovered Brazil.
- George Lord Anson (English) sailed around the earth.
- Charles A.Lindberg (American) made first non-stop solo flight across the Atlantic.
- Various (Portugese) discovered Sri Lanka.
- C.F. Blair (US) made the first solo flight over the Arctic. Sir Vivian Fuchs and Edmund Hillary (US) first crossing of the Antarctic continent.
- G.H. Wilkins (Australian) flew over the South Pole.
- CIS are landlocked countries of Asia.

WORLD COUNTRIES

- Buckingham palace is the residence of British king and Queen is in London.
- 10 Downing Street is the residence of British PM.
- Queen's house is the official residence of Sri Lankan president.
- Great Wall of China was built in the reign of Shih Huang-ti
- Wakhan is a narrow strip of land, which separates Afghanistan from Pakistan.

Ten Largest Nations By Area

1. Russia
2. Canada
3. China
4. USA
5. Brazil
6. Australia
7. India
8. Argentina
9. Kazakhstan
10. Sudan

By Population

1. China

2. India
3. USA
4. Indonesia
5. Brazil
6. Russia
7. Pakistan
8. Bangladesh
9. Japan
10. Nigeria

- Smallest by area and population is Vatican City.
- Second smallest by area is Monaco
- Gibraltar is the smallest colony.
- The world's smallest republic is Nauru.
- Canada has the world's longest coastline.
- Monaco has a shortest coastline of 3.49 miles.
- Largest continuous frontier is b/w Canada and USA.
- Canada is the country with most lakes.
- Most sparsely populated territory is Antarctica.
- Most densely populated continent is Asia.
- Afghanistan, Bhutan, Mongolia, Nepal are landlocked countries of Asia.
- Extreme temperature was recorded in Aziziya (Libya) 58° C in 1922.
- Lowest temp: was recorded at Vostok, Antarctica -89.2° C.
- Highest rainfall is recorded at Cherrapunji (India).
- Greatest snow fall is recorded at Tamarack California (USA)
- Planetary winds consist of doldrums, trade winds and westerlies.
- Alexandria is the famous city of Egypt; it is also an important seaport.
- Rainfall is recorded on maps by Isohyets.

IMPORTANT GEOGRAPHICAL LINES

- A Curzon line is the polish-Russian frontier setup in 1945.
- Dead line is the line or boundary of a military prison, which prisoners are not allowed to cross.
- Green Line is a demarcation line between the Greek and Turkish Cypriot communities.
- Hindenburg line separates Germany from Poland.
- Pak-Iran borderline was demarcated on 24th Sep: 1872.
- Line of control is b/w Azad Kashmir & Occupied Kashmir.
- Mc Mohan line is the boundary line between India and China. It was demarcated in 1914.
- Radcliff line is the boundary between Pakistan and India. It was demarcated in 1947 by Sir Cyril Radcliff.
- 17th parallel line is the boundary line between North Vietnam and the South Vietnam.
- 24th parallel Line lies in Rann of Kutch. It is frontier between Pakistan and India.
- 38th Parallel line is the boundary between North and South Korea.
- 49th Parallel Line is the boundary line between Canada and the USA.
- Plimsoll Lime is a horizontal line on a merchant ship to which a ship the upper limit to which a ship may be legally loaded.

- Dead line is a boundary line around a military prison which prisoners are forbidden to cross.
- Durand line is 1300-mile long frontier b/w Pakistan & Afghanistan demarcated in 1893-95. It has over 200 passes.
- Green line is a painted line in Nicosia (Cyprus) that serves as a demarcation line b/w Greek & Turkish Cypriot communities.
- Maginot line is French line of fortification built in WWII along the German border from Switzerland to Belgium. It divides France from Germany.
- Maginot line divides France from Germany.
- Mannerheim line was defensive fortification *line* on the Karelian Isthmus built by Finland against the Soviet Union.
- Oder-neisse Line was boundary b/w Germany & Poland during WWII.

IMPORTANT STREETS

- Bond Street is located in London. It is famous for tailoring and jewelry.
- Dalal Street is located in Mumbai (India). It is the stock exchange market of Mumbai.
- Drowning Street No. 10 is located at Westminster (England). It is famous for the official residence of the British Prime Minister. It was named after Sir George Drowning, a diplomat under Cromwell and King Charles II.
- Elgin Street is located in Scotland. It is the world's shortest street.
- Young Street is located in Toronto (Canada). It is the longest street in the world.
- Vicolo della virilita is the world's narrowest street.
- Canal Street is the widest street in USA.
- Broadway (USA) is famous for various theaters and cinema halls. It is regarded as biggest street in the world.
- Fleet Street is in London where newspaper offices and press agencies are located.
- The busiest shopping centre of London is Oxford Street
- Lombard Street is located in San Francisco. This street is also called the Crookedest Street. It is the financial centre in San Francisco.
- Wall Street is located in New York. It was built in 1653. It is famous for banking, finance and stock exchange market.
- In which London Street is the US embassy- Grosvenor Square.

GENERAL

- The country, which provides free education at university level, is Sri Lanka.
- The country to adopt gold standard for the first time was UK.
- Roman general Mark Anthony was a poor fisherman.
- 6 people lost lives in the Great Fire of London in 1666.
- Bofors scandal occurred in India.
- First system of English short hand was devised in 1602.
- China is situated in Eastern part of Asia.
- Afghanistan is a landlocked country Central Asia (Chk)
- Bosnia-Herzegovina joined the UN on May 22, 1992.
- Capital of Micronesia is Palikir.
- Costa Rica is a Central American country.
- Equator passes through Brazil.

- After Australia, Europe is the smallest continent.
- Sakhalin Islands enriched with oil reserves are claimed by Russia & Japan.
- Changa Manga is famous for sisham Timber forests.
- The total length of railways in Pakistan is 8875 km.
- Sialkot has the highest annual rainfall.
- The largest district of Punjab by area is Bahawalpur.
- Pakistan Environmental Protection Ordinance was enforced in 1984.
- Frost shattering kind of weather takes place on the valley side above the surface of a glacier.
- Monsoon wind reverses seasonally.
- Kyoto Protocol is an international treaty relating to environmental problems.
- Hazrat Baha-ud-Din Zaklariaya belongs to Chistia order.
- The longest river in South Asia is Brahmaputra.
- The length of river Indus is 2880 km.
- The oldest Hydro-electric Project in Pakistan is in Malakand.
- The oldest barrage on the river Indus at Sukkur was built in 1932.
- Europe has no desert.
- Arabia, Scandinavia & Alaska are called Peninsula.
- The richest fishing ground in the world is North Eastern Asia.
- When one place on the earth is on a bigger eastern longitude then its time will be ahead.
- **Arakan Yoma:** is the extension of the Himalayas located in Myanmar.
- **Cardamom:** Karnataka is the largest producer of cardamom. India is the largest exporter of cardamom in the world.
- **Climograph:** is a graphical representation of the differentiation between various types of climate.
- **Cosmic year:** One cosmic year is equal to the time taken by the sun to complete one orbit around the galactic centre.
- **Date Line, International:** International Date Line is an internationally agreed line drawn parallel to the 180° meridian. It divides the Pacific Ocean into two equal parts. A crossing of the International Date Line entails repeating one day when travelling westwards.
- Aberdeen in Scotland is known for Britain's largest granite-exporting industry. It is known as Granite City.
- Alexander (ship) is the name of the ship in which Charles Darwin toured for five years.
- Which of the following is a characteristic of sedimentary rocks? They are porous
- When does the summer solstice occur in the Southern Hemisphere of our globe? 22nd December
- Mediterranean climate has the characteristic of 'dry summers with great sunshine and rainy winters'
- Precipitation takes place when temperature of moisture in air sharply decreases
- Which of the following processes is related to the formation of Himalayas? Folding
- The term 'Eye' in a cyclone refers to circular region of relatively light Winds
- Gold Harp bridge of Istanbul connects Asia with Europe.
- 193 countries are in world.
- Land occupied by Asia 29.7 %.
- Thickness of earth crusts 20 miles.

- Max height of cloud 20,000.
- Rainfall is recorded on maps by Isohyets.
- 45 Countries are there in Asia, 18 in Latin America.
- A meteorological term for a high pressure is called anticyclone.

UNIVERSE

- Cheron is the moon of Pluto
- Total number of satellites are 31 (chk: 50)
- Blue color of sky is due to Tyndal Effect
- Our solar system contains 50 satellites
- Total planets in solar system are 8
- Distance of sun from earth is 150 million km = 1 a.u (angstrom unit)
- Moon from earth is 385,000 km
- Outer surface of sun is called photosphere
- Sun has 90% hydrogen, 8% helium and 2% other elements.
- Temperature at surface of sun is 6000K and at its center 20 million K
- Venus reflects highest percentage of light
- Morning star is called to Venus.
- Venus is the only planet that rotates clockwise
- Rhea is the fifth natural satellite of Saturn.
- Speed of earth in orbit around sun is 8.5 miles per second.
- The only planet which rotates on its axis from East to West is Uranus
- Uranus is called lopsided planet
- Uranus contain atmosphere of Hydrogen and Helium
- Period of rotation of earth on axis is 1 day or 23 hrs, 56 minutes & 4.09 seconds.
- Period of revolution of Earth around Sun is 356 days, 6 hrs, 9 minutes & 9.54 seconds.
- Volume of Earth is 260 billion cubic miles.
- Weight of earth is 6586×10^{18} tons
- Rings of Saturn were discovered by Galileo in 1610
- Titan, the largest moon in solar system is of Saturn
- Triton is a satellite of Neptune
- Planet referred as Morning Star and Evening Star is Venus
- Venus' atmosphere is 90 times thicker than earth's.
- The temperature of Venus' surface is about 430 deg: C
- Biggest Comet known to man is kohoutek
- Only planet whose day is longer than its year is Venus
- Brightest visible star is Sirus
- Star nearest to earth is Sun
- Atmosphere of sun has 3 layers
- Sun spots are the cooler areas of sun
- In 28 days moon returns to the same position in its orbit
- The light coming from stars give the idea of their temperature.
- A light year is equal to 9.46 trillion km
- Sun radiated energy equal to 10 trillion of TNT explosion
- Mercury is nearest to the sun, smallest and fastest planet, with shortest rotation time. Moon = 0
- Venus is the brightest, hottest, closest to earth and earth's twin in size and mass, has largest quantity of CO₂ Moon = 0
- Earth is most dense, watery, bios planet. Moon = 1
- This is an instrument used for measuring the altitude of a celestial body: **sextant**
- Mars moon = 2- Phobos and Deimos
- Mars is named after the Roman god of war.
- Mars is called Red planet
- Mars is half the size of earth
- Europa is a moon of Mars (chk:)
- Mars contain atmosphere of carbondioxide
- Jupiter is largest, with largest number of satellites, smallest day, with a red spot. Moon = 63
- Jupiter is 11(or 10) times larger than earth
- Europa is the moon of Jupiter.
- CHIIRON is the larges comet in the universe.
- Solar eclipse occurs at new moon
- Sun is 400 times larger than moon
- Lunar eclipse occurs at full moon.
- Halos around the moon are formed because of the phenomenon of (optical phenomena)
- Jupiter is the fastest planet of the solar system
- The Asteroid Belt is found between which of the following planets? Mars and Jupiter
- The visible part of the Sun is called Photosphere
- Corona is the outer most halo of the Sun.
- Mercury and Venus are without Satellites.
- The largest crater on the surface of moon is called to Bailly.
- The earth is calculated to b 4540 million years old.
- A 'shooting star' is a meteor.
- At 7050 km per hour, Sun rotate on its axis.
- 510 million square kilometers is the total surface area of the earth.
- The northern polar lights are called Aurorae Borealis, and southern polar lights are called Aurorae Australis.
- The pulsating universe theory explains the evolution of universe.
- 760 miles/hr is the speed of sound.
- 1480, 00,000 km is the distance from sun to earth.
- Temperature of Sun is 6000 degree C.
- Saturn is least dense moon = 56
- Saturn is the second largest planet.
- Planet with maximum number of moons is Saturn
- Planet with ring is Saturn
- Uranus moon = 12, Uranus gives greenish glow
- Neptune is the coldest, slowest, largest year
- Neptune has 8 moons.
- Rank of earth as per size is Fifth
- Revolution period of earth is 365.25 days
- In a leap year there are 29 days in February
- Earth is older than moon
- Sun light takes 8.3 min to reach earth or 510 seconds
- Time required to moon light to reach earth is 1.3 seconds
- Light can circle earth 7 times in a second.
- Sun is 109 times bigger than earth.
- Light travels fastest in vaccum
- Rhea is the fifth natural satellite of saturn
- Coldest, smallest and farthest planet Neptune
- Asteroids are small planets revolving round the sun
- Sun is the brightest star in the universe
- **A shooting star is called a meteor**
- Our galaxy is spiral known as Milky Way
- Shape of our milky way is spiral

- The milky way extends through the distance of 10^{15} light years
- Super Nova is a dying star
- Nearest spiral galaxy to Milky Way is Andromeda galaxy
- Nearest star to our sun is Alpha Centauri
- Biggest star in our galaxy is Proxima Centauri
- A collection of galaxies is called cluster
- Moon is 81 times lighter than earth
- Moon has 7% reflection as compared to earth (i.e poor reflection)
- Moon has $\frac{1}{6}$ th gravitation as that of earth
- Moon's 59% surface is visible from earth
- Mass of moon is $\frac{1}{8}$ th to that of the earth
- Moon has no atmosphere
- Sun is closer to earth in January
- At perihelion, earth is nearest to sun
- Earth's axis is inclined at an angle of $66\frac{1}{2}$ deg: to the plane of its orbit around the sun or the axis is inclined at $23\frac{1}{2}$ deg: from the vertical.
- Solar cycle is the largest interval between two total solar eclipses about 18 years
- Sun has 27 day rotation period
- Moon's rotation period is equal to the Earth's
- Rotation period of earth is 23hrs, 56min, 4sec
- Earth rotates around on axis pointing towards the Polar Star
- Revolution period is $365\frac{1}{4}$ days = 365.25 days, $\frac{1}{4}$ is added for leap year
- Duration of day at poles is 6 months.
- Equinox means equal days and nights
- Sun's energy is called Insolation
- The visible yellow face of sun is called Photosphere
- The gravity of sun is 28 times greater than that of earth
- Moon completes 13 circles in a year around earth
- Sun is 13×10^{15} times larger than earth
- Maximum duration of solar eclipse is 7 min 40 sec
- Sun reaches its maximum angular distance from Equator at Solstice
- Millions of asteroids orbit the sun in the asteroid belt between Mars and Jupiter
- Asteroids (minor planets) are made of rock, metal or a mixture of both.
- First asteroid discovered was Ceres by Italian astronomer Giuseppe Piazzi in 1801.
- Ceres is the largest asteroid
- Chiron is one of several distant asteroids which orbit between Jupiter and Uranus
- The largest crater on the surface of moon is called Bailly.
- Corona is the outer most halo of the Sun.
- Comet is made of ice and dust
- Edmond Halley was the first to calculate the path of a comet and predict when it would be seen again.
- Halley's comet was named in his honor though he did not discover it.
- The patterns in stars are called constellations.
- In 1930, astronomers finally agreed how to divide the whole sky into 88 areas, which are called constellations.
- Closest star is Gienah
- Speed of light is 3,00,000 km/sec
- Which planet is named after the Roman god of war? Mars
- Galaxies are the families of stars.
- About 80% of galaxies are elliptical and other are spiral
- Elliptical galaxies contain very little gas and dust and hardly any new stars are born in them.
- Spiral galaxies are disk shaped and usually have clouds of dust and gas where new stars are born.
- Light travels at 3,00,000 km/s. the speed at which you can round the world seven times in very second.
- Light takes 8 minutes to reach the earth from sun.
- In space light travels 9461 million million km in a year. Astronomers call this distance a light-year.
- Two planets Earth's could fit side by side inside the Great Red Spot of Jupiter.
- Jupiter's volcanic moon is called IO and other moons are Europa, Ganymede and Callisto.
- Ganymede is the largest moon in the solar system.
- Europa is the moon of Jupiter
- The moon has no atmosphere because its gravitational pull is not strong enough to hold an atmosphere
- Chondrite meteorites are the oldest rocks in the solar system.
- Venus is the only planet that rotates clockwise.
- 'Galileo Satellites', named after their discoverer, are four large moons of the planet
- Mars contain atmosphere of Carbon dioxide and Uranus contain atmosphere of Hydrogen and Helium.
- Venus is about the same size as Earth.
- Venus's atmosphere is 90 times thicker than our. It traps so well that the temperature of Venus's surface is about 430 degree centigrade.
- Closest star is (Gienah) 680,000 million, million, kilometers.
- Nicolous Copernicus (1473-1543) was born in Poland. He was the first to explain the solar system.
- Chiron is one of several distant asteroids with orbits between Jupiter and Uranus.
- In the Solar system there are 2 Mount Olympus's Greece and where-Mars
- What is the brightest star always in the Northern sky-Vega
- The most common element in the universe is Nitrogen.
- Hydra is the largest of the 88 constellations found in the universe. It covers about 3.16 % of the entire sky.
- The M-class supergiant Betelgeuse with a diameter of 700 million kms is the largest star of the universe. It is about 500 times greater than the sun.
- What is the common name for the star Sirius: Dog Star
- Pluto (the Planet) was almost called what name-Zeus
- When a satellite is closest to Earth its position is called Perigee
- 30 km/s is the approximate mean velocity with which earth moves round the Sun in its orbit.
- The earth's reflectivity of solar radiation is termed as albedo.
- Joseph von Fraunhofer was the first to explain the presence of dark lines in the sun's spectrum.
- Light of sun reaches the earth in 499 seconds
- Hale-Bopp comet was the most distant comet ever discovered which became visible in December 1996.
- What is the name of the largest moon of Jupiter-Ganymede

- M31 is the nearest galaxy to us - what is its other name- Andromeda
- The earth is the densest planet of universe .It has density of 5.515 time that of water.
- Halos around the moon are formed because of the phenomenon of optical phenomena.
- What is unique about the pistol star- Brightest in sky
- Name the first teddy bear in space- Mishka 1980 Olympic mascot
- What celestial body gets its name from the Greek long haired Comet
- What's unusual about the moons of Uranus-Named Shakespeare characters

ADVENTURES IN SPACE

- First artificial satellite was Sputnik-I sent by Soviet Union on October 4, 1957
- Sputnik-II on November 3, 1957 took a female dog Laika into space
- On July 20, 1969 US Apollo 11 touched down the moon
- Skylab was launched in 1973 by US.
- What country launched its first space rocket January 1961-Italy
- What happened to Laika first dog in space Suffocated no air burned re-entry
- A Russian space programs name meant East what was it Vostok
- What was the first man made object to leave the solar system Pioneer 10
- Voyager I, spacecraft introduced ring system of Jupiter.
- Escape velocity is 24800 miles/hour or 7 miles/sec
- First human in space is Yuri Gagarin 1961 on USSR
- Apollo crew returned to earth with 382 kg of moon soil
- First space scientist was Henry Quendish
- Man entered in space on 14 October 1957
- First American shuttle to land on moon named "Bamini" in March, 1966
- First woman in space was Valentine Khurachov in 14 June, 1963
- America launched its first space station in 1973
- In 1979 Sky Lab was destroyed in earth's atmosphere
- In 1986, Russia launched its space station Mir
- Hubble telescope launched in April 24, 1990 through Discovery Shuttle
- Apollo XI enabled man to step on moon
- Russian cosmonaut Valery Polyakov holds the record for the longest stay in space. He spent 437 days in orbit in the Mir Space Station.
- The first American Astronaut to go into space was Allen Shepherd.
- First space vehicle to land on moon was Luna-9
- Voyager I, spacecraft introduced ring system of Jupiter.
- Pioneer 10 and 11 launched in 1973 and 1974, voyager 1 & 2 in 1979 and Galileo in 1995 were missions sent to Jupiter
- Astronomers know of over 50 moons orbiting Jupiter.
- Vostok I carried first man in space.
- Telstar, the world's first communication satellite was launched in 1962.

- Mercury project, first manned space programme of USA, carried the first American into space on 5th May 1961.
- Sputnik II, first artificial satellite was launched on 3 Nov: 1957.
- Lovell telescope is at Jodrell Bank (Site for space observatory).
- Yuri Gagarin (Russia) cosmonauts became first traveler in space in 1961.
- The first American Astronaut to go into space was Allen Shepherd
- Russian Cosmonaut Valery Polyakov holds the record for the longest stay in space. He spent 437 days in orbit in the Mir Space Station.
- What was the first food consumed on the moon in Apollo 11- Turkey
- The first person to orbit the earth in space. John Glenn
- Columbia Space shuttle broke up on re-entry to Earth on Feb 1, 2003.
- Skylab was space laboratory launched in 1973 by USA.
- First woman in space Valentine Tereshkova went into space in Vostok 6 on 16 June 1963.
- On July 20, 1969, Neil Armstrong and Edwin Aldrin landed on the moon.

PAKISTAN STUDIES

PRE-PARTITION

- Who amongst the following were the first to invade India? Arabs
- Real name of Mohd: bin Qasim was Amadudin Mohammad (Pillar of Deen).
- Mohd: Bin Qasim was nephew and son-in-law of Hajjaj bin Yousuf the Governor of Iraq (Omayyad Period). He came to Sindh with 12 thousand men.
- Mohd: bin Qasim conquered Sindh during Umayyads.
- Siskar was Wazir of Dahir.
- Mohd: bin Qasim tortured to death in Iraq by Sulaiman.
- The Abbasid governor Hisham came to Sindh in 757 A.D.
- Shabuddin Ghoris was the founder of Islamic State in India.
- Qutubuddin Aibk was the founder of slave dynasty after Ghoris.
- Ghiyasuddin Tughluq was the first sultan of Tughluq dynasty.
- Aurangzeb reimposed 'Jaziya'?
- Ibn Batutah visited India in reign of Muhammad-bin Tughluq
- Babur used artillery in warfare.
- Emperor Shahjahan= Khurram Shihab-ud-din
- Akbar prohibited the practice of Sati?
- Hazrat Nizamuddin Auliya's Dargah is located at Delhi.
- Baba Farid Gang Shakar was the first Punjabi poet.
- Waris shah is called the 'Shakespeare of Punjabi literature'.
- Tomb named Khawaja Moin ud Din Chisti is in Ajmer.
- Hazrat Bullay Shah was a famous Sufi poet of Punjabi language. His tomb is in the city of Kasur.
- Thatta was the capital city of Sindh during Argons and Turkans
- Mohd: bin Tughlaq introduced tokens currency firstly.
- Akbar the Great was born in Umar Kot.
- Shalamar Bagh was built by Shah Jahan (Shahabuddin Mohd: Shah Jahan) (also called Shahzada Khuram)
- Jahan Ara begum was the daughter of Shah Jahan
- Mehmood set out on Somnath on 17 Oct: 1024 A.D.

- 1st battle of Tarrin was fought b/w Mohd: Ghouri & Rajput (1191), Ghoris was defeated. In 1192 A.D, the 2nd battle of Tarrin, Ghoris wins.
- Ahmed Shah Abdali was the King of Kabul.
- Ahmed Shah Abdali defeated Marhahas in 1761.
- Pan Islamism introduced by Jamaludding Afghani.
- Nadir Shah of Iran invaded Delhi during the period of Mohd: Shah Rangila (The Moughal Emperor).
- Original name of Tippu Sultan was Nawab Fateh Ali.
- 4th May 1799 was the day of Shahadat of Tippu Sultan.
- The original name of Sultan Siraj Doullah (the Nawab of Bengal) was Mirza Mohd:
- Battle of Plassey was fought in 1757 b/w Clive and Siraj-ud-Daula which established British rule in Bengal.
- Sindh was annexed by British in 1847 and was separated from Bombay in 1935 vide India Act 1935.
- First war of freedom was fought in 1757 b/w Siraju Doullah and Rober Clive.
- Sh. Ahmed Sirhandi is known as Majaddid Alf Sani.
- Sheikh Ahmad Sirhandi was born in 1564.
- Mausm Khan, soldier of Titu Mir was sentenced to death.
- Hajatullah al-Balaghah written by Shah Waliullah.
- Shah waliullah born in 1703. Shah Waliullah died in 1763.
- Shah Alam II was an ally of Mir Qasim in the Battle of Buxar.
- During Jehangir's reign Sir Thomas Roe and Captain Hawkins visited Moghul court to secure commercial privileges.
- Real name of Shah Waliullah was Ahmed and his historical name was Azimuddin.
- Haji Shareetullah of Bengal was the founder of Farazi Tehriz in 1802. Farazi Tehriz meant to pay more attention on fundamental of Islam.
- Syed Ahmed of Rai Brelli (Oudh) was the founde of Jihad Tehrik against Sikhs. He was martyred at Balakot (NWF) in 1831.
- Battle of Buxar was fought in 1764.
- Haji Shariat Ullah was born in 1781
- The main aim of Brahma Samaj was Reform in Hinduism.
- Raja Ram Mohan Roy founded Brahma Samaj.
- Ani- Muslim Arya Samaj (1877) was founded by Dayanand Sirasoti. Arya Samaj was founded in 1875 (chk)
- In 1805, British made Sri Lanka a colony.
- British annexed NWFP in 1849.
- Wardha scheme written by Zakir Hussain.
- Sati was abolished by Lord William Bantink.
- First census in India made during the period of Lord Mayo.
- Moen-jo-Daro & Herapa discovered in 1922.
- Sir John Marshal ordered digging of Moen jo Daro in 1922.
- East India Company was formed in 1600 in London.
- In India French East India company was established in 1664.
- Raishmi Romal campaign started by Ubaidullah Sindhi before war of Independence.
- War of Independence started on 7th May 1857 from Delhi.
- Lord Canning was the Governor General of India during Sepoy Mutiny.
- In India the first gate of enterance of Europeans was Bengal.
- At Meerath firstly the war of independence was fought.
- War of independence started on 9th May 1857.
- The first Viceroy of the subcontinent was Lord Canning.
- Queen's Proclamation was made in 1858.
- Indian National Congress made by Allan O. Hume in 1885.
- First president of Congress was W.C. Benerjee.
- 72 members attended the first meeting of Congress at Bombay out of them only 2 were Muslims.
- Warren Hastings was the first Governor General of Bengal.
- Hindi-Urdu controversy started in 1867.
- Mohsin-ul-Mulk founded Urdu Defence Association.
- Syed Ahmed Khan born on 17th Oct: 1817 in Delhi & died March 24 1898 at Ali Gargh.
- Sir Syed is buried in Ali Garh Muslim University.
- Tahzibul Ikhlague was published in 1870. (1867 chk)
- Asrar-us-Sanadeed was compiled by Sir Syed Ahmed Khan.
- Sir Syed wrote Loyal Mohammandan's of India & Causes of Indian Revolt.
- Hayate-e-Javed is written by Maulana Hali about Sir Syed.
- In Indai English education was first initiated in Bengal in 1835.
- Shah Waliullah was born in Delhi.
- Shah Abdul Rahim established Madressah Rahimiya.
- Scientific society was established in 1863.
- Albert Bill was presented in 1883
- The British separated NWFP from Punjab in 1901; Lord Curzon was then the viceroy and GG of British India.
- Mohammadan Educational Conference was formed on 27 Dec: 1886 by Sir Syed.
- Muhammadan Literacy Society of Calcutta founded in 1860.
- "Indian Patriotic Association" was founded in 1861.
- Nidwatul Ulema (1884) was founded by Molvi Abdul Ghafoor Qasim Nativi. Nadvat-ul-Ulema was founded in 1894 and Maulvi Abdul Ghafoor was its founder.(Check it)
- Darul-ul Deoband (1867) was founded by Mohd: Qasim Nanavatavi.
- MAO College founded on Jan: 8, 1877 and inaugurated by Governor General Lord Lyton.
- Present Sindhi alphabets made by Sir Barter Frere in 1883.
- Anjuman-e-himayat-Islam was founded in 1884.
- Sindh Madrasa built by Hassan Ali Afandi on 1st Sep: 1885.
- DJ (Diwan Dayaram Jethmal) Science College was opened by Governor of Bombay Lord Reay on 17th Jan: 1887.
- Islamia High School Peshawar was founded in 1890.
- Muslim Aligargh University was established in 1920.
- Treaty of Amritsar took place in 1876.
- Kashmir was sold to Gulab Singh in 1845.
- NWFP was given status of province in 1901.
- Shakespeare (not William Shakespeare) was the governor of Banarus.
- Mohammadan Political Association was formed in 1903.
- Partition of Bengal announced on 1st Sept: 1905 & implemented on 16 Oct: 1905 by Lord Curzon.
- Partition of Bengal annulled: 10th Dec: 1911 by Lord Hardinge.
- Swadeshi movement was started against Partition of Bengal.
- Bengal divided in East Bengal (Muslim Bengal) & West Bengal (Hindu Bengal) in July 1905 by Lord Curzon. Capital of Muslim Bengal was Dacca and that of Hindu Bengal was Calcutta.
- The partition of Bengal was annulled on 12th Dec: 1911 by King George-V and Queen Marry.

- The president of Simla Deputation (1st Oct: 1906) was Agha Khan III and secretary was Mohsanul Mulk.
- Muslim League founded on 30 Dec: 1906 at Decca.
- ML was formed in the annual session of Muslim Educational Conference in Decca with the proposal of Nawab Salimullah.
- The HQ of ML was established at Lucknow.
- Initial membership of ML was 400.
- Mohd: Ali Johr wrote the constitution of ML: The Green Book.
- Inagural session of ML was presided by Nawab Samiullah.
- Inagural address was delivered by Nawab Vikarul Mulk.
- First session of ML was held on 30th Dec: 1907 at Karachi.
- First session of ML held in Karachi 31st Dec: 1907 was presided over by Adamjee Pri Bhai of Bombay.
- The original name of Mohsanul-ul-Mulk was Mehdi Ali Khan.
- Original name of Waqaul Mulk was Molvi Mohd: Shah.
- 1st President of ML was Agha Khan III. (Upto 1913).
- Sir Agha Khan remained permanent president of ML till 1913.
- First VC of Aligarh University was Agha Khan 3.
- Agha Khan III was born in Karachi and was buried in Egypt.
- Real name of Agha Khan III was Sultan Mohd: Shah.
- First secretary general of ML was Hussain Bilgrami.
- 2nd President of ML was Sir Ali Mohd: Khan when Agha Khan III resigned in 1913.
- Sir Mohammad Shafik was the second general secretary of Muslim League.
- Syed Amir Ali established ML London in 1908.
- Quaid attended 1st time Muslim League session in 1912. (chk)
- Quaid resigned from Imperial Legislative Council as a protest against Rowlatt Act in 1919.
- Quaid became ML president 1919-1924 (chk it).
- Quaid joined ML 10 Oct 1913.
- Syed Amir Ali resigned from ML in 1913.
- Quaid resigned from Congress and Home Rule League in Dec: 1920 (Nagpur Session) became ML president in 1916. (chk it)
- Quaid held joint membership of ML & Congress for 7 years i.e from 1913-1920
- He presided the ML Lucknow session of 1916 and Delhi session of 1924, became permanent president of ML in 1934.
- Lord Minto came to India as viceroy in 1915.
- Minto Morley reforms 1909: introduced separate electorates.
- Minto Morley reforms: Minto was Indian Viceroy and Morley was state secretary for India.

GENERAL INFORMATION

- Water vapors are formed due to evaporation
- Gas in gobar (cow dung) is ethylene. (Check it biogas is natural gas)
- GMT was established in 1884
- Radio broad casting started in 1920
- Calorie requirement sedentary is 2500 k.cal, light work is 3000 k.cal, moderate work is 3500 k.cal and heavy work is 4000 k.cal
- Water is 830 times heavier than air
- Driving mirror is usually convex
- Dossier means relevant papers
- In deserts clouds do not precipitate due to low humidity
- Rain drop is shaped like a pear
- Money is made of cotton
- Chino phobia is a fear of snow
- Cyber phobia is a fear of computer
- Fear of heights is Acrophobia
- 1 liter = 0.9 kg
- Drinker's apparatus is for measuring the amount of Alcohol in the blood.
- Atomic pile is a place where nuclear fission is made.
- Dewar's flask is called as thermos.
- Atomic weight of chemical compounds is determined by Mass spectroscopy.
- Tube light emits radiation even after it is disconnected. It is due to Fluorescence
- The conversion of gases into liquid under high pressure and low temperature is called regulation.
- If a green leaf is seen in a red light its color will be black.
- Emerge of VIBGYOR from one side of the prism is due to refraction and dispersion of light.
- 510 million square kilometers is the total surface area of the ear
- Linseed oil is used while oil painting.
- During the winter months 90% of fallen leaves are taken underground by earth worm
- Cox orange pippen is a biological name of an apple
- Breitling orbiter 3 was the first balloon to fly non-stop around the world

- Aircraft designers test their model of aircraft in wind tunnel
- Aircrafts are made of alluminium alloys
- Flaps are used as air brakes
- Darwin visited Galapagos Island before giving his theory of Natural Selection.
- Staple food is the basic food
- The crops like legumes and beans and clover form their own fertilizer. Farmers grow these crops and plough into soil as fertilizers. This process is called green manuring.
- Scientists have recently discovered a new taste called Umami.
- Braille system is named after its inventor the Frenchman Louis Brille.

FIRST, LARGEST, BIGEST, LONGEST, OLDEST

- What is Europe's largest port-Rotterdam
- What was first used at the 1904 St Louis Olympic games-Gold medals silver was first before
- Where is the worlds oldest university- Fez Morocco –founded 859
- What is the largest Island in The Greater Antilles- Cuba
- What is the worlds most polluted major city-Mexico City
- What is the worlds fastest moving insect-Tropical Cockroach
- Where is the largest church in the world-Vatican in Rome
- What was the first country to use postcards- Austria
- Where is the worlds largest Chinese settlement outside Asia San Francisco – Chinatown
- Which country has no national monetary unit of it's own Andorra
- Which country has the highest % of women in their legislature Cuba
- Which country has the most daily newspapers- India
- Which city was built in the design of a union flag Khartoum

- Mount Everest (2759 N 8656 E) is the highest mountain peak, which is located on Nepal Tibet border in the Himalayas.
- New Cornelia tailings on ten mile wash Arizona USA with a volume of 209500 million cubic meters is the world's largest volume dam.
- Taipei-I built in Taiwan is world's second tallest building..
- The Atacama Desert in Chile is the driest place of the world and Masynram in Assam (India) is the wettest place in the world.
- Canada has the longest coastline, which is 151,489 miles in the length, and Monaco's coastline measures only 3.5 miles in length.
- Dalol Danaki depression in Ethiopia with an average annual temperature of 35c (95f) is the hottest place on earth and

- Plateau station, in Antarctica with an average annual temperature of -56.7°C (-71.7°F), is the coldest place of the globe.
- Grand central terminal of New York is the largest railway station. It covers an area of 48 acres.
 - The Seikan railway tunnel in Japan is the longest railway tunnel in the world, its length is 33.50 miles (53.9 km)
 - Longest road tunnel is St. Gothard Rd. located in Switzerland 16.3 km long.
 - The yellow stone national park (USA) is the largest national park. It has an area of 3350 sq miles.
 - The California University (USA) is the biggest university of the world.
 - King Khalid international airport, Riyadh (Saudi Arabia) is the largest airport in the world.
 - The port of New York and New Jersey (USA) is the largest seaport in the world.
 - Mandarin (Chinese) is the most spoken language of the world. It is estimated that a total number of 999 million ppl speak it.
 - The noble prize is the largest prize. Each prize carries an amount of one million dollars.
 - Shah Faisal mosque located in Islamabad (pak) is the largest mosque.
 - Ostrich is the largest bird in the world.
 - Saudi Arabia is the largest exporter of oil in the world.
 - The longest river in Asia is Yangtze
 - The world's largest Internet search engine is Google.
 - After United states, the largest number of inventions in the last two decades belongs to Germany
 - China has the largest population, Russia has largest land area and Vatican city has smallest population and land area in the world
 - Lord Clive was the first and Lord Mountbatten was the last British ruler of India.
 - Largest continent of the world is "Asia" and smallest is "Australia". Largest ocean of the world is "Pacific ocean" and smallest ocean is "Indian ocean". The Sahara is the largest desert of the world.
 - Kazakhstan is the largest Muslim country in land area in the world. It has an area of 1,049,000 sq.miles. Maldives is the smallest Muslim country in land area of 115 sq. miles.
 - Indonesia is the most populous Muslim country and Maldives is less populous Muslim country.
 - Antarctica is the uninhabited continent of the world, which is without any regular population.
 - Seoul (South Korea) is the most populous city of the world.
 - The lake Baikal of Russia has the maximum depth of 5315 feet.
 - Turkey is the country having its land in two continents
 - The world's longest current reigning monarch is Queen of England.
 - Germany is the highest solar energy user in the world.
 - Inflation means that money falls in value.
 - The Cambodian Language is the language with most Alphabets. It has a total number of 74 alphabets
 - The Ostrich of North Africa is the biggest bird. Its height is up to 2.7 meters (9 feet) and weight is up to 160 kgs. While the humming bird is smallest bird. It is 5.5-20 cm in length and weight about 16 grams.
 - Glaciers are found on every continent except Africa. The Lambert Glacier enjoys the distinction of being the largest glacier in the world. It is located in the Australia Antarctic Territory. Its length is 440 miles (700 km) and was discovered in 1956-57.
 - The largest museum in the world is the American Museum of Natural History
 - The lowest mountain range in the world is the Bhieu-na-Bhaile
 - The country known as the Land of Cakes is Scotland
 - The place known as the Garden of England is Kent
 - The old name of Taiwan was Formosa
 - The largest bay in the world is Hudson Bay, Canada
 - The largest church in the world is Basilica of St. Peter, Vatican City, Rome
 - The tallest statue in the world is the Motherland, Volgograd Russia
 - The world's loneliest island is the Tristan da Cunha
 - The country whose National Anthem has only music but no words is Bahrain
 - The largest cinema in the world is the Fox theatre, Detroit, USA
 - The country where there are no Cinema theatres is Saudi Arabia
 - The world's tallest office building is the Sears Tower, Chicago
 - The country where military service is compulsory for women is Israel
 - The country which has more than 10,000 golf courses is USA
 - The country which built the first powerful long range rockets is Germany
 - The largest temple in the world is Angkor Wat in Kampuchea
 - The largest dome in the world is Louisiana Superdome, New Orleans, USA
 - The largest strait in the world is Tartar Strait
 - The largest city of Africa is Cairo
 - The founder of KODAK Company was Eastman
 - The Cape of Good Hope is located in South Africa
 - The last letter of the Greek alphabet is Omega
 - The place known as the land of Lincoln is Illinois
 - The Patagonian desert is located in Argentina
 - The person known as the father of aeronautics is Sir George Cayley
 - The most densely populated Island in the world is Honshu
 - The two nations Haiti and the Dominican Republic together form the Island of Hispaniola
 - The largest auto producer in the USA is General Motors
 - The first actor to win an Oscar was Emil Jannings
 - The first animated colour cartoon of full feature length was Snow White and Seven Dwarfs
 - The first demonstration of a motion picture was held at Paris
 - The first country to issue stamps was Britain
 - The world's largest car manufacturing company is General Motors, USA
 - The world's biggest manufacturer of bicycles is Hero cycles, Ludhiana
 - The world's oldest underground railway is at London
 - The last French Monarch was Louis Napoleon III
 - The first man to reach Antarctica was Fabian Gottlieb
 - Oldest surviving building in world is pyramids of Egypt.

- K-2 is also known as Godwin Austin, first climbed by Ardito Desio 1956.
- Mount Everest is the highest mountain located in Himalaya (Nepal).
- Tensing and Hillary were the first human beings to set foot on the top of Mt. Everest. Tensing belonged to India and Hillary is a native of New Zealand.
- K2 is the second highest peak located in Korokoram (Pakistan).
- Mount Everest was named after Sir George Everest.
- Mozambique has the lowest GNP.
- The biggest airport in the world is King Khalid situated in Saudi Arabia.
- Nauru is the smallest republic of the world.
- Capital with highest elevation La Paz.
- Largest Dam, Grand Coulee Dam is in USA.
- World's biggest museum is British Museum.
- Volta Lake (Ghana) is the largest artificial lake of the world.
- Largest zoo is in South Africa.
- Largest Hydroelectric power station is in Brazil.
- Largest palace is in Brunei.
- Longest railway tunnel is Seikan Railway Tunnel, in Japan.
- The largest railway tunnel in the world is the Oshimzu Tunnel, Japan (Check it)
- Longest underground railway Tunnel is in Moscow.
- Grand Central Terminal of New York is the largest railway station of the world.
- Biggest Library is Congress Library in USA.
- Largest Stadium is in Czech Republic.
- Country with largest coastline is Canada.
- Country with largest budget is USA.
- The highest birth rate is of Malawi.
- Peru with lowest birth rate.
- Country with most billionaires is USA.
- Walt Disney is the man with highest number of Oscars.
- The world's longest platform is known as the Loop, which is located in USA.
- Monaco has the shortest coastline.
- The biggest Square the Tiananmen Square is in China.
- Largest Tomb the mount li tomb is in China.
- The longest cricket match between England and South Africa in 1939 abandoned after 10 days.
- Largest number of school is in China.
- Largest fort, Fort George situated in UK.
- The largest church of the world is in Rome (Italy).
- Largest exhibition centre is in Germany.
- Lake Victoria is the largest lake of Africa.
- The film Ben Hur won the most (11) Oscar Awards in 1959.
- World's largest mosque is shah faisal mosque.
- Largest capital is Ottawa.
- Tibetan Plateau has highest elevation.
- Smallest continent is Australia.
- Least populated Muslim country is Maldives.
- City with largest elevation is Lhasa.
- Largest Bay is Bay of Bengal.
- Largest delta is in Bengal created by the river Bharamputra and the Ganges.
- Largest gulf is the Gulf of Mexico.
- Largest water reservoir is Own falls (Uganda).
- Largest dam by volume is Kiev dam (Ukrain).
- Biggest dam is Pati dam (Argentina).
- Hottest place is Aziziyah, Libya.
- Coldest place is Plateau station (Antartica).
- Driest place is Atacama Desert in Chile.
- Biggest national park is yellow stone national park.
- Biggest university is California university (USA).
- Largest battle ship is USS Missouri.
- Largest seaport is port of Net York and New Jersey (USA).
- Most spoken language is Mandarin Chinese.
- Largest mosque is Shah Faisal Mosque at Islamabad.
- Largest church is Chatholic Basilica (Vetican Rome).
- Largest university is university of New York USA.
- Oldest civilization is Sumerian civilization (Mesopotamia).
- Oldest town is Jericho (Jordan).
- Largest land mammal is African Elephant.
- Longest strait is the Strait of Malacca.
- Tallest animal is Giraffe.
- Largest bird is ostrich.
- Smallest bird is humming bird.
- Largest bank of the world is Dutch Bank of Germany.
- The country with most refugees is Iran.
- Country with most islands is Indonesia.
- First Muslim dynasty in India is slave dynasty.
- Highest birth rate is of Malawi (Africa).
- Lowest birth rate is of Peru.
- Highest death rate is of Peru.
- Lowest death rate is of Kuwait.
- A richest woman is Queen Elizabeth.
- The largest of oil consumer is USA.
- The largest oil field is Ghawar Oil field (Saudi Arabia).
- Tallest tower is CN Tower Toronto (Canada).
- Busiest airport is O'Hare International Airport (USA).
- Oldest capital city is Damascus (Syria).
- Largest constellation is Hydra.
- Fastest bird is Pregrine Falcon.
- Largest metropolitan is Mexico City.
- Biggest park is the wood Buffalo national park.
- Densest population is of Bangladesh.
- Longest canal is Volga Battic canal.
- Longest day 21 June and shortest day December 21.
- Largest diamond is Cullinan.
- Longest big ship canal is Suez Canal.
- The smallest ocean is Arctic Ocean.
- Reticulated python is the longest snake in the world.
- Urengoi (Russia) is the largest natural gas reserved.
- The Bamboo has the fastest growth rate. It grows up to 3 feet in 24 hours.
- Trans-Siberian railway line is the longest in the world.
- Roxy is the biggest cinema house of the e world. It is located in New Your (United State).
- The largest telescope of the world called Keck-I, is located in Hawaii (USA).
- Jean Bernard is the deepest cave in France.
- The fastest flying bird in the world is Falcon.
- Largest peninsula is Arabian Peninsula.

- Mariana Trench is the deepest part of Pacific.
- The longest railway station is located in Japan.
- Polus Nedostupnostir is the coldest place on earth.
- Tallest Lighthouse "Steel Marine Tower" is in Japan.
- The biggest delta in the world is the Sunderbans
- The city which is the biggest centre for manufacture of automobiles in the world is Detroit, USA
- The river which carries maximum quantity of water into the sea is the Mississippi
- Valentina Treshkova (USSR) was the first woman astronaut who orbited the earth in the year 1983.
- The American astronaut Neil Armstrong was the first man to steps on the surface of moon on 21 July 1969.
- Largest producer of silver is Mexico.
- The largest producer of carpet is Iran.
- The largest producer of cheese is USA.
- The largest producer of cotton is USA.
- The largest producer of Jute is Bangladesh.
- The largest producer of Rice is China.
- The largest producer of Silk is China.
- The largest producer of Steel is USA.
- The largest producer of Sugar is India.
- The largest producer of Tea is India.
- The largest producer of Wheat is USA.
- The largest producer of Wool is Australia.
- The largest producer of gold is South Africa.
- The largest producer of oil is Saudi Arabia.
- The largest producer of coffee
- The largest producer of tin is Malaysia.
- The world's leading banking center is Zurich.
- Most Spoken Language is Chinese.
- World's largest fish catching country is China.
- Muhammad Fathullah Khan Kandahari's *translation*: Printed in 1861, Bhopal, India, It is the *first* known *translation* of the holy *Qur'an* in Pashto
- The *first translation* of the *Quran* into a Western language was made into Latin. It was carried out by Robertus Rotensis and Hermannus Dalmata in 1143.
- South China Sea is the largest sea.
- What country is the world leader in Cobalt Mining-Zaire
- What animal has the best hearing-Bats

- Kilauea situated in Hawaii (US) is the most active volcano of the world
- Robert E. Perry (1856-1920) an American explorer reached North Pole on 6th April, 1909 for the first time in human history.
- In what country was the worlds first wildlife sanctuary set up- Sri Lanka 3rd cent BC
- Longest land frontier is of China.
- Highest % of land under cultivation is in India.
- World's oldest university al-Azhar is in Egypt.
- Smallest continent is Australia.
- Yum located in Arizona (USA) is the sunniest place of the world. It gets sunshine in 91 % possible hours
- The longest continuous war was the thirty-year war between various European countries from 1618 to 1648. While the shortest continuous war was between UK and Zanzibar, which lasted from 90 am to 9:45 am on 27th august 1896.
- China had the maximum number (861878) of primary schools. India was at the top with 241,129 secondary schools in 1994.
- USA is the country with 109 nuclear reactors, followed by france 56, japan 51
- Which country grows the most fruit: China
- Elgin Street is located in Scotland. It is the world's shortest street.
- Young Street is located in Toronto (Canada). It is the longest street in the world.
- Vicolo della virilita of Italy is the world's narrowest street.
- Canal Street is the widest street in USA.
- Fastest animal is cheetah.
- Slowest animal is Snail 2 to 3 feet per minute.
- Biggest bell is Great bell at Moscow.
- Fastest bird is Indian swift.
- Largest bird is Ostrich.
- Smallest bird is Helena's humming bird.
- Bird that never makes its nest is Cuckoo.
- Wingless bird is Kiwi.
- Longest canal is the Volga-Baltic.
- Highest capital is La Paz (Bolivia).
- Deepest cave is Reseau Jean Bernard (France).
- Biggest cinema house is Roxy (New York).
- Largest Church is Episcopalian Diocese (New York).
- Biggest city (by population) is Tokyo.
- City largest by area is Kiruna (Sweden).
- Largest continent is Asia.
- Smallest continent is Australia.
- Largest coral formation is The Great Barrier Reef (Australia).
- Longest corridor is Rameshwaram temple corridor.
- Highest country is China (Tibet region).
- Largest country by population is China.
- Largest country by area is Russia.
- Smallest country by area is Vatican City State.
- Highest dam is Rogunsky.
- Largest concrete dam is The Grand Coulee, USA.
- Longest Day in Northern Hemisphere is 21st June.
- Shortest Day in Northern Hemisphere is 22nd Dec:
- Largest Delta is Sundarbans (Bangladesh).
- Hottest desert is Libyan Sahara.
- Largest desert is Sahara (Africa) 33, 20,000 sq. miles.
- Highest desert is Atacama (Chile).
- Largest diamond is Cullinan.
- Largest diamond mine is Kimberley (South Africa).
- Largest dome is of Astrodome, Houston (USA).
- Biggest flower is Rafflesia (Java, Indonesia).
- Lightest gas is hydrogen.
- Longest glacier is Lambert (Antarctica).
- Largest gulf is Gulf of Mexico.
- Largest gorge is Grand Canyon.
- Hottest place is Dalol (Ethiopia).
- Largest Island is Greenland.
- Largest underground lake is Drachenhauchloch cave (Arizona).
- Largest man-made lake is Lake Mead Arizona.
- Biggest library is Congress Library (USA).
- Longest lifespan of animal is of Giant tortoise.
- Largest mammal is Blue whale.
- Highest melting point is of Tungsten, 3410° C.
- Tallest Minaret is Qutub Minar (Delhi) 238 feet.
- Largest mosque is Shah Faisal Mosque, Islamabad.
- Highest mountain peak is Mt. Everest (Himalaya).
- Tallest mountain range is The Himalaya range with 96 of world's 109 tallest peaks.
- Longest mountain range is Andes (South America).
- Biggest museum is British Museum (London).
- Largest Commercial Ocean is Atlantic Ocean.
- Youngest ocean is Atlantic Ocean.
- Meditterian Sea means 'sea in the middle of land'.
- Saltiest ocean is Mediterranean Ocean.
- Ocean shrinking and growing is Atlantic Ocean.
- Fastest ocean swimmer is Sailfish (68 mph).
- Biggest palace is Vatican.
- Biggest park is the Wood Buffalo National Park, Alberta, Canada.
- Biggest passenger train is Queen Elizabeth (UK).

- Largest peninsula is Saudi Arabia.
- Coldest place is Verkhoyansk (Russia).
- Driest place is Death Valley (California).
- Hottest place is Azizia Libya Africa.
- Longest railway platform is Khargpur, India
- Highest plateau is Pamir, Tibet.
- Longest poisonous snake is King Cobra.
- Largest port is Rotterdam (Netherlands).
- Largest railway station is Grand Central Terminal.
- Longest railway line is Trans-Siberian Railway.
- Rainiest spot is Cherrapunji.
- Largest man-made reservoir is Angara River Russia.
- Largest river basin is Amazon River.
- Longest river dam is Hirakud Dam India.
- Largest river in volume is Amazon (Brazil).
- Longest river is Nile (Egypt).
- Largest sea bird is Albatross.
- Largest space centre is Cape Kennedy (USA).
- Largest stadium is Straho Stadium Prague.
- Tallest statue is Statue of Liberty (NY).
- Largest suspension bridge is Verazano-Narrows, NY.
- Longest swimming course is English Channel, UK.
- Broadest strait is Mozambique.
- Longest strait is Malacca.
- Biggest Telescope is Astro Physical Observatory.
- Largest temple is Angkor Vat (Cambodia).
- Longest non-stop train is Flying Scotman.
- Highest town is Wenchuan, Tibet (China).
- Tallest tower is CNN Tower, Toronto, and USA.
- Longest road tunnel is Seikan (Japan).
- Highest volcano is Cotapaxi (Ecuador).
- Largest volcano is Mauna Loa (Hawaii)
- Philippines has the greatest number of volcanoes in the world.
- Longest wall is Great Wall of China 1550 miles long.
- Highest waterfall is Angel (Venezuela)
- Lowest body of water is Dead Sea.
- Biggest zoo is Etosha National Park, Namibia.
- In 2650 the first Pyramid was built in Egypt.
- In 776 First Olympic Games were played in Greece.
- Alexander invaded India in battle of Hydaspes.
- Emperor Theodosius banned the Olympic games.
- Sun and Moon pyramids are in Mexico.
- Rock temple was built at Jerusalem.
- The largest tea producing country is India.

- 1480, 00,000 km is the distance from sun to earth.
- Temperature of Sun is 6000 degree C.
- Neut state in which atomic state of an element as a result of chemical reaction in which it is more active than in ordinary molecular state.
- Islam was introduced to China in the middle period of the seventh century.
- Drinker's apparatus is for measuring the amount of Alcohol in the blood.
- Atomic pile is a place where nuclear fission is made.
- Dewar's flask is called as thermos.
- Atomic weight of chemical compounds is determined by Mass spectroscopy.
- Chief food of mosquito larva is microorganism found in water.
- Chief food of butterfly larva is leaves of plants.
- Corn adds more oxygen to the atmosphere than it removes.
- Euspongia is known as natural bath sponge.
- Live Fluke, biologically called Fasciola, is found in liver of sheep.
- Earthworm is a bi-sexual.
- Eyes of insects are compound.
- Silk is obtained from cocoon of silkworm.
- Clinical thermometer usually measures in Fahrenheit.
- Tube light emits radiation even after it is disconnected. It is due to Fluorescence.
- The conversion of gases into liquid under high pressure and low temperature is called regulation.
- If a green leaf is seen in a red light its color will be black.
- Emerge of VIBGYOR from one side of the prism is due to refraction and dispersion of light.
- Skin does not excrete oil.
- Plants growing in extremely dry condition are called Xerophytes.
- Roots absorb water from soil, which is Hygroscopic.
- Legumes increase the fertility of the soil by adding nitrogen to the soil.
- New varieties of organisms can be brought about by hybridization.
- Male child is born if xy chromosomes are united.

- Fertilization is fusion of two gametes of different strains.
- Fruit developed from single ovary is called simple fruit.
- Seeds are developed from Ovule.
- Parthenocarpic fruits are seedless fruits.
- Grains swell in water due to imbibitions.
- Chlorophyll contains magnesium.
- Mahalanobis model laid great emphasis on development of heavy industries.
- Oxidation is the process in which electron is lost.
- The rate of transpiration depends upon frequency of Stomata.
- Light is necessary for photosynthesis because it produces ATP and reducing substance.
- Oxygen liberated from photosynthesis comes from water.
- Red light is most suitable for photosynthesis.
- Respiration means food oxidation and evolution of energy.
- Chemical preservation of dead organisms in liquid is called Cryo-Biology.
- The organisms, which are the only living member of their group and link two major groups, are called Living Fossil.
- Mammals cannot be cold blooded.
- Trypanosome a parasite causing sleeping sickness.
- Half time is a time of radioactive substance taken by that substance to decompose radioactivity to half of its weight.
- Watson and Crick gave structure of DNA.
- In Nuclear DNA is concentrated in chromatin.
- Proteins are synthesized by golgi bodies.
- Cellulose respiration is done by Mitochondrion.
- Light energy is stored in the form of chemical energy due to the activity of Chloroplast.
- Protoplasm is a colloidal solution.
- Voltammeter is an electrolytic cell for conducting electrolytic dissociation of electrolyte.
- In cryptogams, the sex organs are primitive and hidden.
- Thallophyta include algae, fungi, and lichens.
- Carl Linneus is famous for binomial system of nomenclature.
- Angiosperm includes the plants, which have covered flowers and covered seed.
- Plant cells resemble animal cell because having a cell membrane made up of protoplasm.
- Snake have been evolved from lizard.
- 510 million square kilometers is the total surface area of the earth.
- At 7050 km per hour, Sun rotate on its axis.
- The northern polar lights are called Aurorae Borealis, and southern polar lights are called Aurorae Australis.
- The pulsating universe theory explains the evolution of universe.
- Plants in which seed are outside the fruit are called Gymnosperms.
- 0.200 grams are equal to one carat.
- One million cycles per second is called Megahertz.
- Linseed oil is used while oil painting.
- Smell is the weakest sense in Birds.
- Owl can rotate his head to 180 degrees on either side.
- Ostrich eat pebbles for helping digestion by grinding up the ingested food.
- The cuckoo sneaks its eggs into other birds' nest to hatch.
- Dyne is a unit of Force.
- **Birds are warm-blooded animals.**
- Birds bones are hollow.
- Oven birds build strong nests.
- Weaver birds are called to the birds who build their nests.
- Male birds are more colorful than females.
- Birds do not fly are penguins, emus, kiwis, ostriches.
- Breitling orbiter 3 was the first balloon to fly non-stop around the world.
- Aircraft designers test their model of aircraft in with tunnel.
- Flaps are used as air brakes.
- Amphibians were the first vertebrates.
- There are three stages of frog. Egg-tadpole-adult frog.
- Metamorphosis - > a series of changes.
- Konrad Lorenz (1903-1989) was one of the first to study animal behavior.
- Survive very cold weather or very dry weather by going into a deep sleep. Surviving cold condition like this is called hibernation. Sleeping through hot, dry condition is called aestivation.
- A.D means in the year of our Lord.
- Amal is radical Lebanese Shi'ite military force established in 1970 by Musa Sadr.
- Balfour Declaration was issued in 2 Nov: 1917.
- Yugoslavian city Skopje was destroyed by earthquake in 1963.
- Bootlegging is a form of smuggling.
- Religion of Chinese people is Confucianism.
- Fresco is a method of painting on plaster (usually a wall) meaning fresh.
- Kleptomania is an irrational urge to steal.
- Intifada is Palestinian uprising.
- Long March was 9600 km journey organized by Mao Tse Tang in the year of 1931-1934.
- Vnukovo Airport is located at Moscow.
- Mercury Project first manned space programme of USA, carry the first American into space launched on 5th May 1961.
- Pan-Islam originated in 1880 in Ottoman Empire was a movement for uniting the Islamic Nations.
- Chinese invented paper in 3500 BC.
- Printing was invented by Chinese.
- Unity, faith & discipline was used by Quaid on Dec: 28, 1947.
- Philately is the hobby of stamp collection.
- Oscar Award was introduced by Louis B Mayer of Metro Goldwin-Mayer Academy Award in 1927.
- First black president of South Africa was Nelson Mandela his party was banned in 1961 and he was imprisoned.
- Feminism is the belief that women subordination to men should end.
- Nickname of Atomic Bomb dropped on Hiroshima in 1945 was Little Boy and on Nagasaki=Fat Man.
- Balfour Declaration issued in 2 Nov: 1917.
- Yugoslavian city Skopje was destroyed by earthquake in 1963.
- Bootlegging is a form of smuggling.
- Riverboat Gondola is used in Italy's city Venice.
- **Hydaspes River is now called the Jhelum River.**
- Dinosaur means "Terrible" lizard.

- The name of heaviest dinosaur was Branchiosaurus.
- Fresco is a method of painting on plaster it means fresh.
- Universal Declaration of Human Rights was adopted in 1948.
- Kleptomania is an irrational urge to steal.
- Ikhwan as Safa, a secret Arab organization was founded in Basra, Iraq.
- Intifada is Palestinian uprising.
- Long March, a 9600-km journey in 1934 was undertaken by Chinese Communists under Mao De Tong.
- Vnukovo airport is in Moscow.
- **Pan-Islamism, a movement for uniting the Islamic Nations was started in 1880 in Ottoman Empire.**
- Paper was invented in 3500 B.C by Chinese.
- Great Pyramid at Giza is the largest Pyramid built in Egypt.
- St. Vitus's Dance is a disease.
- Resin is sticky liquid that emits from plants.
- Pyramids of Egypt is the oldest and only survived wonder.
- Guru (teacher) Nanak was the founder of Sikhism.
- **Silk was made firstly in China.**
- Skylab was space laboratory launched in 1973 by USA.
- The first tanks were used in 1916 during WW-I by British.
- Harvard University is in USA, Cambridge is in UK
- Titanic sank on 14 April 1912 on voyage from Southampton to New York City in North Atlantic.
- Tour De France is French cycle race.
- First woman in space Valentina Tereshkova went into space in Vostok 6 on 16 June 1963.
- Watergate scandal involved President Richard Nixon in 1972.
- Parsis follow Zoroastrianism.
- **Seattle is the seaport of USA.**
- Dickson is the seaport of Malaysia.
- At Hyde Park London public meetings are assembled.
- Red Square is in Moscow.
- Eskimos live in Igloo.
- Blitzkrieg means sudden attack.
- Dragon is the symbol of China.
- Bear is the symbol of Russia.
- Christopher Columbus belonged to Italy.
- Caspian Sea water is shared by Iran, Russia & Azerbaijan.
- Magna Carta is known as the Bible of English Constitution.
- Russian equivalent of Pentagon is Kremlin.
- East Timore, the Colony of Portugal, was captured by Indonesia in 1975.
- Taiwan separated from China in 1949.
- American Naval Base "Diego Garcia" is in Indian Ocean.
- Ulster Unionists wanted to retain British rule in Northern Ireland.
- Anti-Semitism means animosity towards Jews.
- Lens at the end of the compound microscope is called objective.
- Protozoa was first observed in compound microscope.
- Francisco Fernandez introduced Tobacco in Europe.
- Todar Mal was revenue minister of Akbar.
- Mobile phones started in 1977.
- Penology is the study, theory and practice of prison management & criminal rehabilitation.
- Length of India-China border is 3,380 km.
- Cyprus gained independence from Britain in 1960.
- Cyprus was divided into Turkish Republic of Northern Cyprus and Greek Cyprus in 1974.
- Al-Azhar University is located in Cairo, Egypt.
- Fortress of Grenada, known as Alhambra is in Spain.
- Capital of ancient Babylonia was Babylon.
- **Hanging gardens were in Babylon.**
- Babylon was on the bank of Euphrates.
- Alma-Ata (Father of Apples) is the capital of Kazakhstan.
- Turkey and Russia are both in Europe & Asia.
- Israel occupied Golan Heights from Syria.
- Iran & UAE dispute over Persian Gulf islands, Greater & lesser Tunbs.
- Sakhalin island is dispute b/w Russia & Japan.
- Ireland is also called Eire.
- Largest earthquake fatalities occurred in Izmir, Turkey in 1999.
- Japan attacked Pearl Harbour located in Hawaii on 7 Dec: 1941.
- Pentagon is in Arlington, Virginia state.
- Pentagon was designed by George Borgstrom.
- Takla Makan is in China is the driest desert in Asia.
- Cathy Pacific is an island.
- Among the Seven Wonders, Church of Saint Sophia is located in Istanbul.
- Gamal Abdel Nasser nationalized Suez Canal in 1956.
- Qutub Minar is in New Delhi.
- Shah Jahan built Taj Mahal for Mumtaz Mahal is located in Agra.
- Capital of Tibet is Lhasa.
- West Bank is located b/w Israel & Jordan.
- **West Bank was occupied in 1967.**
- White House is in Washington DC.
- Frigid Zone is the area within the polar circle area around the South Pole.
- Guantanamo Bay is in Cuba.
- Tartus is the seaport of Syria.
- Statue of Liberty was gifted to US by France in 1884
- Victoria falls are on the border b/w Zimbabwe & South Africa.
- House of U.S Congress in Washington D.C is on Capitol Hill.
- Saddam Hussain executed on 30 Dec: 2006.
- The idea of SAARC originated in the mind of Zia Ur Rehman.
- Iraq occupied Kuwait in August 1990.
- 'Rise and Fall of Great Powers' is the work of Paul Kennedy.
- Pakistan left Commonwealth in 1972 and rejoined in 1989.
- Mustafa Kamal Pasha gave 6 Principles of Kemalism.
- Dayton Accord was signed to solve the problem of Bosnia.
- MI-5 is the secret agency of UK.
- The Chinese communist party was founded in 1921.
- After 27 years of imprisonment, Mr. Nelson Mandela was released in 1990.
- Arab Magrib Union consists of Five States.
- The principal organs of United Nations are six.
- Scandinavia constitutes 3 states.
- The league of Arab States was established on 22nd March 1945.
- The Commonwealth of Australia came into existence in 1901.
- Karl Marx and Engels presented the Communist Manifesto in 1848.

- Soviet Union was replaced by Russian federation in December 1991.
- **Article 55 of the UN Charter promotes international Human Rights.**
- Territorial waters traditionally are recognized to extend how far from a state's coastline? 12 miles.
- A state's executive economic zone (EEZ) is recognized to extend how far from the coastline? 12 miles
- Anti-governmental protests in China by students, workers and some government officials took place: Tiananmen Square, in 1989
- Amnesty International was established in London by the British Lawyer, Peter Benenson in 1961
- The International court of justice was constituted on 26th June 1945
- The Charter of United Nations consists of 111 articles.
- The British Secretary of Foreign Affairs A. Balfour announced British support to establish Jewish state in Palestine in November 2, 1917.
- LAIA stands for Latin American Integration Association.
- Arab League was established on 22nd March 1945.
- World population was one billion in 1803.
- ECOSOC has been established under chapter 10 of the UN charter
- United Arab Emirates is a federation of 7 Emirates.
- Switzerland joined the UN during 2002.
- African Development Bank was established in 1964.
- The author of famous book, "Nuclear Weapons and Foreign Policy" is Henry Kissinger.
- North Korea invaded South Korea in 1950.
- Mani was the Judge of world court.
- Who wrote "Supreme Court and Human Rights"? Tamizuddin
- The Batista regime in Cuba was overthrown by Fidel Castro in January 1959.
- Who wrote "Voyage Through History"? Musarrat Hussain Zuberi
- Who is the author of "Preparing for the Twenty First Century"? Paul Kennedy
- Rasko mountain is situated in Baluchistan
- Who was the first Asian Secretary General of the United Nations? U. Thant
- **Afghan Mujahideen took power in Kabul on April 20, 1991**
- Singapore became independent in 1965
- International headquarter of Transparency International (TI) is located in Berlin, Germany. The founder of the organisation is Peter Eigen
- **The permanent Secretariat of SAARC is established at: Khatmandu**
- **How many official working languages are recognized by UNO: 6**
- Who were the three statesmen who formulated Non-Aligned Movement (NAM): Nehru, Nasser, Tito
- Where is the headquarter of the Amnesty International located: London
- The 'Aid to Pakistan Consortium' meets every year in: Paris
- One US barrel is equal to: 159 litres
- The first Muslim Nobel Laureate was: Anwar Sadaat of Egypt.

SPORTS

- What has 32 panels and 642 stitches-A football (soccer)
- First British open squash championship played in 1922.
- First world squash championship 1976.
- Jhangir khan has won world open 6 times.
- Wimbledon open tennis was instituted in 1877.
- A winner of four competitions (Wimbledon, French open, us open, and Australia open) is called Grand Slam.
- Most Wimbledon single (Men) title are won by Roger Federer
- Most Wimbledon single (woman) title won by Martina Navratilova (USA).
- Common Wealth game are held every 4 years, they were started in 1931.
- First Asia games were played at New Delhi in 1951.
- 15th Asian Games will be held in Qatar in 2006.
- Current World cup holder of hockey is Netherlands.
- FIFA established in Paris on May 21, 1904.
- Grand slam is the title associated with Pete Sampras.
- Michael Chang (USA) is the youngest to win the grand slam.
- Shahid Afridi has made century on 37 balls.
- The title "Oval Hero" is with Fazal Muhammad.
- The sports man Kasparov is associated with Chess.
- Modern summer Olympic were held in Greece in 1896.
- Olympic held every 4 years.
- Hockey became Olympic event in 1908. Pakistan took part in 1948 in London.
- 1st world cup hockey 1971 at Barcelona (Spain).
- Hockey world cup held every 4 year.
- First world cup cricket 1975, won by West Indies.
- India won world cup cricket in 1983 by beating West Indies.
- 10 countries have test status.
- First test match was played in 1877 between Australia and England.
- First One day match between Australia and England in Jan 5, 1971.
- First world cup football 1930, Uruguay, and won by Uruguay.
- 1942 world cup football did not hold due to WW2.
- Nigeria is current Olympic football champion.
- Geoff hunt is associated with Squash.
- South Africa was expelled from ICC in 1970 because of its apartheid policies.
- Current heavy weight championship is with L. Lewis.
- In cricket batsman can be out by 10 ways.
- Peter Marshal is associated with Squash.
- Pakistan had won 4 title of world cup hockey so far.
- First three world cup crickets were played with 60 over.
- Rocky Marciano only heavy weight boxer remained unbeaten throughout his career.
- Lowest test match inning is 26 by New Zealand.
- Highest no of one-days are played at Sharjah Cricket Ground.
- The champion trophy hockey tournament was introduced by Pakistan in year 1978.
- Thomas cup badminton is for men only.
- Uber cup is for badminton.
- Each team in volleyball consists of 6 players.
- Anatoly Karpov, the world chess player belongs to Russia.

- Modern Olympic games were first held in Athens.
- ICC has 10 members and it was founded in 1965.
- Lowest total in cricket is 36 by Canada.
- Tennis player steffi graf belongs to Germany.
- Natwest trophy is for cricket.
- The Swythiling cup is related to Table Tennis.
- Morocco cup is for cricket.
- First modern Olympic games were held in 1896 in Athens.
- First women competed in Olympic games in 1912.
- France and which country contested first ever world cup match Mexico
- The number of countries which participated in the first Olympic Games held at Athens was Nine
- Who owns The Oval cricket ground- Prince Charles
- Who among the following batsmen achieved the feat of hitting six 6s in one over for the first time in international cricket during the World Cup 2007 Herschelle Gibbs
- Where were the first winter Olympics held in 1924 -Charmonix France
- FINA is the governing body of what amateur sport-Swimming
- FITA are the governing body of what sport-Archery
- A Lady Paramount judges at what sport- Archery
- First cricket cup was played in England in 1974.
- First Asian Games were held in New Delhi in 1951. From 1954 they were held every four years.
- Baron Pierre de Coubertin was founder of the modern Olympic
- Bunting is a term in the game of Baseball.
- Grand Master is a term in Chess.
- Grand Slam is a term in sports associated with Bridge as well as Lawn Tennis.
- Martina Hinges is the youngest woman tennis player to win three major singles titles in one season.
- Iron- a sports term is associated with Golf.
- McDowell Cup is associated with football.
- Olympic Games were held twice in Paris and London.
- Paralympics are the games for disabled.
- Uber cup is associated with Badminton.
- Yankee Stadium is associated with Boxing.
- World's oldest sports daily is Gazetta dello Sport of Italy.
- Val Barker Cup is awarded in the Olympic games in Boxing.
- The Paralympics Games 2008 were held in Beijing.
- Asafa Powell is 100 m sprinter.
- The term "Stalemate" is related to the game of Chess.
- With which sport is the term 'butterfly' associated? Swimming
- Next Football world Cup in 2010 is in South Africa
- How many rings on the Olympic flag: Five
- Who ran the first marathon: Phidipedes
- What colour is the cap given to an England cricket player-Blue
- What held up a Cricket test Match between England Pakistan- Mouse on pitch
- What is the first race in the Grand Prix season-Brazilian
- By Olympic rules what must have 14 feathers-Badminton Bird
- How is the Olympic torch lit- By the sun in Greece
- Martina Navratilova belongs to Czech Republic.
- Tour De France is French cycle race.
- National game of Switzerland is skiing.
- What has 32 panels and 642 stitches-A football (soccer)

- In Tennis where is the Australian Open played-Flinders Park
- What Olympic event was dropped in 1920-Tug of War -1900 to 1920
- FIDE govern what game -Chess

ABBREVIATIONS (Previous Papers)

- **VDU** video display unit
- **CRT** cathode ray tube
- **CRO** Cathode Ray Oscillator
- **SARS** Severe Accute respiratry syndrome
- **BOT** Built operate transfer
- **AMU** Atomic mass unit
- **EMF** Electromotive Force or Electromagnetic Field (Most apt is Electromotive Force)
- **ADH** Anti diuretic harmome
- **STP** Standard Temperature and Pressure
- **NPT** Network time protocol
- **CRT** Cathode ray tube
- **SARS** Severe Acute Respiratory Syndrome
- **BOT** Built Operate transfer
- **AMU** Atomic Mass Unit
- **EMF** Electromotive force
- **ADH** Anti Diuretic Hormone
- **STP** Standard Temperature Pressure
- **GeV** Giga Electron Volt
- **NTP** Normal Temperature Pressure
- **CRT** Cathode Ray Tube
- **RQ**: respiratory quotient
- **PVC**: polyvinyl chloride
- **NPN**: negative positive negative
- **WAN**: wide area network
- **ECG**: electro cardio gram
- **CPU**: central processing unit
- **BCG**: bacillus of calmette –Guerin
- **STP** standard temperature and pressure/ Shielded Twisted Pair
- **ATP** Adenosine Tri-Phosphate
- **PNP** proton – neutron – proton
- [Positive-Negative-Positive (transistor)]
- **LAN** local area network
- **KWh** kilo watt hour
- **BTU** British Thermal Unit
- **LDL** Low-density lipoprotein
[Commonly referred to as bad cholesterol]
- **ROM** Read only memory
- **MAF** million acre feet
- **SONAR** Sound Navigation and Ranging
- **LCD**=LIQUID CRYSTAL DISPLAY
- **HDL**= HARDWARE DESCRIPTION LANGUAGE/High-Density Lipoprotein
- **UHF**= ULTRA- HIGH FREQUENCY
- **LED**= LIGHT EMITTING DIODE
- **BASIC**= BEGGINER'S ALL PURPOSE SYMBOLIC INSTRUCTION CODE
- **HST** = HIGH SPEED TECHONOLGY
- **DBS**=DATA BASE SERVER
- **V.L.C.C** stands for Very large crude carrier.

- **VTOL** = vertical take off and landing
- **SETI** = Search for Extraterrestrial Intelligence = a project to find Aliens
- **Fax** is the short form of Facsimile which means identical copy
- On the PH scale what does **PH** stand for-Potential Hydrogen

A

ABM: Anti Ballistic Missiles
ABVP: Akhil Bharatiya Vidyarthi Parishad
AC: Alternating Current; Ashoka Chakra
ACU: Asian Currency Union
AD: anno Domini; in the year of Lord Christ
ADB: Asian Development Bank
ADC: Aide-de-Camp; Access Deficit Charge
ADF: Asian Development Fund
ADS: Air Defence Ship
AJT: Advanced Jet Trainer
AG: Accountant General; Adjutant General
AI: Air India
AIDS: Acquired Immune Deficiency Syndrome
AIIMS: All India Institute of Medical Sciences

C

CA: Chartered Accountant
CABE: Central Advisory Board of Education
C & AG: Comptroller & Auditor General
CAIR: Centre for Artificial Intelligence and Robotics
CAPART: Council for People's Action and Advancement of Rural Technology
CAPEs: Computer-Aided Paperless Examination System
CAS: Chief of Army Staff; Chief of Air Staff; Conditional Access System
CB: Citizen Band (Radio)
CBI: Central Bureau of Investigation
CBFC: Central Board of Film Certification
CCPA: Cabinet Committee on Political Affairs
CD: Conference on Disarmament
C-DAC: The Centre for Development of Advanced Computing
CDMA: Code Division Multiple Access
CECA: Comprehensive Economic Cooperation Agreement
CERN: European Organisation for Nuclear Research (Pronounced CERN in French)
CFC: Chlorofluoro Carbon
CFS: Container Freight Station
CHOGM: Commonwealth Heads of Government Meeting
CIA: Central Intelligence Agency (of U.S.A.)
CIBIL: Credit Information Bureau (India) Ltd
CIC: Chief Information Commissioner
CID: Criminal Investigation Department
C-in-C: Commander-in-Chief
cif: cost, insurance and freight
CIS: Commonwealth of Independent States
CISF: Central Industrial Security Force
CITES: Convention on International Trade in Endangered Species
CITU: Centre of Indian Trade Unions
CLASS: Computer Literacy and Studies in Schools
CLAWS: Centre for Land Warfare Studies
CM: Command Module; Chief Minister
CMP: Common Minimum Programme
CNG: Compressed Natural Gas
CNN: Cable News Network
CNS: Chief of the Naval Staff
CO: Commanding Officer
COD: Central Ordnance Depot; Cash on Delivery
CPCB: Central Pollution Control Board
CPI: Communist Party of India
CPI(M): Communist Party of India (Marxists)
CPU: Central Processing Unit

CR: Central Railway
CRAC: Cyber Regulation Advisory Council
CRDi: Common Rail Direct injection
CRISIL: Credit Rating Information Services of India Limited
CRM: Customer Relationship Management
CRR: Cash Reserve Ratio
CRPF: Central Reserve Police Force
CSIR: Council of Scientific and Industrial Research
CTBT: Comprehensive Test Ban Treaty
CTT: Commodities Transaction Tax
CVRDE: Combat Vehicles Research and Development Establishment

D

DA: Dearness Allowance; Daily Allowance
DAVP: Directorate of Advertising and Visual Publicity
DC: Deputy Commissioner; Direct Current in Electricity
DDT: Dichloro-Diphenyl Trichloro-ethane (disinfectant)
DIN: Director Information Number
DM: District Magistrate; Deputy Minister
DMIC: Delhi-Mumbai Industrial Corridor
DMK: Dravida Munnetra Kazhagam (a regional political party of Tamil Nadu)
DNA: de-oxyribonucleic acid
DO: Demi-official (letter)
DOD: Department of Ocean Development
DPEP: District Primary Education Programme
DPI: Director of Public Instruction
DRAM: Dynamic Random Access Memory
DRDO: Defence Research and Development Organisation
DST: Daylight Saving Time
DRES: Department of Renewable Energy Sources
DTH: Direct to Home (broadcasting)

E

ECG: Electro Cardio-gram
ECS: Electronic Clearing Service
ECT: Electro-convulsant Therapy (electric shock treatment)
EDUSAT: Education Satellite
EEG: Electro-encephalography
EET: Exempt Exempt Taxation
EFA: Education for All
EFF: Extended Fund Facility
e.g.: exempli gratia; for example
EHTP: Electronic Hardware Technology Parks
ELISA: Enzyme Linked Immuno Solvent Assay (used for testing AIDS)
EMI: Equated Monthly Instalment
EMS: European Monetary System
EMU: Electric-Multiple Unit; Extra-vehicular Mobility Unit; (European) Economic and Monetary Union
E & OE: Errors and Omissions Excepted
EPROM: Erasable Programmable Read Only Memory
ER: Eastern Railway
ERM: Exchange Rate Mechanism
ERNET: Educational and Research Network
ESA: European Space Agency
ESCAP: Economic and Social Commission for Asia and the Pacific
ESMA: Essential Services Maintenance Act

ESOP: Employee Stock Option Programme
etc.: et cetera (and other things)
EU: European Union
EVM: Electronic Voting Machine

F

FAO: Food and Agriculture Organisation
FBI: Federal Bureau of Investigation (of the U.S.A.)
FCNR: Foreign Currency (non-resident) Accounts Scheme
FDR: Flight Data Recorder; Fixed Deposit Receipt
FEMA: Foreign Exchange Management Act
FERA: Foreign Exchange Regulations Act
FICCI: Federation of Indian Chambers of Commerce and Industry
FI: Foreign Institutional Investors
FIPB: Foreign Investment Promotion Board (of India)
FLAG: Fibre Optic Link Around the Globe
FM: Field Marshal; Frequency Modulated
FPSB: Financial Planning Standards Boards (India)
FRBM: Fiscal Responsibility and Budget Management
FSSA: Food Safety and Standards Authority (of India)
FTA: Free Trade Area
FTP: File Transfer Protocol
